

This architectural site plan illustrates the 'New Village' in Beijing, a dense urban development. The plan features a central green space with a circular area containing a stylized logo. Surrounding this central area are various building footprints, including a large, prominent building complex on the right side. The layout is characterized by a high density of structures and a complex network of streets and pathways. The plan is presented in a black and white, high-contrast style, emphasizing the geometric forms and spatial organization of the development.

This is a black and white architectural site plan of a residential development in Beijing. The plan shows a dense arrangement of buildings, represented by various geometric shapes like rectangles, squares, and polygons. A central courtyard or open space is visible, containing a small, dark, irregularly shaped building. The buildings are arranged in a way that suggests a traditional Chinese courtyard layout, with buildings surrounding a central open area. The plan also shows some internal roads and pathways connecting the different building groups. The overall layout is compact and organized, reflecting the 'New Village' concept of modern housing with traditional spatial characteristics.

This aerial view of the site plan shows the proposed development's footprint in black. The building is a large, rectangular structure with a central section labeled '888'. The site is bounded by a street to the north and a street to the east. The surrounding area is filled with other buildings, shown in white and black, indicating a dense urban environment. The plan also shows parking areas and other site details.
