Cherrida Hardaker, of stop csg illawarra, made the following submission on the project:

Camden Gas Project Stage 3 Northern Expansion

Objects to this project

What this company is proposing to do and what the government is allowing them to do is wrong on so many levels that it is incredibly difficult to know where to start. If our water, air and earth are not important to you then at least it should be important for your children and your children's children. Your conscience should be screaming at you "don't allow this to happen". No amount of money is worth it. Look at what is happening in Queensland and other parts of the world. Do the right thing for everyone! You can't drink, breathe or eat coal seam gas. There are so many people and they can't all be making up stories about how coal seam gas has wrecked their life. Please consider the future. We are relying on the elected politicians to take care of our country and our future. Do the right thing for everyone! I object to the proposal most strenuously as any sane person would.
