Subject: SSD-4986 INCITEC PIVOT Ammonium Nitrate Manufacturing Facility

Dear Sir,

Please include my submission to the above proposal.

I **strongly object** to the proposal, because after reading the EIS, and learning that the project will have a production capacity of 350,000 tonnes per annum, including manufacturing plant, chemical storage tanks and product storing facilities, I believe it is located too close to Stockton and Newcastle.

We own a home in Mitchell St Stockton, and we plan to retire there in the next few years. This facility will impact on our retirement plans. We will not live in Newcastle if this facility goes ahead - being so close to the CBD.

Yours faithfully

Catherine & Denys Stedman
