AVIATION SSDA UPDATE INTEGRATED ASB (IASB) ADDITION

Dear Alice,

We note the review of the following core scope of elements of the IASB additions:

- UNSW Eastern Extension (Base Building Only)
- Associated modifications within the ASB
- Lowering of Hospital Road
- Landscaping

Following on from the adjusted building scope to include the UNSW considerations, given that the height of the building has not changed and therefore the existing PANS-OPS and OLS approvals remain extant, there is no requirement to engage with the airport and regulatory authorities on this issue. The flight path considerations for SSD 9113 (dated 6th June 2018) remain unchanged.

The GDA94 coordinates of the HLS reference point are:

Easting: 337062.15

Northing: 6245526.54

As far as stakeholder engagement is concerned, AviPro has maintained contact with the following organisations concerning crane and main building timings:

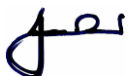

Department of Infrastructure, Regional Development and Cities

Civil Aviation Safety Authority

Air Services Australia

Sydney Airport

Sincerely,

A handwritten signature in blue ink, appearing to read "Steve Graham".
