To Sean,

Re42 Honeysuckle Drive, Newcastle NSW Mixed Use Development (SSD 10378), Waste service provider statement of intent

We have reviewed the proposed development plans for the mixed-use Hotel and Office development at 42 Honeysuckle Drive, Newcastle. As a private waste contractor that can provide on-site waste collection following completion of the development. Remondis confirm that waste collection services can be provided to the building on completion. Remondis waste collection vehicles are different to Council's standard waste collection vehicles and there are multiple vehicle options and collection arrangements that can be put in place to adequately service this proposed development.

Having reviewed the SLR swept path assessments in their memorandum dated 17 September 2020, we confirm that the development as currently designed is serviceable by refuse collection vehicles in our fleet. The collection vehicle will enter the site from Honeysuckle drive and park in the designated loading bay. The waste collection staff will collect the bins directly from the appropriate waste room. This can be achieved via a standard rear-lift refuse collection vehicle (or similar) which is able to enter and exit the site in a forward motion with adequate clearances provided throughout the internal manoeuvring area. The height clearance within the on-site waste collection area is understood to be 4.2m and is deemed sufficient to allow waste collection vehicle access.

Regards

Rochelle Doherty
