Subject: Concrete Deliveries during Morning Restricted Hours for Structure Works

To: Todd Lee
Health Infrastructure
Level 2 Suite B, 21 Brett Street,
Tweed Heads NSW 2485

Dear Todd,

This letter is a formal request to the Department of Planning, Industry and Environment (DPIE) to approve the deliveries of concrete trucks during the restricted hours from 8 to 9am as noted in SSD 10353 condition B15(k).

The average pour size for the structure slab is over 1000 m² or 300 m³ as noted on the attached structure pour sequence drawings. A pour of 300 m³ requires approximately 43 concrete trucks and a "continual supply of concrete pouring" is required to comply with structural specification requirements. Based on a 5 hour pour commencing at 7am and concluding at 1pm, this equates to a concrete truck arriving and departing at site approximately every 7 minutes. During the 1 hour from 8 to 9am, this would result in an additional 9 trucks on Cudgen Rd.

The attached program details the structure delivery commencing 25 March 2021 and is to be completed by 9 March 2022. Based on this program it is forecast that a concrete pour will be occurring 4-5 days per week for the duration of the structure. It is requested that this submission be noted as the evidence requested by condition B15(k) of SSD10353 (attached is the site-specific delivery induction completed by all drivers).

The following traffic mitigation controls are implemented on site and will occur during the slab pours:

- All concrete trucks to pull in off Cudgen Rd and enter inside site prior to stopping to ensure no queuing on Cudgen Rd (all COVID checks will be completed at the pump location)
- All concrete trucks exiting site will exit left only to reduce impact to traffic flows
- The entrance/exit gate is controlled at all times by the Lendlease supervision.

Based on the above, Lendlease awaits a response for the request to complete works with concrete deliveries during the morning restricted hours for the duration of the structure works.

Yours faithfully,
