Dear Ms Seed,

We strongly oppose any increase in heavy truck movements on Brandy Hill Drive for the following reasons:

The trucks often wake us before daybreak and they pump out toxic diesel particles mixed with dust; it's a dangerous blend we breath every day.

The noise from these large truck and dogs thundering through our community is very aggravating. They have been tormenting the residents for years.

The latest thing I've seen is trucks speeding and tailgating each other and they will not even comply with a simple "**Limit Compression Braking**" sign. What chance has a self imposed 60 Kmph speed limit have? That is some "Joke" and will not work.

The suggestion these existing problems are "**perceived**" is **Absolute Nonsense**, this proves Hanson are out of touch with the community.

Any increase in truck movements on Brandy Hill Drive will degrade our lives further, cause major health problems and be a nightmare for many people.

Please do not allow any more heavy trucks on Brandy Hill Drive.

Yours Sincerely,

[REDACTED]
