**Subject** MPW Concept Modification (No. 1) – Consolidated assessment clarification responses

This memo and its attachments consolidate all information provided to the Department of Planning and Environment (DP&E) for the assessment of the MPW Concept Modification (SSD 5066 MOD1), after the submission of the Response to Submissions (RtS) and Supplementary Response to Submissions (SRtS) documentation.

Table 1 provides a summary of all documentation issued to DP&E, the date of issue and which Attachment it is provided within.

It is acknowledged that in some cases, responses relating to the above, included requests for additional information relating to other projects within the Moorebank Precinct (such as the MPE Stage 2 Proposal). Unless otherwise included for the purpose of a cumulative assessment, this information is not relevant to the MPW Modification Proposal, and should not be considered as part of this assessment nor is it considered relevant to the approval instrument (i.e. under SSD 5066 MOD 1).

Where there is any inconsistency between the documentation submitted, the more recent documentation would prevail to the extent of that inconsistency.
