Gross Floor Area Definition:

This area is computed by measuring internal face of external walls excluding an area used solely for rooftop fixed mechanical plant and/or basement car parking. In the circumstances listed below GFA will be calculated as detailed:

- Stairwells and liftwells should be counted as contributing to GFA once only (these components are not considered to be floor area for subsequent levels).
- Basement parking also incorporates parking for bicycles, where such areas are designed in accordance with the relevant Australian Standard, and can be excluded from the GFA calculation.
- VOIDS within an atrium design can be excluded from the GFA provided the initial floor area of the atrium is included.
- Mezzanines are considered to be a floor and should be included in the calculation.

AREA SCHEDULE GFA
