Director General's Environmental Assessment Requirements

Schedule 2 of the Environmental Planning and Assessment Regulation 2000

Application Number	SSD 5708
Development	North Eveleigh Affordable Housing Project
Location	Part Lot 4 862514, Wilson Street, North Eveleigh
Applicant	Sydney Metropolitan Development Authority
Date of Issue	21/12/2012
General Requirements	The Environmental Impact Statement (EIS) must meet the minimum requirements in Schedule 2 the <i>Environmental Planning and Assessment Regulation 2000</i> , specifically: • form specifications in clause 6; and • content specifications in clause 7.
Key issues	 The EIS must address the following specific matters: 1. Environmental Planning Instruments (EPIs) Address the relevant statutory provisions applying to the site contained in all relevant EPIs, including: Objects of the EP&A Act 1979; SEPP (Major Projects) 2005; State Environmental Planning Policy (Affordable Rental Housing) 2009; SEPP (Building Sustainability Index: BASIX) 2004; SEPP 55 – Remediation of Contaminated Sites; SEPP 65 – Design Quality of Residential Flat Development; SEPP (Infrastructure) 2007; and SREP 26 – City West. SEPP 32 – Urban Consolidation Permissibility Detail the nature and extent of any prohibitions that apply to the development. Demonstrate permissibility. Development Standards Identify the Development Standards applying to the site. Justify any
	Development Standards not being met. Contamination Demonstrate that the site is suitable for the proposed use in accordance with SEPP 55. → Relevant Policies and Guidelines: • Managing Land Contamination: Planning Guidelines - SEPP 55 Remediation of Land (DUAP)
	2. Policies, Guidelines and Planning Agreements Address the relevant planning provisions, goals and strategic planning objectives in the following:

- Metropolitan Plan for Sydney 2036;
- Draft Sydney Subregional Strategy;
- Redfern-Waterloo Built Environment Plan (Stage One);
- Provision of public infrastructure having regard to the Redfern Waterloo Authority Contributions Plan;
- Provision of affordable housing in accordance with Redfern Waterloo Affordable Housing Contributions Plan;
- NSW Planning Guidelines for Walking and Cycling;
- Development Near Rail Corridors and Busy Roads Interim guidelines; and
- NSW Planning Guidelines for Walking and Cycling
- Sustainable Sydney
- Sydney DCP 2012
- Crime Prevention through Environmental Design Guidelines (CPTED)

Detail how the development promotes or is consistent with these provisions and strategic objectives.

3. Built Form and Urban Design

- Address the height, bulk and scale of the proposed development within the context of the locality.
- Design quality, with specific consideration of the overall site layout, axis, vistas and connectivity, open spaces and edges, primary elements, gateways, façade, rooftop, mechanical plant, massing, setbacks, building articulation, materials, choice of colours.
- → Relevant Policies and Guidelines:
- Crime Prevention through Environmental Design Guidelines(CPTED)

4. Ecologically Sustainable Development (ESD)

Detail how ESD principles (as defined in clause 7(4) of Schedule 2 of the *Environmental Planning and Assessment Regulation* 2000) will be incorporated in the design, construction and ongoing operation phases of the development.

5. Amenity

Demonstrate how the proposals will achieve a high level of environmental amenity. Detail solar access, acoustic impacts, visual privacy, servicing requirements (including but not limited to, waste management, loading zones, mechanical plant), view loss, overshadowing and wind impacts.

6. Noise

Identify the main noise generating sources and activities at all stages of construction, and any noise sources during operation. Outline measures to minimise and mitigate the potential noise impacts on surrounding occupiers of land.

- → Relevant Policies and Guidelines:
- NSW Industrial Noise Policy (EPA)
- Interim Construction Noise Guideline (DECC)

7. Transport and Accessibility (Construction and Operation)

- Detail access arrangements at all stages of construction.
- Demonstrate the provision of sufficient on-site car parking.
- Provide an assessment of the implications of development on noncar travel modes (including public transport, walking and cycling).
- → Relevant Policies and Guidelines:
- Guide to Traffic Generating Developments (RTA).

8. Sediment, Erosion and Dust controls (Construction and Excavation)

Detail measures and procedures to minimise and manage the generation and off-site transmission of sediment, dust and fine particles.

- → Relevant Policies and Guidelines:
- Managing Urban Stormwater Soils & Construction Volume 1 2004 (Landcom)
- Approved Methods for the Modelling and Assessment of Air Pollutants in NSW (EPA)

9. Rail Impacts

Address noise and vibration impacts from adjacent rail activities, including mitigation and monitoring measures where appropriate, consistent with guidance published by Rail Corp including Interim Guidelines for Applicants – Consideration of Rail Noise and Vibration in the Planning Process and Interim Guidelines for Councils – Consideration of Rail Noise and Vibration in the Planning Process.

10. Drainage and Flooding

Address drainage/flooding issues associated with development/site including: stormwater, drainage infrastructure and incorporation of Water Sensitivity Urban Design Measures.

11. Original Concept Plan

Demonstrate that the proposal is consistent with the Concept Plan Approval MP08_0015. Future assessment requirements should also be addressed.

Plans and Documents

The EIS must include all relevant plans, architectural drawings, diagrams and relevant documentation required under Schedule 1 of the *Environmental Planning and Assessment Regulation 2000*. Provide these as part of the EIS rather than as separate documents.

In addition, the EIS must include the following:

- Shadow Diagrams
- 3D Model
- Photomontages
- Elevations and Sections Drawings
- Heritage Impact Statement
- An existing Site Survey Plan
- Storm water/Drainage concept Plan
- Construction Management Plan
- Traffic Transport Plan
- Integrated Water Management Plan
- Infrastructure Management Plan

	Waste Management PlanAir Quality Impact Assessment
Consultation	During the preparation of the EIS, you must consult with the relevant local, State or Commonwealth Government authorities, service providers, community groups and affected landowners.
	In particular you must consult with:
	The EIS must describe the consultation process and the issues raised, and identify where the design of the development has been amended in response to these issues. Where amendments have not been made to address an issue, a short explanation should be provided
Further consultation after 2 years	If you do not lodge an EIS for the development within 2 years of the issue date of these DGRs, you must consult with the Director General in relation to the requirements for lodgement.
References	The assessment of the key issues listed above must take into account relevant guidelines, policies, and plans as identified. While not exhaustive, the following attachment contains a list of some of the guidelines, policies, and plans that may be relevant to the environmental assessment of this project.
