Attention; Mr. Nick Hall

Re project application number (SSD-4986)

Dear Sir,

I hereby lodge my objection, against the proposed application, by Incites Pivot, to built stockpiles of ammonium nitrate next to the existing Orica site on Kooragang Island and in very close proximity the CBD of Newcastle and its close by residential suburbs.

An industrial accident could have catastrophic consequences, for thousands of people, living / working or just being in the area, not even talking about the International recognized Wetlands and the infrastructure damage to other industries around Newcastle Harbour.

I understand, that there have been at least 24 documented explosions involving ammonium nitrate worldwide.

The risks of it happening, may be small, but the consequences can be enormous and certainly not worth that small risk.

Yours sincerely,

Edith M. van Oort
