23/10/2012.

To Mr Nick Hall,

Concerning Project
Number (SSD 4986) As a parent
my daughter's welfare would be affected
for health reasons from the toxic
emissions from the proposed AN plant,
as well as the risk of incidents
where the whole Centre (Stockton)
would have to be evacuated
which would be an impossible task.
The clients of Stockton Centre have
enough medical problems already
without creating more from the
inevitable release of fine particles of
AN toxic nitrous oxide & ammonia emissions.
