11. [Noise from mechanical plant installed at the Site shall achieve the NSW INP criteria at residential locations at night.](#)

### **Air**

#### *Construction Traffic*

12. During construction:

- a) all trucks entering or leaving the site with loads have their loads covered;
- b) trucks associated with the project do not track dirt onto the public road network; and
- c) the public roads used by these trucks are kept clean.

#### *Dust Management*

13. During the construction phase of the project, all reasonable and feasible measures to minimise the dust generated by the project.

14. [As outlined in The Air Quality Impact Assessment report \(SLR, 16 April 2013\) the following measures will be considered where practical:](#)

- [the use of renewable energy technologies, such as wind, solar or biomass for externally-sourced electricity;](#)
- [close regulation of the daily operation of lighting; and](#)
- [solar-powered lighting about site.](#)

### **Hazard and Risk**

#### *Pre-Occupation Certificate*

15. Prior to the occupation of the facility (associated with storage of dangerous goods), Goodman will prepare a Fire Safety Study that shall address the relevant aspects of the Department of Planning and Infrastructure's *Hazardous Industry Planning Advisory Paper No. 2 – Fire Safety Study Guidelines*. The Fire Safety Study shall be kept on site and presented to the Director-General on request.

#### *Pre-commissioning*

16. Prior to the commencement of commissioning of the project, Goodman ensure the plans and systems set out under subsections (a) to (b) below will be developed and implemented:

- a) **Emergency Plan**  
A comprehensive Emergency Plan and detailed emergency procedures will be prepared for the proposed land use. This plan will include detailed procedures for the safety of all people outside of the development who may be at risk from the development. The Plan shall be in accordance with the Department's *Hazardous Industry Planning Advisory Paper No. 1 – Industry Emergency Planning Guidelines*.
- b) **Safety Management System**  
A document setting out a comprehensive Safety Management System, covering all onsite operations and activities involving hazardous materials. The document shall clearly specify all safety related procedures, responsibilities and policies, along with details of mechanisms for ensuring adherence to the procedures. Records will be kept onsite and will be available for inspection by the Council upon request. The Safety Management System will be developed in accordance with the Department's *Hazardous Industry Planning Advisory Paper No. 9 – Safety Management*.

### *Ongoing*

17. Goodman will ensure the following is undertaken on an ongoing basis as part of the proposed development as outlined in subsections (a) and (b) below.

a) Incident Report

Within 24 hours of any incident or potential incident with actual or potential significant offsite impacts on people of the biophysical environment, a report will be supplied to the Department outlining the basic facts. A further detailed report will be prepared and submitted following investigations of the causes and identification of necessary additional preventive measures. That report will be submitted to the Department no later than 14 days after the incident or potential incident.

b) Hazard Audit

Twelve months after the commencement of operations of the proposed development or within such further period as the Department may agree, Goodman will carry out a comprehensive Hazard Audit of the proposed development and within one month of the audit submit a report to the Department.

The audit will be carried out at Goodman's expense by a duly qualified independent person or team approved by the Department prior to commencement of the audit. Further audits will be carried out every three years or as determined by the Department and a report of each audit will, within one month of the audit, be submitted to the Department. Hazard Audits will be carried out in accordance with the Department's *Hazardous Industry Planning Advisory Paper No. 5 – Hazard Audit Guidelines*.

The audit will include a review of the site Safety Management System and a review of all entries made in the incident register since the previous audit. The audit report will be accompanied by a program for the implementation of all recommendations made in the audit report. If Goodman intends to defer the implementation of a recommendation, justification will be included.

### **Waste Management**

18. Goodman will ensure that all waste generated on site during construction and operation is classified in accordance with the Office of Environmental and Heritage's *Waste Classification Guidelines: Part 1 Classifying Waste* and disposed of to a facility that may lawfully accept the waste.

### **Stormwater Management**

19. The isolation valves located in the stormwater system are to be clearly labelled.

20. A Maintenance/service plan is to be put in place to ensure that the stormwater isolation valves are maintained in a serviceable condition.

21. All external stormwater drains are to be clearly identified as stormwater drains.

22. Spill kits are to be located and maintained adjacent to external trafficable areas of the premises.

23. The breezeway is to be fully isolated from the stormwater system at all times.

### **TransGrid Easement**

24. Compliance with TransGrid's requirements, including storage of Dangerous Goods not permitted within the TransGrid Easement shall be undertaken at all times.
