Dear Ms Seed

**Re: Brandy Hill Expansion Project – SSD 5899 – Response to Submissions**

Thank you for the opportunity to provide advice on the above matter. This is a response from the NSW Department of Planning & Environment – Division of Resources & Geoscience (the Division).

The Division has no issues to raise with the Response to Submissions report.

The Division collects data on the quantity and value of construction materials produced annually throughout the State. Forms are sent to all operating quarries at the end of each financial year for this purpose. The statistical data thus collected is of great value to Government and industry in planning and resource management, particularly as a basis for analysing trends in production and for estimating future demand for particular commodities or in particular regions. In order to assist in the collection of construction material production data, the proponent should be required to provide annual production data for the subject site to the Division of Resource & Geoscience as a condition of any new or amended development consent.

Queries regarding the above information should be directed to the Division's Land Use team at [landuse.minerals@geoscience.nsw.gov.au](mailto:landuse.minerals@geoscience.nsw.gov.au).

Yours sincerely
