Re Planning proposal SSD 6334

I have lived in the Southern Highlands for 32 years. I care about its natural beauty, tranquility and wildlife. I care about our aquifers, our water filtered through sandstone, a pure water source for generations to come.

I object to the proposed Sutton Forest Sand mine. I believe the EIS is insufficient to assess the true effects on water drawing from aquifer, effect of tree clearing on fragile wildlife and damage to quality of water flowing from Long Swamp to Warragamba. Sydney cannot risk pollution of its headwaters for access to sand for everexpanding development.

I object to private development, profit at the cost of our nation's resources

Sincerely
