Capital Corporation
Suite 705/12 Century Circuit
BAULKHAM HILLS NSW 2153

Attention: Maria Passafaro

**RE: 6 AUSTRALIA AVENUE – STAGE 1A DEVELOPMENT
ELECTRICAL & TELECOMMUNICATIONS SITE INFRASTRUCTURE SERVICING**

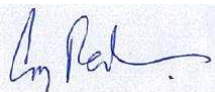

The electrical and telecommunications utilities servicing for the Stage 1A development at 6 Australia Avenue Sydney Olympic Park has been included within the relevant Authority applications (ie Ausgrid & Telstra) for the supply capacity of the Stage 1 works.

We include for your reference an email statement from Ausgrid acknowledging that the existing precinct supply capacity will be sufficient to cater for the Stage 1 & Stage 1A developments and that further upstream augmentation to the 11kV network may be required to facilitate the total load requirement for the Stage 2 development at 2 Herb Elliot Avenue.

Also we include for your reference the receipt of application from Telstra for the supply of telecommunications services for the Stage 1, 1A & 2 developments.

Should you have any questions on this matter please do not hesitate to contact the undersigned at this office.

Yours faithfully
HARON ROBSON

Greg Reardon
Associate Director

Details:

Hi Jim,

Ausgrid's preliminary assessment of the proposed allotment has found that the existing Ausgrid network is capable of supplying the development for Stage 1 and 1A. However, further upstream augmentation may be required to facilitate the total load requirement for Stage 2.

Should you require any further information please contact me on the phone number or email address detailed below.

Subject: Axis Development - 2 Australia Avenue, Sydney Olympic Park

Hi Frank,

Thanks for your time on the phone.

I spoke to my supervisor (Greg Reardon) in regards to our conversation. We understand that there may be a possibility that the existing electrical infrastructure within the area will need to be upgraded in order for the works to proceed.

We just need a statement or an email from Ausgrid stating that the existing electrical infrastructure within the area is capable of supplying the required load for Stage 1 and 1A and/or will need to be upgraded upstream to accommodate the entire development itself (Stages 1, 1A and Future Stage 2 works) Subject to further investigation.

As mentioned, we require this statement/email as per the Environmental Planning and Assessment Act - Director General's Requirements.

Note - Stage 2 works will be another 2-3 years prior to the completion of Stage 1 & 1A.

I will give you a call tomorrow regarding this.

Appreciate your time Frank.

Regards

JAN-MICHAEL CATARROJA | ELECTRICAL DESIGN ENGINEER

Subject: Application for Reticulation Confirmation - Axis Development - Stage 1, 1A & 2 Stage 1, 1A & 2 - Sydney Olympic Park 2127

Dear Greg Reardon,

Thank you for submitting your Application for Reticulation (AFR) via the Telstra Smart Community Web Portal.

You will be aware that there have been recent announcements relating to changes to the Government policies on the provision of infrastructure in new developments. These can be viewed at

http://www.dbcde.gov.au/broadband/national_broadband_network/policy_statements

These changes to policy will have a significant impact on the way infrastructure is provided in your proposed development.

Telstra will work with Government, NBN Co and stakeholders on the implementation of the new policy on Greenfields estates.

Our key concerns during this period are to make sure services to developers and end customers are maintained and meet our commercial and legal obligations.

Until alternative arrangements are put in place, developers are requested to remain in contact with Telstra through the normal channels. This will enable us to make sure arrangements are made to provide infrastructure under the new policy.

In relation to current commercial negotiations for infrastructure, we anticipate further discussions with developers to make appropriate arrangements taking into account the new policy and the particular circumstances and timing of the development.

We note that there are no changes to Telstra's policy which was announced in March as a result of the Federal Governments proposed Greenfields legislation. Telstra will no longer be deploying copper infrastructure as standard practice.

Telstra will contact you once there is more information available.

The details you have provided are attached for your future reference.

The details of the files attached with this development are as follows:

File Name , File Type , File Size

1: GA Set Stages 1 and 2.pdf,Adobe PDF files,4.8Mb

You can access your development at:
