

## Appendix B. SEARs compliance

Requirement	Location where this is addressed in the EIS
<b>General requirements</b>	
A stand-alone executive summary	Refer to Executive Summary
<p>A full description of the development, including:</p> <ul style="list-style-type: none"> <li>▪ details of construction, operation and decommissioning;</li> <li>▪ a site plan showing all infrastructure and facilities (including any infrastructure that would be required for the development, but the subject of a separate approvals process);</li> <li>▪ a detailed constraints map identifying the key environmental and other land use constraints that have informed the final design of the development;</li> </ul>	<p>Project description is provided in Chapter 2.</p> <p>Figure 2-1 shows all infrastructure and facilities associated with the Project.</p> <p>Figure 4-1 provides surrounding land use context. Figure 4-2 provides key environmental constraints.</p>
A strategic justification of the development focusing on site selection and the suitability of the proposed site with respect to potential land use conflicts with existing and future surrounding land uses (including existing land use, residential development, the Hume Dam Hydro Power Station and WaterNSW Switchyard and offices);	Chapter 4 provides strategic justification while Chapter 10 addresses potential land use conflicts.
<p>An assessment of the likely impacts of the development on the environment, focusing on the specific issues identified below, including:</p> <ul style="list-style-type: none"> <li>▪ A description of the existing environment likely to be affected by the development;</li> <li>▪ an assessment of the likely impacts of all stages of the development, (which is commensurate with the level of impact), including any cumulative impacts of the site and existing or proposed developments in the region, taking into consideration any relevant legislation, environmental planning instruments, guidelines, policies, plans and industry codes of practice;</li> <li>▪ a description of the measures that would be implemented to avoid, mitigate and/or offset the impacts of the development (including draft management plans for specific issues as identified below); and</li> <li>▪ a description of the measures that would be implemented to monitor and report on the environmental performance of the development;</li> </ul>	Chapter 6 describes how key issues for the project were identified while Chapter 7 to 17 provide assessment of these key issues including description of existing environment, assessment of impacts and description of mitigation measures proposed to minimise impacts and how they would be monitored.

Requirement	Location where this is addressed in the EIS
A consolidated summary of all the proposed environmental management and monitoring measures, identifying all the commitments in the EIS; and	Chapter 18 provides a consolidated summary of all the proposed environmental management and monitoring measures.
<p>The reasons why the development should be approved having regard to:</p> <ul style="list-style-type: none"> <li>▪ relevant matters for consideration under the <i>Environmental Planning and Assessment Act 1979</i>, including the objects of the Act and how the principles of ecologically sustainable development have been incorporated in the design, construction and ongoing operations of the development;</li> <li>▪ the suitability of the site with respect to potential land use conflicts with existing and future surrounding land uses; and</li> <li>▪ feasible alternatives to the development (and its key components), including the consequences of not carrying out the development.</li> </ul>	Chapter 19 presents an evaluation of the Project as a whole, drawing conclusions on the overall merits of the Project.
A detailed consideration of the capability of the project to contribute to the security and reliability of the electricity system in the National Electricity Market, having regard to local system conditions and the Department's guidance on the matter; and	Refer to Chapter 4
A detailed evaluation of the merits of the project as a whole.	Chapter 19 presents an evaluation of the Project as a whole, drawing conclusions on the overall merits of the Project.
<p>The EIS must also be accompanied by a report from a qualified person providing:</p> <ul style="list-style-type: none"> <li>▪ a detailed calculation of the capital investment value (CIV) (as defined in clause 3 of the Regulation) of the Project, including details of all assumptions and components from which the CIV calculation is derived; and</li> <li>▪ certification that the information provided is accurate at the date of preparation.</li> </ul> <p>The development application must be accompanied by the consent in writing of the owner/s of the land (as required in clause 49(1)(b) of the Regulation).</p>	Provided separately by Meridian.

Requirement	Location where this is addressed in the EIS
<b>Specific issues</b>	
<p>Biodiversity – including:</p> <ul style="list-style-type: none"> <li>an assessment of the biodiversity values and the likely biodiversity impacts of the project in accordance with Section 7.9 of the Biodiversity Conservation Act 2016 (NSW), the Biodiversity Assessment Method (BAM) and documented in a Biodiversity Development Assessment Report (BDAR), unless BCD and DPIE determine that the proposed development is not likely to have any significant impacts on biodiversity values;</li> <li>the BDAR must document the application of the avoid, minimise and offset framework including assessing all direct, indirect and prescribed impacts in accordance with the BAM;</li> </ul>	Refer to Chapter 7
<p>Heritage – including an assessment of the likely Aboriginal and historic heritage (cultural and archaeological) impacts of the development, including consultation with the local Aboriginal community in accordance with the <i>Aboriginal Cultural Heritage Consultation Requirements for Proponents</i>;</p>	Refer to Chapter 8 and 9
<p>Land – including:</p> <ul style="list-style-type: none"> <li>an assessment of the potential impacts of the development on existing land uses on the site and adjacent land;</li> <li>an assessment of the compatibility of the development with existing land uses, during construction, operation and after decommissioning;</li> </ul>	Refer to Chapter 10
<p>Visual – including an assessment of the likely visual impacts of the development (including any night lighting) on surrounding residences, scenic or significant vistas;</p>	Refer to Chapter 11
<p>Noise – including an assessment of the construction noise impacts of the development in accordance with the <i>Interim Construction Noise Guideline</i> (ICNG), operational noise impacts in accordance with the <i>NSW Noise Policy for Industry</i> (2017), cumulative noise impacts (considering other developments in the area), and a draft noise management plan if the assessment shows construction noise is likely to exceed applicable criteria;</p>	Refer to Chapter 12
<p>Transport – including:</p>	Refer to Chapter 13

Requirement	Location where this is addressed in the EIS
<ul style="list-style-type: none"> <li>▪ an assessment of the peak and average traffic generation, including over-dimensional vehicles, construction worker transportation and transport of materials by rail;</li> <li>▪ an assessment of the likely transport impacts to the site access route (including Murray Street and Hume Weir Road), site access point, any Crown land, particularly in relation to the capacity and condition of the roads;</li> <li>▪ a cumulative impact assessment of traffic from nearby developments;</li> <li>▪ a description of any proposed road upgrades developed in consultation with the relevant road and rail authorities (if required); and</li> <li>▪ a description of the measures that would be implemented to mitigate any transport impacts during construction;</li> </ul>	
<p>Water – including:</p> <ul style="list-style-type: none"> <li>▪ an assessment of the likely impacts of the development (including flooding) on surface water and groundwater resources (including the Murray River and Hume Dam) and measures proposed to monitor, reduce and mitigate these impacts;</li> <li>▪ details of water requirements and supply arrangements for construction and operation; and</li> <li>▪ a description of the erosion and sediment control measures that would be implemented to mitigate any impacts in accordance with <i>Managing Urban Stormwater: Soils &amp; Construction</i> (Landcom 2004);</li> </ul>	Refer to Chapter 14
<p>Hazards and Risks – including:</p> <ul style="list-style-type: none"> <li>▪ a preliminary risk screening in accordance with <i>State Environmental Planning Policy No. 33 – Hazardous and Offensive Development</i> and the Department's <i>Applying SEPP 33</i>, with clear indication of class, quantity and location of all dangerous goods and hazardous materials associated with the development. If the preliminary risk screening indicates that the development is 'potentially hazardous', a Preliminary Hazard Analysis (PHA) must be prepared in accordance with the Department's <i>Hazardous Industry Planning Advisory Paper No. 6, 'Hazard Analysis' and Multi-level Risk Assessment</i>.</li> </ul>	Refer to Chapter 15

Requirement	Location where this is addressed in the EIS
<ul style="list-style-type: none"> <li>an assessment of potential hazards and risks including but not limited to bushfires, spontaneous ignition, electromagnetic fields or the proposed grid connection infrastructure against the International Commission on Non-Ionizing Radiation Protection (ICNIRP) <i>Guidelines for limiting exposure to Time-varying Electric, Magnetic and Electromagnetic Fields</i>.</li> </ul>	
Socio-Economic – including an assessment of the likely impacts on the local community, demands on Council infrastructure and a consideration of the construction workforce accommodation; and	Refer to Chapter 16
Waste – identify, quantify and classify the likely waste stream to be generated during construction and operation, and describe the measures to be implemented to manage, reuse, recycle and safely dispose of this waste.	Refer to Chapter 17.
<b>Consultation</b>	
<ul style="list-style-type: none"> <li>During the preparation of the EIS, you should consult with relevant local, State or Commonwealth Government authorities, infrastructure and service providers, community groups, affected landowners, exploration licence holders and mineral title holders.</li> <li>In particular, you must undertake detailed consultation with affected landowners surrounding the development and Albury City Council.</li> <li>The EIS must describe the consultation process and the issues raised, and identify where the design of the development has been amended in response to these issues. Where amendments have not been made to address an issue, a short explanation should be provided.</li> </ul>	Refer to Chapter 5.
<p>Further consultation after 2 years</p> <p>If you do not lodge a development application an EIS for the development within 2 years of the issue date of these SEARs, you must consult further with the Secretary in relation to the preparation of the EIS.</p>	Not applicable.
