## Notes

- All stormwater pipes running under the proposed building structures shall be concrete encased in accordance with relevant BCA requirements or to be redirected away from the proposed building.

- Stormfilter cartridges are to be provided as part of the water quality treatment train. Implementing rainwater tanks can help reduce the number of stormfilter cartridges.

- Rainwater outlets are to be provided around flat area to capture runoff. Locations to be confirmed in later stage.

- All design levels are preliminary and will be further designed in later stage with landscape input.
