Aboriginal Community Consultation Log

Date	Sender	Organisation	Recipient	Organisation	Method	Details
24/1/13	Jenna Weston	AMBS	N/A	News Local	Phone	Asked where to send text for a public notice; given email address.
24/1/13	Jenna Weston	AMBS	N/A	News Local	Email	Emailed text for an ad to be placed in the Fairfield Advance's next publication. Ad to appear on Wednesday 30 January 2013; response date 13 February.
24/1/13	N/A	News Local	Jenna Weston	AMBS	Email	Automatic reply acknowledging my email.
24/1/13	Jenna Weston	AMBS	Kevin Cavanagh	DLALC	Email	Notification of project, request for contact details of Aboriginal groups, and request for notification if they would like to be consulted, by 7 February.
24/1/13	Jenna Weston	AMBS	N/A	ORALRA	Email	Notification of project and request for contact details of Aboriginal groups, by 7 February.
24/1/13	Jenna Weston	AMBS	N/A	SMCMA	Email	Notification of project and request for contact details of Aboriginal groups, by 7 February.
24/1/13	Jenna Weston	AMBS	N/A	NNTT	Email	Notification of project and request for contact details of Aboriginal groups, by 7 February.
24/1/13	Jenna Weston	AMBS	N/A	Fairfield City Council	Email	Notification of project and request for contact details of Aboriginal groups, by 7 February.
24/1/13	Jenna Weston	AMBS	Manager, Aboriginal Heritage & Planning Section	OEI	Fax	Notification of project and request for contact details of Aboriginal groups, by 7 February.
24/1/13	Jenna Weston	AMBS	N/A	NTSCorp	Fax	Notification of project and request for contact details of Aboriginal groups, by 7 February.
24/1/13	N/A	News Local	Jenna Weston	AMBS	Email	Ad proof.
24/1/13	Jenna Weston	AMBS	N/A	News Local	Phone	Called to confirm ad proof. Arranged for them to send us an invoice for payment.
29/1/13	Sylvia Jagtman	NNTT	Jenna Weston	AMBS	Email	No potential stakeholders identified.
30/1/13	Susan Harrison	OEI	Jenna Weston	AMBS	Post	Identified the following groups as potentially having an interest in the study area: DLALC, DTAC, DCAC, DACHA, Yarrowalk/ Tocomwall, DALCI, DLO, GCHAC and AHCS.
30/1/13	George Tonna	NTSCorp	Jenna Weston	AMBS	Post	Said that they cannot pass on the information requested, but they would pass the letter to the people who may be interested.
31/1/13	N/A	News Local	Jenna Weston	AMBS	Email	Sent copy of ad appearance in newspaper.
1/2/13	Margaret Bottrell	HNCMA	Jenna Weston	AMBS	Email	Said that she was not allowed to pass on the information requested, that the CMA has no interest in this project, but they would pass the letter to the members of their Advisory Committee for their information.
4/2/13	Jenna Weston	AMBS	Leanne Watson	DCAC	Post	Notification of project and request for notification if they would like to be consulted, by 18 February.
4/2/13	Jenna Weston	AMBS	Sandra Lee	DTAC	Post	Notification of project and request for notification if they would like to be consulted, by 18 February.
4/2/13	Jenna Weston	AMBS	Gordon Morton	DACHA	Post	Notification of project and request for notification if they would like to be consulted, by 18 February.

4/2/13	Jenna Weston	AMBS	Gordon Workman	DLO	Post	Notification of project and request for notification if they would like to be consulted, by 18 February.
4/2/13	Jenna Weston	AMBS	Des Dyer	DALCI	Post	Notification of project and request for notification if they would like to be consulted, by 18 February.
4/2/13	Jenna Weston	AMBS	Cherie Carroll Turrise	GCHAC	Post	Notification of project and request for notification if they would like to be consulted, by 18 February.
4/2/13	Jenna Weston	AMBS	Scott Franks	Tocomwall	Post	Notification of project and request for notification if they would like to be consulted, by 18 February.
4/2/13	Jenna Weston	AMBS	Amanda Hickey	AHCS	Post	Notification of project and request for notification if they would like to be consulted, by 18 February.
7/2/13	Celestine Everingham	DACHA	Jenna Weston	AMBS	Phone	Registered interest to be consulted.

Proof of advertisement that appeared in the Fairfield Advance on 30 January 2013

Notice of Aboriginal Consultation

Wallgrove Road, Horsley Park

An Aboriginal heritage assessment is being undertaken for a proposed industrial development at 813-913 Wallgrove Road, Horsley Park. The project has been classified as State Significant Development and the proponent intends to seek appropriate approvals under the Environmental Planning and Assessment Act 1979 and other relevant legislation/regulations.

Aboriginal people who hold cultural knowledge & wish to be consulted for this assessment are invited to register an expression of interest by 13 February 2013, by fax to (02) 9320 6428, by email to Jenna.Weston@austrmus.gov.au

or by post to:

Re: Wallgrove Rd Horsley Park

Dear Jenna,

The Darug Aboriginal Landcare has no objections to the proposed development to this area. We would like to register in this project.

Our organization would like to be consulted and take part in the Heritage assessment. On 813-913 Wallgrove Road Horsley Park.

We agree with your Methodology for this project.

We look forward to working with you in the future.

Kind regards

Des Dyer

Re: :813-913 Wallgrove Road Horsley Park

Dear Jenna,

The Darug Aboriginal Landcare Incorporated has read the report and we have no objections to the proposed area of development .

We agree with the recommendation No. 3 of the Archaeological salvage and the Methodology in the report of the Aboriginal Cultural Heritage.

We ask that we monitor the removal of the top soil, as visibility was very low doing the over walk area.

Respectfully yours,
Des Dyer

Sites Officer

Appendix B: Summary Table of Previous Local Aboriginal Heritage Investigations

Reference	Location	Type of investigation	Findings	Distance from study area
JMCHM (2004)	"The Vineyard", Wallgrove Road, Horsley Park	Proposed sand & clay mining area: Salvage excavation of PAD #45-5-2986	2029 flaked stone artefacts recovered from 121m ² manufactured on silcrete (72%), silicified tuff (23%), quartz (4%), and small amounts of quartzite, silicified wood, igneous & fine grained siliceous (FGS) stone. 21 backed artefacts (1%), 3 bipolar cores, 1 anvil, 44 artefacts with retouch/usewear (2%); Highly variable density but average was 17 artefacts/m ² . The site was interpreted as a dispersed low density artefact scatter with isolated areas of medium-high density representing localised knapping/activity areas. It was concluded to represent multiple phases of low intensity prehistoric occupation of Reedy Creek	Immediately north
Kelton (2001b)	Between Hoxton Park and Horsley Park	Modifications to proposed Western Sydney Orbital: Survey	No sites located	Immediately north east
Koettig (1989b)	Eastern Creek	Proposed Extension to Waste Disposal Depot: Test Excavations	69 flaked stone artefacts (63% silcrete, 15% indurated mudstone, 13% chert, 6% quartz & 3% basalt) recovered from 30 backhoe test pits and 1 0.25m ² shovel pit. Preservation of 1 site and salvage excavation of 2-3 other sites recommended	0.5km east
Steele (2002)	Wallgrove Road, Eastern Creek	Proposed Wonderland Business Park Development: Survey	Possible scarred tree located, & 4 open campsites relocated, comprising flaked silcrete & indurated artefacts. Test excavations recommended	1km north
Steele (2003a)	Wallgrove Road, Eastern Creek	Proposed Wonderland Business Park Development: Test excavations	20m ² mechanically excavated. 33 surface & 5 subsurface flaked & transported silcrete, quartz, tuff & volcanic stone artefacts recovered. Considered to represent background scatter of low archaeological significance.	1km north
Steele & Carney (1997)	Surplus land adjoining Australia's Wonderland, Eastern Creek	Proposed rezoning: Survey	7 low-density open campsites (maximum 7 artefacts) & 8 isolated finds located, comprising flaked silcrete, indurated mudstone & quartz artefacts & manuports. Sites assessed as representing sporadic use of the area by people moving between more favourable creeklines (Eastern & Ropes Creeks). Collection, monitoring or test excavations recommended	1km north
HLA (2003)	Adjacent to Western Sydney Orbital, Eastern Creek	Proposed sewer line: Survey	No sites located	1.2km north
Appleton (2002)	Old Wallgrove Road, Horsley Park	Proposed clay and shale extraction area: Survey	2 isolated finds (PAD associated with 1) of flaked tuff identified. Collection & monitoring recommended	1.3km west
Haglund & Rawson (2007)	The Horsley Drive, Westlink M7 to Cowpasture Road,	Proposed road upgrade: Test excavations	309 artefacts recovered from 6 test areas, made of silcrete (77%; some heat-treated), FGS/	1.6km south east

	Horsley Park		silicified tuff (16%) & quartz (7%). 62% of artefacts were located at area 2, for which salvage excavation was recommended	
Navin Officer (2003)	Between Sydney West Substation & Erskine Park	Proposed 132kV Transmission Line: Survey	2 open campsites (EP1 & EP2) identified on valley floors associated with ephemeral creeks. EP1 comprised 7 flaked stone artefacts of silcrete & mudstone. EP2 comprised 8 flaked stone artefacts of silcrete, including blades. 1 PAD (EP PAD1) identified on Ropes Creek near junction with unnamed tributary to the east	1.7km north west
Kelton (2001a)	Eastern Creek	Proposed contractor's works compound, Western Sydney Orbital: Survey	1 open campsite (flaked indurated mudstone and silcrete) & 2 PADs (on bank & alluvial terrace of Eastern Cree) identified. Recommended test excavation for PADs and S.90 for site	2.3km north
Rich (1989)	Eastern Creek	Proposed Horsley Road deviation: Survey	3 open campsites located, comprising flaked silcrete, chert, indurated mudstone & quartzite stone artefacts; test excavation of all sites recommended	2.6km north east
Crew (1989)	Eastern Creek	Proposed Sydney International Grand Prix Circuit: Survey	9 open campsites & 10 isolated finds located, comprising flaked quartz, silcrete, chert & indurated mudstone stone artefacts (including bipolar artefact & backed blades); test excavation of 8 sites recommended	2.6km north east
Crew (1990)	Eastern Creek	Proposed Motor Sports Complex: Survey	PAD identified in relatively undisturbed area & recommended for test excavation	2.6km north east
Navin Officer (2007)	Erskine Park Employment Area, between Lenore Lane & Ropes Creek	Proposed industrial development: Test excavations	310 flaked stone artefacts recovered from 112 test pits, the majority of which were found on the basal midslopes & crest of spurline above Ropes Creek, suggesting repeated ephemeral habitation of transitory camp sites on the spurline. Artefacts made of silcrete (70%), tuff (21%), quartz (4%), chert (2.5%), volcanic (1.5%) & quartzite (0.6%). Lithic assemblage is comparable with that of the CSR lands (see below)	2.6km west
JMCHM (2009)	Wallgrove Road, Minchinbury	Archaeological survey: Proposed industrial rezoning	Flaked silcrete, quartz & chert artefacts identified as 1 artefact scatter (2 artefacts) & 5 isolated finds. 2 PADs also identified & recommended for salvage excavation.	c.2.7km north
Haglund (2000)	Between Belmore & Doonside Roads & Great Western Highway, Doonside	Proposed development of former overseas tele-communications site: Surveys	23 sites identified (11 previously recorded & 12 new), comprising flaked and heat-shattered silcrete, chert, quartz & basalt artefacts (including bipolar & backed artefacts & an elouera adze flake), in addition to areas of PAD. Monitoring, collection & test excavation recommended according to significance &	3.5km north

Navin Officer (2005a)	Test Areas 3-11 (sites #45-5-2512-16), CSR Lands, Lenore Lane, Erskine Park	Proposed industrial development: Test excavations	proposed impact 236 flaked stone artefacts recovered from 218 test pits, including bipolar artefacts, microblades and Bondi points. Artefacts made of silcrete (69%), tuff (9%), quartz (6%), quartzite (5.5%), rhyolitic tuff (4%), chert (2%) & chalcedony (1%). Sites assessed as indicative of low density occupation from transient camps/activities peripheral to a base camp/main occupation area	3.5km west
TEC (2007a)	Reen Road, Eastern Creek	Test excavations of PB1 (45-5-3227)	118 flaked stone artefacts (63% silcrete, 34% quartz & 3% indurated mudstone) recovered from 98m ² on the top of a rise. Site assessed as low-medium density background scatter, with the hilltop as a valued focal point in the landscape	3.8km north east
TEC (2007b)	Lenore Lane, Erskine Park	Proposed Erskine Central Industrial Park: Salvage excavation of EC1 (37-2-1851)	15 flaked stone artefacts originally recorded during surface investigations. 1014 flaked stone artefacts (88% silcrete, 1% quartz, 1% indurated mudstone & 1% silicified tuff) recovered from 120m ² of excavation, with greatest artefact density on the predominant hilltop (12.8/m ² on average), and a knoll below the hilltop (7.5/m ² on average). Site assessed as area used for temporary activities such as lithic maintenance; more domestic sites have been identified on Ropes, South, Eastern & Second Ponds Creeks	3.8km north west
Navin Officer (2005b)	Test Areas 1 & 2 (site #45-5-0450 & EPTA2), CSR Lands, Lenore Lane, Erskine Park	Proposed industrial development: Test excavations	34 flaked stone artefacts recovered from 21 test pits on elevated ground adjacent to upper reaches of minor tributary of South Creek, and 15 artefacts from 17 test pits on low slopes associated with ridgeline which has been largely quarried. Artefacts made of silcrete (55%), rhyolitic tuff (25%), chert (8%), chalcedony (6%) & quartz (2%). Sites assessed as indicative of low density occupation from transient camps/activities peripheral to a base camp/main occupation area	4.3km west
AHMS (2005a)	85 Bakers Lane, Kemps Creek	Proposed expansion of Emmaus Retirement Village: Survey	2 open campsites, 2 isolated finds & 2 PADs identified. Artefacts comprised flaked silcrete & indurated mudstone/chert. Test excavation of the PADs was recommended	4.3km south west
AHMS (2005b)	85 Bakers Lane, Kemps Creek	Proposed expansion of Emmaus Retirement Village: Test excavation	11 silcrete and tuff artefacts mechanically excavated from 18 1mx1m test pits. Assemblage assessed as background scatter	4.3km south west
JMCHM	Western Sydney	Proposed	50 stone artefact scatters, 1	c.5km north

(2006)	Parklands, north of Great Western Highway and west of Doonside Road	residential development: Archaeological assessment	isolated find, 1 scarred tree & five areas of PAD identified within 650ha. Of these, 25 sites and a portion of the PADs were to be impacted by the development, with the potential for conservation of c.73% of land with high archaeological potential.	east
JMCHM (2011)	Western Sydney Parklands, north of Great Western Highway and west of Doonside Road	Proposed residential development: Test and salvage excavations	Excavation of 123 1x1m pits within PAD on east bank of Eastern Creek, at junction of Eastern and Bungarribee Creeks. 5,535 artefacts, 1,083 other cultural lithics (heat shatter & indeterminate fragments of silicified tuff), & 11,751 pieces of silcrete gravels and heat shatters from a previously unrealised minor natural silcrete source on the Cumberland Plain were identified. Most artefacts were silcrete, followed by silicified tuff, with a small proportion of quartz and other raw material.	c.5km north east
Navin Officer (2005c)	Crown road reserve, CSR Lands, off Mamre Road, Erskine Park	Proposed access road for industrial development: Test excavations	172 flaked stone artefacts recovered from 24 test pits on low spurline crest, including microblades and Bondi points. Artefacts made of silcrete (73%), tuff (17%), quartz (2%), quartzite (2%), rhyolitic tuff (2%), chert (1%) & chalcedony (1%). Site assessed as indicative of low density occupation of low archaeological significance within a local context	5.3km west
