

The background is a landscape photograph of a valley with rolling hills and a small settlement, overlaid with a semi-transparent blue filter. Several white geometric shapes, including squares and rectangles, are positioned across the upper half of the page. A large dark blue square is located in the lower right of the upper section, containing a white letter 'B'.

B

Summary of Information Required

1 SUMMARY OF INFORMATION REQUIRED

Table 1 provides a summary of the issues referred to by the Department of Planning and Environment and the proposed resolution of each issue by KEPCO Bylong Australia.

Table 1
Summary of Information Required by DPE

Issue Ref	Aspect	Information Required	Section of Supplementary Information Report
1.	Mine Plan and Final Landform	Description of the revised mine plan including conceptual mine progression, changes to coal resource extracted and production profile.	Section 2
2.		Updated figures identifying the revised mine plan including changes to ancillary infrastructure, such as haul road to the revised eastern open cut pit	Section 2, Figures 1 and 2
3.	Updated Figures required	Revised development layout	Figure 2
4.		Conceptual mine progression – open cut stages	Figures 4 to 7
5.		Final landform	Figures 8 and 9
6.		Land ownership with revised disturbance boundary	Figures 10 and 11
7.		Updated figure- Aboriginal Heritage impacts	Figure 18
8.		Updated figure- Historic Heritage items impacted	Figure 13
9.		Land available for agriculture with revised disturbance boundary overlay (see email request from the Department 22/2/18)	Figure 16
10.	Visual Scenic	Updated photomontages from Tarwyn Park property across the Growee Range, Tal Tal Mountain and Telstra Hill for the revised mine progression and final landform	Appendix K
11.	BSAL/ Agriculture	Revised area of impacts to BSAL, CIC and LSC class	Appendix I Sections 3.5 and 3.9.1 Figures 12 and 15
12.		Revised BSAL reinstatement in final landform	Section 3.5
13.		Updated soil inventory to confirm availability of soils for rehabilitation	Section 3.5.3

Issue Ref	Aspect	Information Required	Section of Supplementary Information Report
14.	Groundwater/ Surface Water	High level review confirming groundwater/ surface water impacts would be equal to or less than that predicted in the EIS documentation provided to date	Sections 3.3 and 3.4 Appendices G and H
15.		Water balance review - capacity to manage rejects and water storage in the revised final void configuration	Section 3.4.3 Appendices G and H
16.	Heritage	Description of avoidance and minimisation of impacts on heritage items due to mine plan revision	Appendix J, Sections 3.6 and 3.7
17.		Updated mitigation measures, including updated table of impact/ management measures for heritage items, where direct impacts are now avoided, including Aboriginal and Historic Heritage items	Sections 3.6, 3.7 and 3.9.3 Figures 13 and 18
18.	Blasting	Review of impacts of blasting and proposed mitigation measures on heritage items, including items where direct impacts will now be avoided (Aboriginal and Historic Heritage) and where blast impacts now need to be considered	Appendix E, Sections 3.1 and 3.6.3
19.	Economic	Revised benefit cost analysis-net benefits to NSW including revised royalties	Section 3.8 and Appendix L
20.		High level review of the CGE/Input-Output analysis to confirm general findings, including changes to workforce peaks	Section 3.8 and Appendix L
21.	Air and Noise	High level review confirming impacts would be equal to or less than that predicted in the EIS documentation provided to date	Sections 3.1 and 3.2 Appendices E and F
22.	Transport	High level review of changes to transport on road network confirming impacts would be equal to or less than that predicted in the EIS documentation provided to date	Section 3.9.5
