RE: Planting blocking the Melocco Scroll elevation

We have received and reviewed the Heritage Impact Statement post lodgments of the SSSA and agrees that the current planting design of the *Acmena smithii* 'Sublime' (sublime lilly pilly) will visually block the Melocco Scroll balustrade. We do not believe the remaining understory species will visually impact the Melocco Scroll balustrade.

Turf Design Studio recommends substituting the *Acmena smithii* 'sublime' with a *Waterhousea floribunda*. The *Waterhousea* should be under pruned to 3m during the maintenance period to prevent visual impact on the Balustrade.

Please do not hesitate to contact me should you require further information.

Best Regards,

Scott Jackson
