Dear Team,

Please find attached the RMS input to the DGRs issued yesterday. Nothing terribly onerous; however, our analysis has been generally based on peak hour traffic flows, so we will need to make some assumptions as to daily traffic flows.

We will revise our draft report on the basis of these comments and await the DGRs from DPI.

Regards,

Piran Trethewey
associate engineer

Attention: Emma Barnet

REQUEST FOR THE DIRECTOR GENERAL'S REQUIREMENTS FOR EXPANSION OF EXISTING MAINFRIIGHT FACILITY (SSD 5746)

Dear Ms. Barnet,

I refer to your letter of 14 December 2012 (SSD 5746) requesting Roads and Maritime Services (RMS) to provide details of key issues and assessment requirements regarding the proposed expansion of existing mainfreight facility under the Environmental Planning and Assessment Act 1979.

RMS would like the following issues to be included in the transport and traffic impact assessment of the proposed development:

1. Daily and peak traffic movements likely to be generated by the proposed development including the impact on nearby intersections and the need / associated funding for upgrading or road improvement works (if required).
2. Details of the proposed accesses and the parking provisions associated with the proposed development including compliance with the requirements of the relevant Australian Standards (ie: turn paths, sight distance requirements, aisle widths, etc).
3. Proposed number of car parking spaces and compliance with the appropriate parking codes.
4. Details of service vehicle movements (including vehicle type and likely arrival and departure times).
5. The hazardous materials shall be transported using the designated dangerous goods routes. In this regard, a travel plan or map should be provided to DP&I which illustrates the routes for transportation of the dangerous goods to the subject site.

Good Morning James,

Further to our telephone conversation and with regard to Point 5. of your letter of 30/01/13, which I copy below:

5. The hazardous materials shall be transported using the designated dangerous goods routes. In this regard, a travel plan or map should be provided to DP&I which illustrates the routes for transportation of the dangerous goods to the subject site.

As discussed, it would be appreciated if you could provide us with information for the designated dangerous routes referred to or where we could obtain this information.

Should you have any queries, please do not hesitate to contact me.

Regards,

Piran Trethewey
associate engineer
