22 October 2021

Dear Stephen,

RE: Liddell Battery and Bayswater Ancillary Works Project (SSD-8889679) – Request for additional information

Biodiversity and Conservation Division (BCD) in a letter dated 15th September requested additional information in relation to State Significant Development application 8889679 lodged by AGL Macquarie Pty Limited for the Liddell Battery and Bayswater Ancillary Works Project.

Please find a letter from Kleinfelder Australia Pty Ltd addressing the request. I also confirm the survey tracks delineated as "Post EIS exhibition surveys (October 2021)" on the attached maps match those that Kleinfelder undertook.

Please do not hesitate to contact me on 0410 479310 if you have any queries or wish to discuss.

Yours sincerely,

A handwritten signature in black ink, reading 'Arianna Henty'.

Arianna Henty

Subject: Liddell Battery and Bayswater Ancillary Works Project (SSD-8889679) - RFI

Dear Stephen,

Biodiversity and Conservation Division (BCD) in a letter dated 15th September requested additional information in relation to State Significant Development application 8889679 lodged by AGL Macquarie Pty Limited for the Liddell Battery and Bayswater Ancillary Works Project as follows:

- ***Targeted flora surveys should be conducted for threatened orchids in vegetation zones 1, 3 and 4.***

BCD requested 'further surveys should be conducted for *Pterostylis chaetophora*, *Prasophyllum petilum* and *Diuris tricolor* to meet the requirements of *Surveying threatened plants and their habitats – NSW survey guide for the Biodiversity Assessment method* (DPIE 2020)'.

In response, AGL met with DPIE and BCD to discuss survey coverage and subsequently agreed areas requiring additional survey effort.

GIS files of target areas requiring additional survey were supplied to Kleinfelder. Senior Ecologist Daniel O'Brien and Ecologist Megan Ferguson from Kleinfelder undertook targeted threatened flora searches (parallel transects) of the agreed areas on 6th October. Transects of the additional and original survey are shown on the map attached, identified as "Post EIS exhibition surveys (October 2021)". *Pterostylis chaetophora*, *Prasophyllum petilum* and *Diuris tricolor* were not identified within the additional survey area.

If you have any questions, please do not hesitate to contact me.

Sincerely,

Dr. Daniel O'Brien

Senior Ecologist
