*** FOR TENDER ONLY _ NOT FOR CONSTRUCTION**

- * Do not scale from drawings
- * All work to be carried out in accordance to the Technical Specification
- * All discrepancies or conflict should be brought to the attention of the Project Landscape Architect
- * Larger scale drawings and written dimensions take preference
- * All dimensions in mm unless otherwise stated.
- * All tree dimensions and RLs in metres.
- * Use figured dimensions only.
- * Verify all dimensions on site before the commencement of any works.
- * Contractors shall locate and protect all services prior to construction.
- * All work shall be carried out in accordance with ASA, BCA and Local Government Regulations.
- * Structural Details shall be subject to Engineer's Specifications.
- * Drainage & Water Feature Details shall be subject to Hydraulic Engineer's Specifications.
- * All work shall be carried out in a professional manner by Qualified Tradesman according to Landscape Drawings and Engineer's Specifications.
- * Protect all adjoining property building, walls and paving. Damaged elements are to be replaced.
- * No responsibility will be taken by 360 degrees. for any variations in design, construction method, materials specified, and general specifications without permission from the Project Engineer or Landscape Architect.
- * Service location on plans are indicative only . 360 accepts no responsibility for the accuracy of service location. it is the responsibility of the contractor to determine service locations prior to the commencement of work. Any damages remains the responsibility of the contractor.
- * This Drawing is copyright to 360 degrees.

LANDSCAPE FINISHES NOTES

- * There are to be no sharp protusions or abrasive edges, obstrusive fittings and fixtures
- * Adjust extent of each type of soilworks and edging locally as required to accomodate final constructed locations of walls/signage and pavements
- * All Garden Bed Levels must be a minimum of 150mm Below Facade Flashing and Waterproof Membrane to Slab. Refer Typical Details
- * All Paving and Deck Levels must be setout and co-ordinated with Civil Stormwater Pits and Trench Drains prior to Construction
Refer Civil Engineers Documentation
- * Contractor to allow for access to Pits under Timber Deck
- * Adjust final location of soilworks and edging locally to suit service infrastructure including services, lines, pillars, valves and the like
- * Each area of turf extends to entire area boundary by adjacent walls, pavements, edges, and kerbs as shown
- * For all lighting locations to landscape areas refer to Electrical Engineers drawings. Final Location to be confirmed with Projects Landscape Architect
- * Finished surface levels and contours are indicative only. Refer to Civil Engineers drawings for final levels
- * For all structural details of walls, pavements, and the like refer to Civil Engineers documentation and specification

PLANTING NOTES

- * Adjust final location of planting locally to suit service infrastructure including service lines, pillars, valves and the like.
- * Adjust final variation of plant material as directed to suit final extent of each planting area.
- * All trees in general landscape grass seeded batter and turf areas are, unless otherwise noted to be provided with a mulch ring with spade finish edge.
- * Project Landscape Architect to inspect and approve all Plant material prior to delivery to site.
- * Project Landscape Architect to inspect and approve all Plant material setout prior to install.

2 Typical 'Balance Bubble' Detail to Pediatric Therapy Area
1:10

3 Sound Tube Detail
1:10

4 Typical Garden Bed Detail to carpark swale (inorganic Mulch)
1:20

5 Typical Ground Cover Planting
1:20

NOTE
1. Pit for shrub planting to be 2 x the width of the rootball and 2 x the depth of the rootball.
2. Refer to planting plans for planting numbers and densities.
3. Install fertiliser to rates as recommended by manufacturer.

6 Typical Shrub Planting
1:20

NOTE
1. Stake & tie all trees specified over 100L, refer to planting plan for pot sizes, refer to specification for required stake number.
2. Pit for tree planting to be 2 x the width of the rootball and 1.5 x the depth of the rootball.
3. Details of surrounding pavement may vary.
4. Install fertiliser to rates as recommended by manufacturer.
5. If the garden bed is higher on the kerb side, swap the placements of geotextile and strip drain.
6. Dewater garden area with 100mm diameter UPVC pipe class "SH". Connect to stormwater or kerb outlet as shown on plans.
General Tree planting notes:

Excavate a square hole twice the width and 300mm deeper than the rootball. Break up base of hole to a further depth of 100mm. Loosen compacted sides of the hole.

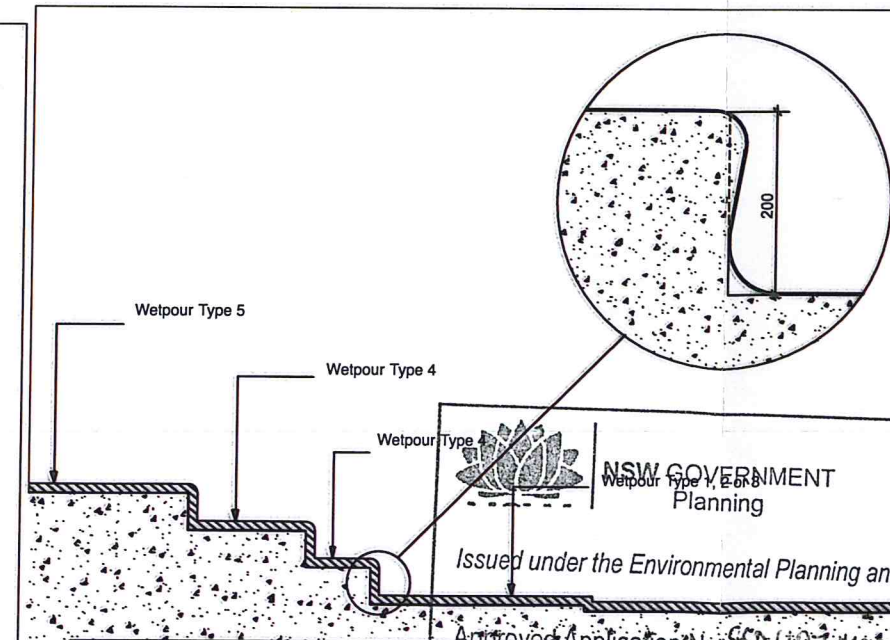

Where subsoil is dry, fill hole with water and let drain thoroughly prior to planting.

Staple ties in a figure eight pattern approximately 300mm from the top of stakes. Drive in stake as specified. Position plant so that the top soil level of the rootball is level with the finished surface level. Where possible, position the tree so that the branches do not rub against stakes or will in future conflict with buildings or overhead wires.

Tamp backfill lightly and form a temporary watering ring.

Water tree thoroughly to eliminate air pockets.

7 Typical Tree Planting
1:20

8 Soft Fall Steps
