Dear Sir/Madam,

RE: Shell Clyde Refinery Conversion EIS for SSD - 5147

I am currently looking to acquire a residential property in the Ryde/Meadowbank Ermington area. It has been brought to my attention that there is a pipeline carrying petrol from Greenwich to Clyde. Previously I understand this pipeline carried crude oil but approval of this SSD would effectively authorise it to carry petrol. In the EIS I cannot find exact details of where this pipeline runs. The risks associated with this pipeline must be much higher with petrol.

Please do not approve this SSD until other potentially affected residents and I are notified of where the pipeline runs and the associated risks. Also can you please advise whether the pipeline location shows with LGA Council zoning and easement details which form part of the standard house purchase contracts.

Yours Sincerely

Nigel Lynn
