Attention Mr. Sam Galvin

Dear Sam

**Re: Stray DC current assessment of Proposed City West Housing Development
on the North Eveleigh Railway Site**

I refer to your request for a stray current assessment as required by RailCorp for Building D4 of the proposed City West Housing Development on the North Eveleigh Railway Site. The installation will not be subject to hazards associated with stray DC current due to mitigating factors included in attached report NPC-REP-NERS-R-0001-A.

We trust you find this information satisfactory. However, should you have any queries please do not hesitate to contact me.

Yours faithfully,
Neil Cowell

Director
