Re: West Culburra Part 3A mixed use development proposal –Concept Application

Dear Sir,

My wife and I are the owner of 34 East Crescent at Culburra.

We are extremely concerned about the proposed extensive development in the Crookhaven Catchment Area which will require the removal of all the native vegetation within the 70 ha. development site.

This will entail the loss of village life as we know and appreciate, the natural native environment, destruction of current wildlife habitat, and loss of Aboriginal Cultural sites.

In our opinion the Crookhaven Catchment area should be preserved.

We urge you to consider better alternatives.

Yours sincerely,
