Development consent
Section 89E of the Environmental Planning and Assessment Act 1979

We grant consent to the development application referred to in Schedule 1, subject to the conditions in Schedule 2.

These conditions are required to:
- prevent, minimise, and/or offset adverse environmental impacts including economic and social impacts;
- set standards and performance measures for acceptable environmental performance;
- require regular monitoring and reporting; and
- provide for the ongoing environmental management of the development.

Member of the Commission      Member of the Commission     Member of the Commission

Sydney                     2 March 2016

SCHEDULE 1

Application No.: SSD 6376
Applicant: Frasers Broadway Pty Ltd
Consent Authority: Minister for Planning
Land: Block 11 – Central Park (former Carlton United Brewers Site) (Lot 5 DP1142053 and part Lot 1 DP76719)
Development: Development of the Block 11 mixed use development including:
- construction of a 10 to 13 storey building (maximum height RL 64.17) over two basement levels;
- Total GFA of 25,220m² comprising:
  - 292 residential apartments;
  - 758m² GFA retail; and
  - 655m² childcare facility (90 child capacity);
- retention, refurbishment and alteration of the Castle Connell Hotel (external only);
- 174 on-site car parking spaces (including 10 car share spaces) and two service vehicle spaces
- six regular and three short term on-street car parking spaces;
- 448 bicycle parking spaces;
- 3,300m² of open space;
- public domain works and landscaping;
• subdivision and strata subdivision; and
• signage zones.

[note: the above is the development as approved, not as lodged]
DEFINITIONS

Advisory Notes
Advisory information relating to the consent but do not form a part of this consent.

Applicant
Consent holder or person with the benefit of the development consent.

Application
The development application and the accompanying drawings plans and documentation described in Condition A2.

BCA
Building Code of Australia

Construction
The demolition of buildings or works, the carrying out of works, including bulk earthworks, and erection of buildings and other infrastructure covered by this consent.

Council
City of Sydney Council

Certifying Authority
Professionals that are accredited by the Building Professionals Board to issue construction, occupation, subdivision, strata, compliance and complying development certificates under the EP&A Act, Strata Schemes (Freehold Development) Act 1973 and Strata Schemes (Leasehold Development) Act 1986 or in the case of Crown development, a person qualified to conduct a Certification of Crown Building works.

Day time
The period from 7am to 6pm on Monday to Saturday, and 8am to 6pm on Sundays and Public Holidays.

Department
Department of Planning and Environment

EEC
Endangered ecological community

Evening
The period from 6pm to 10pm

EIS
Environmental Impact Statement

EPA
Environment Protection Authority

EP&A Act
Environmental Planning and Assessment Act 1979

EP&A Regulation
Environmental Planning and Assessment Regulation 2000

Feasible
Feasible relates to engineering considerations and what is practical to build

Minister
Minister for Planning, or nominee

Night time
The period from 10pm to 7am on Monday to Saturday, and 10pm to 8am on Sundays and Public Holidays.

OEH
Office of the Environment and Heritage

PCA
Principal Certifying Authority

R	s
Response to Submissions

Reasonable
Reasonable relates to the application of judgement in arriving at a decision, taking into account: mitigation benefits, cost of mitigation versus benefits provided, community views and the nature and extent of potential improvements.

RMS
Roads and Maritime Services

Secretary
Secretary, Department of Planning and Environment

Secretary’s approval, agreement or satisfaction
A written approval from the Secretary (or nominee/delegate)

Sensitive receiver
Residence, education institution (e.g. school, university, TAFE college), health care facility (e.g. nursing home, hospital), religious facility (e.g. church) and children’s day care facility.

Site
Land referred to in Schedule 1

Zone of Influence
The horizontal distance from the edge of the basement excavation to twice the maximum basement excavation depth.

NSW Government
Department of Planning and Environment
SCHEDULE 2

PART A ADMINISTRATIVE CONDITIONS

Terms of Consent

A1 Except as amended by the conditions of this consent, development consent is granted only to carrying out the development described in Schedule 1 and condition A2.

A2 The Applicant shall carry out the project generally in accordance with the:

a) State Significant Development Application SSD 6376;

b) Environmental Impact Statement prepared by JBA Urban Planning Consultants dated December 2014;

c) Response to Submissions report prepared by JBA Urban Planning Consultants dated July 2015;

d) The conditions of this consent; and

e) The following drawings, except for:

i) any modifications which are Exempt or Complying Development; and

ii) otherwise provided by the conditions of this consent.

A3 If there is any inconsistency between the plans and documentation referred to above, the most recent document shall prevail to the extent of the inconsistency. However, conditions of this approval prevail to the extent of any inconsistency. Where there is an inconsistency between approved elevations and plans, the elevations prevail.

A4 The Applicant shall comply with any reasonable requirement/s of the Secretary arising from the Department’s assessment of:
a) any strategies, plans, programs, reviews, audits, reports or correspondence that are submitted in accordance with this consent; and
b) the implementation of any actions or measures contained in these documents.

Limits on Consent
A5 This consent will lapse five years from the date of consent unless the works associated with the application have physically commenced.
A6 This consent does not approve:
- retail fit out; or
- childcare centre fit out; or
- signage.
Separate approval/s for the fitout of the building and signage must be obtained for this development/use, if required by the EP&A Act.

Obligation to Minimise Harm to the Environment
A7 In addition to meeting the specific performance criteria established under this consent, the Applicant shall implement all reasonable and feasible measures to prevent and/or minimise any harm to the environment that may result from the construction or operation of the development.

Prescribed Conditions
A8 The Applicant shall comply with all relevant prescribed conditions of development consent under Part 6, Division 8A of the Regulation.

Long Service Levy
A9 A Long Service Levy is required to be paid. For further information please contact the Long Service Payments Corporation on their Helpline 13 1441.

Legal Notices
A10 Any advice or notice to the consent authority shall be served on the Secretary.
PART B – PRIOR TO ISSUE OF CONSTRUCTION CERTIFICATE

No Works Prior to Construction Certificate

B1 Work must not commence until a relevant Construction Certificate has been issued.

Compliance with the Building Code of Australia (BCA)

B2 Details should be provided to the satisfaction of the PCA, with the application for the relevant Construction Certificate, which demonstrate that the proposal complies with the prescribed conditions of consent under Clause 98 of the Regulation in relation to the requirements of the Building Code of Australia (BCA).

Design Verification Statement – Residential Flat Buildings

B3 Prior to the issue of a Construction Certificate for above ground works the Applicant shall submit to the PCA a Design Verification Statement from a qualified designer, verifying that the plans and specifications achieve or improve the design quality of the development, having regard to the design quality principles set out in Part 2 of State Environmental Planning Policy No. 65 – Design Quality of Residential Flat Development.

Hybrid-Cross Ventilation

B4 Prior to the issue of the relevant Construction Certificate the Applicant shall submit plans to the PCA confirming that at least 70 apartments that do not achieve natural cross ventilation will be afforded ‘hybrid cross ventilation’ via a system of fire isolated and acoustically treated ducting and assisted ventilation risers.

Crime Prevention through Environmental Design (CPTED)

B5 Prior to the issue of the relevant Construction Certificate, amended plans shall be submitted for the Secretary’s approval showing method(s) / treatment(s) to prevent the ground floor level corner located to the rear of the Castle Connell Hotel and fronting Wellington Street being a blind corner and being able to be used as a place of concealment or for other anti-social activities.

B6 To minimise the opportunity for crime in accordance with CPTED principles, the recommendations provided in the CPTED Report prepared by Elton Consulting, dated 28 October 2013 (including any amendment resulting from condition B5 above) shall be demonstrated on the architectural plans prior to the issue of the relevant Construction Certificate.

Wind

B7 Prior to the issue of any Construction Certificate, an updated wind assessment shall be submitted for the Secretary’s approval. The wind assessment shall demonstrate what additional methods/treatments will be included so as to reduce wind impacts to ensure that the area outside the retail units fronting the O’Connor Street park would be comfortable for pedestrian sitting, and that the O’Connor Street park is comfortable for pedestrian sitting.

B8 Prior to the issue of any Construction Certificate details are to be provided and approved by the Secretary that demonstrate the measures that have been incorporated within the design in order to reduce the impacts of wind such as;
   a) Additional large mature trees along O’Connor and Kensington Street;
   b) External permanent or temporary fins perpendicular to the façade;
   c) Planter boxes parallel to the façade; and
d) Additional trees within park areas.

B9 Prior to the issue of **any** Construction Certificate, an updated wind assessment shall be submitted for the Secretary’s approval. The wind assessment shall demonstrate what additional methods/treatments will be included to reduce wind impacts to ensure that the outdoor play area for the child care facility is classified as comfortable for pedestrian sitting.

**Alignment Levels and Public Domain Plan**

B10 Prior to the issue of a Construction Certificate for above ground works alignment levels for the building and site frontages must be submitted to Council for approval and:

a) shall be prepared by a Registered Surveyor in accordance with Council’s Public Domain Manual;

b) the alignment levels, as approved by Council, are then to be incorporated into the plans submitted with the application for a Construction Certificate; and

c) the alignment levels application must be made prior to or concurrently with the submission of the Public Domain Plan (condition B9).

B11 Prior to the issue of the relevant Construction Certificate for above ground works a Public Domain Plan is required to be submitted for Council’s approval. The Plan shall:

a) comply with Council’s Public Domain Manual, Sydney Streets Design Code and Sydney Technical Specification; and

b) be consistent with the submission/approval of the footpath alignment levels application (condition B8).

B12 Drainage and service pit lids throughout the public domain shall be heelguard and bicycle safe, finish flush with the adjacent pavement to avoid trip hazards and be clear of obstructions for easy opening and cleaning. Pit lids shall be in accordance with the *City of Sydney’s Sydney Streets Design Code* and *Sydney Streets Technical Specification*. The details shall be incorporated into the plans submitted with the application for a Construction Certificate.

**Public Domain Damage Bank Guarantee**

B13 The following Public Domain Bank Guarantees must be lodged in accordance with the Council’s adopted Schedule of Fees and Charges:

a) a Public Domain Damage Deposit (calculated on the basis of four lineal metres of asphalt site frontage); and

b) a Public Domain Works Deposit (Council’s Public Domain section must be contacted to determine the guarantee amount).

The Public Domain Bank Guarantees must be submitted as an unconditional bank guarantees in favour of Council.

The guarantees must be lodged with Council prior to issue of a Construction Certificate.

The Bank Guarantees will be retained in full until the final Occupation Certificate has been issued and the relevant works (i.e any rectification works to the Public Domain required under a) or completion of Public Domain work required under b) above) are completed to Council’s satisfaction. On satisfying the above requirements 90% of the total securities will be released, with the remaining 10% to be retained for the duration of the 12 months Defect Liability Period.
Public Domain Works – Hold Points and Handover

B14 Prior to an above ground Construction Certificate being issued for a new building work (excluding a Construction Certificate for structural works), excluding approved preparatory, demolition and shoring work, a set of hold points for approved public domain and civil construction work is to be determined with and approved by the City’s Public Domain section in accordance with the City’s Public Domain Manual.

Completion and handover of the constructed public domain works is to be undertaken in accordance with the City’s Public Domain Manual, including requirements for as-built documentation, certification and defects liability period.

Paving Materials and Tactile Ground Surface Indicators and Handrails

B15 The surface of any material used or proposed to be used for the paving of colonnades, thoroughfares, plazas, arcades and the like which are used by the public must comply with AS/NZS 4586:2004 (including amendments) ‘Slip resistance classification of new pedestrian surface materials’.

B16 All tactile ground surface indicators, handrails and other elements required to provide access into the building / property must be located entirely within the private property boundary.

Green Roof and Communal Roof Terrace

B17 Prior to the issue of a Construction Certificate for above ground works, detailed landscape plans shall be submitted to, and approved by the PCA for the:
   a) level 10 green roof, demonstrating predominately native, green roof that is inaccessible other than for maintenance purposes; and
   b) level nine communal roof terrace, demonstrating a high quality open space area that meets the recreational needs of residents.

Pre-Construction Dilapidation Reports

B18 The Applicant is to engage a suitably qualified person to prepare a Pre-Construction Dilapidation Report detailing the current structural condition of all retained existing and adjoining buildings, infrastructure and roads (including the public domain site frontages, the footpath, kerb and gutter, driveway crossovers and laybacks, kerb ramps, road carriageway, street trees and plantings, parking restriction and traffic signs, and all other existing infrastructure along the street) within the ‘zone of influence’. Any entry into private land is subject to the consent of the owner(s) and any inspection of buildings on privately affected land shall include details of the whole building where only part of the building may fall within the ‘zone of influence’. The report shall be submitted to the satisfaction of the PCA prior to the issue of the Construction Certificate for below ground works. A copy of the report is to be forwarded to the Council and each of the affected property owners.

In the event that access for undertaking a Pre-Construction Dilapidation Report is denied by an adjoining owner, the Applicant must demonstrate, in writing, to the satisfaction of the Secretary that all reasonable steps have been taken to obtain access and advise the affected property owner of the reason for the report and that these steps have failed.

Any damage to the public way including trees, footpaths, kerbs, gutters, road carriageway and the like must be made safe and functional by the applicant. Damage must be fully rectified by the applicant in accordance with the Council’s standards prior to a Certificate of Completion being issued for Public Domain Works or before the final Occupation Certificate is issued for the development, whichever is the sooner.
Car Parking

B19 Car parking shall be provided as follows:
1. A total of 174 onsite car parking spaces, comprising:
   a) 157 residential car parking spaces (including 44 accessible spaces);
   b) 3 retail spaces;
   c) 4 childcare facility spaces;
   d) 10 car share spaces;
2. A total of 2 on-site service vehicle spaces;
3. A total of 3 on-street short term parking spaces for the childcare facility on Kensington Street; and
4. A total of 6 on-street car parking spaces on O’Connor Street.

B20 Plans demonstrating compliance with the following traffic and parking requirements shall be submitted to the satisfaction of the PCA prior the issue of the relevant Construction Certificate:
   a) all vehicles should enter and leave the subject site in a forward direction;
   b) all vehicles are to be wholly contained on site before being required to stop;
   c) parking associated with the proposal (including driveways, grades, turn paths, sight distance requirements, aisle widths, aisle lengths and parking bay dimensions) should be in accordance with AS 2890.1-2004, AS/NZS 2890.6:2009 and AS 2890.2-2002;
   d) appropriate pedestrian advisory signs are to be provided at the egress from parking areas;
   e) all works/regulatory signposting associated with the proposed developments shall be at no cost to the relevant roads authority; and
   f) the swept path of the longest vehicle (including garbage trucks) entering and exiting the Site, as well as manoeuvrability through the subject Site, shall be in accordance with AUSTROADS.

Loading and Unloading Areas

B21 All loading and unloading operations associated with servicing the site must be carried out within the confines of the site (or signposted loading spaces) at all times and must not obstruct other properties/units or the public way.

The service vehicle docks, car parking spaces and access driveways must be kept clear of goods at all times and must not be used for storage purposes, including garbage storage.

Bicycle Parking and Facilities

B22 Minimum of 448 on-site bicycle parking shall be provided as follows:
   a) 292 residential spaces (within basement storage cages for the apartments);
   b) 30 retail spaces;
   c) 2 childcare facility spaces;
   d) 102 residential visitor spaces; and
   e) 18 visitor spaces within the public domain.

B23 The layout, design and security of bicycle facilities either on-street or off-street must comply with the minimum requirements of Australian Standard AS 2890.3 – 1993 Parking Facilities Part 3: Bicycle Parking Facilities except that:
   a) all bicycle parking for occupants of residential buildings must be Class 1 or Class 2 bicycle facilities. Notwithstanding Class 2, bicycle lockers may also be designed to allow for stand up / hanging storage of bicycles;
   b) all bicycle parking for staff / employees of any land uses must be Class 2 bicycle facilities, and
   c) all bicycle parking for visitors of any land uses must be Class 3 bicycle rails.
B24 Storage, change room and shower facilities for the non-residential uses shall be provided and designed in accordance with the details provided within the application. Details shall be submitted to the satisfaction of the PCA prior to the issue of the relevant Construction Certificate for services and finishes works.

Reflectivity

B25 The building materials used on the facades of the buildings shall have a maximum normal specular reflectivity of visible light of 20 per cent and shall be designed so as not to result in glare that causes any discomfort or threatens the safety of pedestrians or drivers. A report/statement demonstrating compliance with these requirements is to be submitted to the satisfaction of the PCA prior to the issue of a Construction Certificate for above ground works.

Structural Details

B26 Prior to the issue of a relevant Construction Certificate, the Applicant shall submit to the satisfaction of the PCA structural drawings prepared and signed by a suitably qualified practising Structural Engineer that demonstrate compliance with:
   a) the relevant clauses of the BCA; and
   b) the development consent.

Mechanical Ventilation

B27 All mechanical ventilation systems shall be installed in accordance with the BCA and shall comply with Australian Standards, to ensure adequate levels of health and amenity to the occupants of the building and to ensure environment protection. Details shall be submitted to the satisfaction of the PCA prior to the issue of the relevant Construction Certificate for above ground works.

Storage and Handling of Waste

B28 The building plans and specifications accompanying the relevant Construction Certificate shall demonstrate that an appropriate area will be provided within the premises for the storage of garbage bins and recycling containers and all waste and recyclable material generated by this premises. Requirements of City of Sydney Policy for Waste Minimisation in New Developments 2005 shall be met to the satisfaction of the PCA.

Relevant Water Authority

B29 An application shall be made to the relevant Water Authority for a Compliance Certificate prior to the issue the relevant Construction Certificate.

Installation of Water Efficient Fixtures and Fittings (Non-Residential Uses)

B30 All toilets installed within the non-residential components of the development must be of water efficient dual-flush capacity with at least 4-star rating under the Water Efficiency and Labelling Scheme (WELS). The details must be submitted for the consent of the PCA, prior to the issue of the relevant Construction Certificate being issued for above ground works.

B31 All taps and shower heads installed within the non-residential components of the development must be water efficient with at least a 3-star rating under the Water Efficiency and Labelling Scheme (WELS), where available. The details must be submitted for the approval of the PCA, prior to issue of the relevant Construction Certificate for services and finishes works.
B32 New urinal suites, urinals and urinal flushing control mechanisms installed within the non-residential components of the development must demonstrate that products have been selected with at least a 4-star rating under the Water Efficiency and Labelling Scheme (WELS).

B33 Systems must include ‘smart controls’ to reduce unnecessary flushing. Continuous flushing systems are not approved. Details are to be submitted to and approved by the PCA, prior to the issue of the relevant Construction Certificate.

Internal Lighting System

B34 The proposed internal lighting system must be designed to provide for the efficient use of energy including the use of energy efficient light fittings, zoned lighting and controls and sensors to ensure automatic switch off during off-peak / non-working hours. Details of the internal lighting system must be submitted to and approved by the PCA prior to the relevant Construction Certificate being issued.

Survey Marks and Infrastructure

B35 All works in City streets must ensure the preservation of existing permanent survey marks (a brass bolt, or a lead plug holding a brass tack, covered by a cast iron box). At least forty-eight hours prior to the commencement of any works in the public way within 1 metre of a permanent survey mark contact must be made with the City’s Project Manager Survey / Design Services to arrange for the recovery of the mark.

Prior to the issue of a Construction Certificate, a survey plan, clearly showing the location of all permanent survey marks fronting the site and within 5 metres on each side of the frontages must be submitted to Council.

At least forty-eight hours prior to the commencement of any works in the public way within 1 metre of a permanent survey mark contact must be made with the City’s Senior Surveyor to arrange for the recovery of the mark.

A fee must be paid to the Council for the replacement of any permanent survey mark removed or damaged in accordance with the City’s Schedule of Fees and Charges (reinstatement of Survey Box).

B36 Prior to the commencement of any work on site, a statement prepared by a Surveyor registered under the Surveying Act 2002 must be submitted to Council verifying that a survey has been carried out in accordance with the Surveyor General’s Direction No. 11 – Reservation of Survey Infrastructure. Any Permanent Marks proposed to be or have been destroyed must be replaced, and a ‘Plan of Survey Information’ must be lodged at the Land and Property Management Authority.

Noise Mitigation Measures

B37 Details of noise mitigation measures recommended in the Noise Impact Assessment prepared by Acoustic Logic dated 6 November 2014 are to be detailed on the construction certificate drawings. Certification from an appropriately qualified acoustic engineer that the proposed measures will achieve compliance with the requirements of State Environmental Planning Policy (Infrastructure) 2007 and other guidelines applicable to the development is required to be submitted to the PCA prior to the issue of the relevant construction certificate.

B38 The proposed development should be designed such that road traffic noise from Broadway is mitigated by durable materials in order to satisfy the requirements for habitable rooms under Clause 102(3) of State Environmental Planning Policy (infrastructure) 2007.
Stormwater and Drainage Management

B39 Prior to a Construction Certificate being issued for any excavation, civil construction, drainage or building work (whichever is earlier), excluding approved preparatory or demolition work, details of the proposed stormwater disposal and drainage from the development including a system of stormwater detention in accordance with Council’s standard requirements and details of the provision and maintenance of overland flow paths must be submitted to and approved by Council. All approved details for the disposal of stormwater and drainage are to be implemented in the development.

B40 The requirements of the relevant Water Authority with regard to the detention of stormwater must be ascertained and complied with. Evidence of the approval of the relevant Water Authority to the detention must be submitted prior to a Construction Certificate being issued excluding any approved preparatory, demolition or excavation works.

B41 Any proposed connection to the Council's underground drainage system will require the owner to enter into a Deed of Agreement with the Council and obtain registration on Title of a Positive Covenant prior to Construction Certificate being issued for public domain works or above ground building works, whichever is earlier, and prior to the commencement of any work within the public way.

B42 An ‘Application for Approval of Stormwater Drainage Connections’ must be submitted to the Council with the appropriate fee at the time of lodgement of the proposal for connection of stormwater to the Council's drainage system.

B43 Prior to a Construction Certificate being issued for any excavation, civil construction, drainage or building work (whichever is earlier), but excluding approved preparatory or demolition work, a stormwater quality assessment must be undertaken and must be approved by Council. The stormwater quality assessment must:
   a) be prepared by a suitably qualified drainage engineer with experience in Water Sensitive Urban Design;
   b) use modelling from an industry-standard water quality model; and
   c) demonstrate what water sensitive urban design and other drainage measures will be used to achieve a reduction in the baseline annual pollutant load for:
      i) litter and vegetation larger than 5mm by 90%;
      ii) total suspended solids by 85%;
      iii) total phosphorous by 65%; and
      iv) total nitrogen by 45%.

Erosion and Sediment Control

B44 Soil erosion and sediment control measures shall be designed in accordance with the document Managing Urban Stormwater – Soils & Construction Volume 1 (2004) by Landcom, the Guidelines for Erosion and Sediment Control on Building Sites (City of Sydney. Details are to be included in the CEMP submitted to the satisfaction of the PCA prior to the issue of the Construction Certificate for below ground works.

Environmental Performance

B45 The Applicant is to provide documentation, prepared by a suitably qualified consultant, indicating that the development has been designed in accordance with the principles of a minimum 5 star Green Star rated building using the Multi-Unit Residential v1 as established by the Green Building Council of Australia. Evidence of the project’s consistency with Green Star principles shall be provided to the PCA prior to the relevant Construction Certificate.
B46 The development must be implemented and all BASIX commitments thereafter maintained in accordance with BASIX Certificate No. 537121M, and an updated certificate issued if amendments are made. The BASIX certificate must be submitted to the PCA with all commitments clearly shown on the relevant Construction Certificate plans.

Outdoor Lighting

B47 Prior to the issue of the relevant Construction Certificate, a Public Domain Lighting Plan for pedestrian and street lighting in the public domain shall be submitted for Council’s endorsement. The Plan shall be prepared in accordance with:

a) where relevant, AS/NZ1158.3: 1999 Pedestrian Area (Category P) Lighting and AS4282: 1997 Control of the Obtrusive Effects of Outdoor Lighting; and

Evidence of Council’s endorsement shall be submitted to the PCA prior to the issue of the relevant Construction Certificate.

Changes to Kerb Side Parking Restrictions

B48 A separate submission must be made the Sydney Traffic Operations Unit seeking the City’s approval for any changes to kerb side parking arrangements. There is no guarantee kerb side parking will be changed or that any change will remain in place for the duration of the development use.

The submission must include two plans that show the existing kerb side parking restriction signs and stems, and must include changes to all signs and stems from the kerb line of the nearest intersection.

All costs associated with the changes to sign posting will be at no cost to Council. All costs associated with signposting for any kerbside parking restrictions and traffic management measures associated with the development shall be borne by the developer.

Construction works to amend the kerb and create the bays cannot commence until an additional footway dedication, or similar, has been agreed with Council to ensure pedestrian access is maintained.

Access for People with Disabilities

B49 Prior to the issue of the relevant Construction Certificate, detailed design documentation demonstrating compliance with the recommendations of the Access Report, prepared by Accessibility Solutions dated 30 October 2014 shall be provided to the satisfaction of the PCA. The building must be designed and constructed to provide access and facilities for people with a disability in accordance with the Building Code of Australia. The PCA must ensure that evidence of compliance with this condition from an appropriately qualified person is provided and that the requirements are referenced on the Construction Certificate drawings.

Utility Services

B50 If required by the applicable energy supplier, the owner must dedicate to the applicable energy supplier, free of cost, an area of land within the development site.

B51 A separate DA must be submitted prior to the installation of any external telecommunication apparatus, or the like.

B52 To ensure that utility authorities are advised of the development, prior to the issue of a Construction Certificate a survey is to be carried out of all utility services within and
adjacent to the site including relevant information from utility authorities and excavation if necessary, to determine the position and level of services.

**Heritage**

B53 The Blackwattle Creek Ovoid Drain is to be adequately protected throughout all stages of the works and a Protection Methodology Plan (PMP) shall be submitted for Council's endorsement prior to the issue of a Construction Certificate. The PMP should include recommendations on:

a) vibration monitoring of the drain during the construction process; and

b) site induction of all construction personal as to the significance of the drain.

B54 Prior to an above ground Construction Certificate being issued, a Heritage Interpretation Plan (HIP) for Block 11 shall be submitted for Council's endorsement. The HIP must detail how information on the history and significance of Block 11, Blackwattle Creek Ovoid Drain and any archaeological relics pertaining to the area will be provided for the public and make recommendations regarding public accessibility, signage and lighting (Public art, details of the heritage design, the display of selected artefacts are some of the means that can be used).
PART C – PRIOR TO COMMENCEMENT OF WORKS

Certified Plans
C1. Plans certified in accordance with section 109C of the EP&A Act are to be submitted to the PCA and the Department prior to commencement of each stage of the works and shall include details as required by any of the following conditions.

Notice of Commencement of Works
C2. The PCA and Council shall be given written notice, at least 48 hours prior to the commencement of building works on the Site.

Demolition, Excavation and Construction Management
C3. Prior to the commencement of excavation work the following details must be submitted to and approved by the PCA:
   a) plans and elevations showing distances of the subject building from the location of adjoining and common/party walls, and (where applicable) the proposed method of façade retention;
   b) an Excavation Work Method Statement prepared by an appropriately qualified person; and
   c) a Waste Management Plan for the demolition and or excavation of the proposed development.

Such statements must, where applicable, be in compliance with the Occupational Health and Safety Act 2000 and Regulation; Council's Policy for Waste Minimisation in New Developments 2005, the Waste Avoidance and Resource Recovery Act 2001, and all other relevant acts and regulations and must include provisions for:
   a) a Materials Handling Statement for the removal of refuse from the site in accordance with the Waste Avoidance and Resource Recovery Act 2001;
   b) the name and address of the company/contractor undertaking demolition/excavation works;
   c) the name and address of the company/contractor undertaking off site remediation/disposal of excavated materials;
   d) the name and address of the transport contractor;
   e) the type and quantity of material to be removed from site;
   f) location and method of waste disposal and recycling;
   g) proposed truck routes, in accordance with this development consent;
   h) procedures to be adopted for the prevention of loose or contaminated material, spoil, dust and litter from being deposited onto the public way from trucks and associated equipment and the proposed method of cleaning surrounding roadways from such deposits. (Note: With regard to demolition of buildings, dust emission must be minimised for the full height of the building. A minimum requirement is that perimeter scaffolding, combined with chain wire and shade cloth must be used, together with continuous water spray during the demolition process. Compressed air must not be used to blow dust from the building site).
   i) measures to control noise emissions from the site;
   j) measures to suppress odours;
   k) enclosing and making the site safe;
   l) a certified copy of the Public Liability Insurance indemnifying Council and the Department for $10,000,000 against public prosecution for the duration of the demolition works;
   m) induction training for on-site personnel;
   n) written confirmation that an appropriately qualified Occupational Hygiene Consultant has inspected the building/site for asbestos, contamination and other hazardous materials, in accordance with the procedures acceptable to Work Cover Authority.
o) an Asbestos and Hazardous Materials Clearance Certificate by a person approved by the Work Cover Authority;
p) disconnection of utilities;
q) Fire Fighting. (Fire fighting services on site are to be maintained at all times during demolition work. Access to fire services in the street must not be obstructed);
r) access and egress. (Demolition and excavation activity must not cause damage to or adversely affect the safe access and egress of the subject building or any adjacent buildings);
s) waterproofing of any exposed surfaces of adjoining buildings;
t) control of water pollution and leachate and cleaning of vehicles tyres (proposals must be in accordance with the Protection of the Environmental Operations Act 1997);
u) working hours, in accordance with this development consent; and
v) any Work Cover Authority requirements.

The approved work method statements and a waste management plan as required by this condition must be implemented in full during the period of construction.

Construction Environmental Management Plan

C4. Prior to the commencement of relevant works on the Site, a Construction Management Plan (CEMP) shall be prepared in consultation with Council, and submitted to the PCA. The CEMP shall be informed by the Construction Management Plan prepared by Frasers Property, dated 1 November 2014. The Plan shall address, but not be limited to, the following matters where relevant:

a) evacuation and emergency egress capacity;
b) hours of work, in accordance with this development consent;
c) 24 hour contact details of site manager;
d) management of dust to protect the amenity of the neighbourhood;
e) use of hoardings and scaffolding;
f) way-finding signage;
g) erosion and sediment control;
h) measures to ensure that sediment and other materials are not tracked onto the roadway by vehicles leaving the Site;
i) air quality management including issues associated with odour, minimising dust on site and prevention of dust from leaving the site during construction works;
j) incorporation of all acoustic management and treatments; and
k) the staging of works and simultaneous construction with other projects in the Central Park precinct.

The CEMP must not include works that have not been explicitly approved in the development consent. In the event of any inconsistency between the consent and the CEMP, the consent shall prevail.

The Applicant shall submit a copy of the CEMP to the Department and to the Council, prior to commencement of work.

Construction Noise and Vibration

C5. Prior to the commencement of construction activities, a detailed Construction Noise and Vibration Management Plan (CNVMP) prepared by a suitably qualified person shall be submitted to the PCA. The Plan shall include, but not be limited to:

a) identification of each work area, site compound and access route (both private and public);
b) identification of the specific activities that will be carried out and associated noise sources at the premises and access routes;
c) identification of all potentially affected sensitive receivers;
d) the construction noise objectives identified in accordance with the *Interim Construction Noise Guidelines* (DECC 2009);

e) assessment of potential noise and vibration from the proposed construction methods (including noise from construction traffic) against the objectives identified in (d);

f) where the objectives are predicted to exceed an analysis of feasible and reasonable noise mitigation measures that can be implemented to reduce construction noise impacts;

g) description of management methods and procedures and specific noise mitigation treatments that will be implemented to control noise and vibration during construction, including the early erection of operational noise control barriers;

h) procedures for notifying residents of construction activities that are likely to affect their noise and vibration amenity; and

i) measures to monitor noise performance and respond to complaints.

The CNVMP should also include demolition methods that do not require the use of rock breakers or other similar high noise generating equipment, such as rock (or concrete) splitting of building sections for transport and break up off site, unless not feasible and reasonable. Where rock breakers or other high noise generating equipment are to be used such that the appropriate criteria are exceeded, the hours of operation for high noise generating equipment must include respite periods.

**Construction Traffic and Pedestrian Management Plan**

C6. Prior to the commencement of any works on the Site, a Construction Traffic and Pedestrian Management Plan prepared by a suitably qualified person shall be submitted to the PCA. The Plan shall address, but not be limited to, the following matters:

a) ingress and egress of vehicles to the Site;

b) loading and unloading, including construction zones;

c) predicted traffic volumes, types and routes;

d) details of specific measures to ensure the arrival of vehicles to the site do not cause additional queuing on surrounding roads;

e) potential impacts to regular bus services operation roads within the vicinity of the site from construction vehicles related to the site;

f) potential impacts on pedestrian access to public transport infrastructure inducing bus stops; and

g) pedestrian and traffic management methods.

Should any impacts be identified, the duration of the impacts and measure proposed to mitigate these should be clearly explained and committed to being enforced.

**Waste Management Plan during Construction**

C7. All of the requirements of the Waste Management Plan prepared by ARUP, dated 30 October 2014 shall be implemented during the construction of the development.

Details demonstrating compliance with the relevant legislative requirements, associated with the removal of hazardous waste, particularly the method of containment and control of emission of fibres to the air, are to be submitted to the satisfaction of the PCA prior to the removal of any hazardous materials.

C8. The Applicant must notify the Roads and Maritime Authority’s Traffic Management Centre of the truck route(s) to be followed by trucks transporting waste material from the Site, prior to the commencement of the removal of any waste material from the Site.
Central Park, Block 11
SSD 6376

Structural Details

C9. Prior to the commencement of building construction (excluding early works), the Applicant shall submit to the satisfaction of the PCA structural drawings prepared and signed by a suitably qualified practising Structural Engineer that comply with:
   a) the relevant clauses of the BCA;
   b) the development consent; and
   c) drawings and specifications comprising the Construction Certificate.

Vehicle Footway Crossing

C10. A separate application is to be made to, and approved by, Council for the construction of any proposed vehicle footway crossing or for the removal of any existing crossing and replacement of the footpath formation where any such crossings are no longer required.

All disused or redundant vehicle crossings and laybacks must be removed and footway and kerb reinstated in accordance with Council’s standards, to suit the adjacent finished footway and edge treatment materials, levels and details, or as otherwise directed by Council officers. All construction and replacement works are to be completed in accordance with the approved plans prior to the issue of the relevant Occupation Certificate.

Note: In all cases the construction materials should reinforce the priority of pedestrian movement over that of the crossing vehicle.

Traffic Works

C11. Any proposals for alterations to the public road, involving traffic and parking arrangements, must be designed in accordance with RMS Technical Directives and must be referred to and agreed to by the Local Pedestrian, Cycling and Traffic Calming Committee prior to any work commencing on site.

Associated Roadway Costs

C12. All costs associated with the construction of any new road works including kerb and gutter, road pavement, drainage system and footway shall be borne by the developer. The new road works must be designed and constructed in accordance with the City’s ‘Sydney Streets Technical Specification’ including amendments and ‘Sydney Streets Design Code’.

Utility Services

C13. Prior to the commencement of work the applicant is to obtain written approval from the utility authorities (electricity supply authority, an approved telecommunications carrier and an approved gas carrier, where relevant) in connection with the relocation and/or adjustment of the services affected by the construction of the underground structure. Any costs in the relocation, adjustment or support of services are to be the responsibility of the developer.

Stormwater and Drainage Management

C14. The existing stormwater management and drainage connections servicing the catchment areas are to be maintained at all times (during and after approved works). Where temporary or interim stormwater works are required, permission is to be sought from the relevant authority prior to works commencing. If a drainage line is to be removed or altered, replacing drainage line must have similar or better capacity.

NSW Government
Department of Planning and Environment
Signs at Egress

C15. The following signs must be provided and maintained within the site at the point(s) of vehicle egress:
   a) compelling drivers to stop before proceeding onto the public way;
   b) compelling drivers to ‘Give Way to Pedestrians’ before crossing the footway; and
   c) compelling drivers to ‘Give Way to Pedestrians and Bicycles’ before crossing a footway on an existing or identified shared path route.

Barricade Permit

C16. Where construction/building works require the use of a public place including a road or footpath, approval under Section 138 of the Roads Act 1993 for a Barricade Permit is to be obtained from Council prior to the commencement of work. Details of the barricade construction, area of enclosure and period of work are required to be submitted to the satisfaction of Council.

Excavation Works

C17. The PCA shall be given written notice, at least 48 hours prior to the commencement of excavation, shoring or underpinning works on the Subject Site.

Community Consultation

C18. A Community Consultation and Engagement Plan shall be prepared prior to the commencement of works and shall include how notification of residents and complaints associated with the proposal will be managed.

Access Driveways to be Constructed

C19. Approved driveways are to be constructed for all vehicular access to the construction site in accordance with the requirements of Council’s “Driveway Specifications” to the satisfaction of Council.

Roof Plant

C20. Prior to the commencement of building construction, the Applicant is to provide to the satisfaction of the PCA plans that demonstrate that the architecture of the building will conceal all roof plant.
PART D – DURING CONSTRUCTION

Road Occupancy Licence
D1. A Road Occupancy Licence should be obtained from Roads and Maritime Services for any works that may impact on traffic flows on Regent Street during construction activities.

Hours of Work
D2. The hours of construction and work on the development must be as follows:

   a) All work, including building/demolition and excavation work, and activities in the vicinity of the site generating noise associated with preparation for the commencement of work (eg. loading and unloading of goods, transferring of tools etc) in connection with the proposed development must only be carried out between the hours of 7.30am and 5.30pm on Mondays to Fridays, inclusive, and 7.30am and 3.30pm on Saturdays, with safety inspections being permitted at 7.00am on work days, and no work must be carried out on Sundays or public holidays.

   b) All work, including demolition, excavation and building work must comply with the City of Sydney Code of Practice for Construction Hours/Noise 1992 and Australian Standard 2436 - 1981 Guide to Noise Control on Construction, Maintenance and Demolition Sites. Note: The City of Sydney Code of Practice for Construction Hours/Noise 1992 allows extended working hours subject to the approval of an application in accordance with the Code and under Section 96 of the Environmental Planning and Assessment Act 1979.

Lighting of Site During Construction
D3. The intensity of lighting of the site, the hours of illumination and the location of the lighting must not cause objectionable glare or injury to the amenity of the neighbourhood. If in the opinion of the PCA or the Secretary, injury is likely to be caused, the intensity, hours of illumination and location of the lighting must be varied so that it does not cause injury.

Erosion and Sediment Control
D4. All soil erosion and sediment control measures are to be effectively implemented and maintained at or above design capacity for the duration of the construction works and until such time as all ground disturbed by the works has been stabilised and rehabilitated so that it no longer acts as a source of sediment. During the construction period:

   a) erosion and sediment controls must be regularly inspected, repaired and maintained in working order sufficient for a 10 year Average Recurrence Interval (ARI) rainfall event;

   b) erosion and sediment control signage available from Council must be completed and attached to the most prominent structure visible at all times when entering the site for the duration of construction; and

   c) building operations and stockpiles must not be located on the public footway or any other locations which could lead to the discharge of materials into the stormwater system.

Waste Disposal
D5. All waste generated on site must be classified and disposed of in accordance with the Waste Classification Guidelines (DECC 2008).
Approved Plans to be On-Site

D6. A copy of the approved and certified plans, specifications and documents incorporating conditions of approval and certification shall be kept on the Site at all times and shall be readily available for perusal by any officer of the Department, Council or the PCA.

Site Notice

D7. A site notice(s) shall be prominently displayed at the boundaries of the Site for the purposes of informing the public of project details including, but not limited to the details of the Builder, PCA and Structural Engineer.

The notice(s) is to satisfy all but not be limited to, the following requirements:

a) the notice is to be able to be read by the general public;

b) the notice is to be durable and weatherproof and is to be displayed throughout the works period;

c) the approved hours of work, the name of the site/project manager, the responsible managing company (if any), its address and 24 hour contact phone number for any inquiries, including construction/noise complaint are to be displayed on the site notice; and

d) the notice(s) is to be mounted at eye level on the perimeter hoardings/fencing and is to state that unauthorised entry to the Site is not permitted.

Survey Certificate

D8. A Survey Certificate prepared by a Registered Surveyor must be submitted at the completion of the building works certifying the location of the building in relation to the boundaries of the allotment.

Utilities

D9. During works within the Site, the Applicant shall ensure the work in vicinity of Ausgrid’s underground infrastructure, is undertaken in accordance with Ausgrid’s Network Standard NS156 – Working Near or Around Underground Cables.

D10. The Applicant shall be responsible for all public utility adjustment / relocation works, necessitated by the development and as required by the various public utility authorities and / or their agents.

D11. The relocation of any TfNSW services or infrastructure is to be at the Applicant’s cost and to TfNSW requirements and standards.

D12. All works / regulatory signage associated with the proposed development is to be at no cost to TfNSW or RMS.

Construction Noise Management

D13. The development shall be constructed with the aim of achieving the construction noise management levels detailed in the Interim Construction Noise Guideline (Department of Environment and Climate Change, 2009). All feasible and reasonable noise mitigation measures shall be implemented and any activities that could exceed the construction noise management levels shall be identified and managed in accordance with the CNVMP (condition C4).

D14. If the noise from a construction activity is substantially tonal or impulsive in nature (as described in Chapter 4 of the NSW Industrial Noise Policy), 5dB(A) must be added to the measured construction noise level when comparing the measured noise with the construction noise management levels.
D15. Wherever practical, and where sensitive receivers may be affected, piling activities are completed using bored piles. If driven piles are required they must only be installed where outlined in the CNVMP (condition C4).

D16. Any noise generated during the construction of the development must not be offensive noise within the meaning of the Protection of the Environment Operations Act 1997 or exceed approved noise limits for the Site.

D17. All work, including demolition, excavation and building work must comply with the City of Sydney Code of Practice for Construction Hours/Noise 1992 and Australian Standard 2436 – 1981 ‘Guide to Nosie Control on Construction, Maintenance and Demolition Sites’.

Vibration Criteria

D18. Vibration caused by construction at any residence or structure outside the Site must be limited to:
   a) for structural damage vibration, German Standard DIN 4150 Part 3 *Structural Vibration in Buildings. Effects on Structures*;
   b) for human exposure to vibration, the evaluation criteria set out in the *Environmental Noise Management Assessing Vibration: a Technical Guideline* (Department of Environment and Conservation, 2006);
   c) vibratory compactors must not be used closer than 30 metres from residential buildings unless vibration monitoring confirms compliance with the vibration criteria specified above; and
   d) these limits apply unless otherwise outlined in the CNVMP (condition C4).

Work Cover Requirements

D19. To protect the safety of work personnel and the public, the work site shall be adequately secured to prevent access by unauthorised personnel, and work shall be conducted at all times in accordance with relevant Work Cover requirements.

Application for Hoardings and Scaffolding on a Public Place

D20. A separate application under Section 138 of the Roads Act 1993 is to be made to Council to erect a hoarding and/or scaffolding in a public place. Where a consent is granted allowing the placement of temporary structures in a public place the structures must comply fully with Council’s *Policy for the Design of Construction Hoardings* and the conditions of any consent granted.

D21. The hoarding must comply with the Council’s policies for hoardings and temporary structures on the public way and comply with the following requirements:
   a) no third party advertising is permitted to be displayed on the subject hoarding/fencing; and
   b) the construction site manager shall be responsible for the removal of all graffiti from any construction hoardings or the like within the construction area within 48 hours of its application.

Hazardous and Industrial Waste

D22. Hazardous and/or industrial waste arising from the demolition/operational activities must be removed and/or transported in accordance with the requirements of the Office of Environment and Heritage and the NSW Work Cover Authority pursuant to the provisions of the following:
   a) *Protection of the Environment Operations Act 1997*;
   b) *Protection of the Environment Operations (Waste) Regulation 1996*;
   c) *Waste Avoidance and Recovery Act 2001*;
   d) *New South Wales Occupational Health & Safety Act 2000*;

NSW Government
Department of Planning and Environment
Covering of Loads

D23. All vehicles involved in the excavation and / or demolition process and departing from the property with materials, spoil or loose matter must have their loads fully covered before entering the public roadway.

Access Driveways to be Constructed

D24. Approved driveways are to be constructed for all vehicular access to the construction site in accordance with the requirements of the City of Sydney's 'Driveway Specifications' and to Council's satisfaction.

Disposal of Seepage and Stormwater

D25. Any seepage or rainwater collected on-site during construction, must be either re-used or disposed of, so as not to cause pollution. Seepage or rainwater shall not be pumped to the street stormwater system unless separate prior approval is given in writing by Council.

Protection of Trees

D26. No street trees are to be trimmed or removed unless it forms a part of this development consent or prior written approval from Council is obtained or is required in an emergency to avoid the loss of life or damage to property.

D27. Street trees must be protected in accordance with the Australian Standard 4970 Protection of Trees on Development Sites. All street trees must be protected during the construction works as follows:

a) Tree trunk and major limb protection shall be undertaken prior to or during the installation of any approved hoardings or scaffoldings. The protection shall be installed by a qualified Arborist (AQF 2 or 3) and must include:
   i. an adequate clearance, minimum 250mm, must be provided between the structure and tree branches, limbs and trunk at all times;
   ii. tree trunk/s and/or major branches, located within 500mm of any hoarding or scaffolding structure, must be protected by wrapped hessian or similar material to limit damage,
   iii. timber planks (50mm x 100mm or similar) shall be placed around tree trunk/s. The timber planks shall be spaced at 100mm intervals, and must be fixed against the trunk with tie wire, or strapping. The hessian and timber planks must not be fixed to the tree in any instance, or in any fashion. Small trees with a trunk diameter of 200mm or less should be protected though the use of an exclusion zone; and
   iv. tree trunk and major branch protection is to remain in place for the duration of construction and development works, and shall be removed at the completion of the project.

b) All hoarding support columns are to be placed a minimum of 300mm from the edge of the existing tree pits/setts, so that no sinking or damage occurs to the existing tree setts. Supporting columns must not be placed on any tree roots that are exposed;

c) Materials or goods, including site sheds, must not be stored or placed:
   1) around or under the tree canopy; or
   2) within two (2) metres of the trunks or branches of any street trees.

d) Any damage sustained to street tree/s as a result of the erection of hoardings, scaffolding, or due to the loading/unloading of vehicles adjacent to the site, must be immediately reported to the Council’s Street Tree Contract Coordinator on 9265 9673,
in order to determine the appropriate action for maintaining the health and structural integrity of any damaged street tree.

Protection of Stone Kerbs
D28. The existing stone kerbs on all relevant frontages of the site are to be retained and properly protected during excavation and construction works.

To avoid damage to stone kerbs during construction and/or excavation works for the development, temporary removal and storage of the stone kerbs may be approved by Council. Removed, serviceable stone kerbs (i.e. those that are in good condition as agreed by City officers) must be re-installed in accordance with the City’s standard details and specifications after the construction and/or excavation works have been completed. Note: A temporary concrete kerb will need to be constructed to retain the footpath and road access until the stone kerbs can be re-installed. The removed stone kerbs are to be reinstalled prior to the issue of an Occupation Certificate. Note: all costs associated with the works are to be at no cost to the Council.

Damaged kerbs are to be replaced to match existing to the City’s satisfaction or as otherwise advised by City officers.

Where new crossings or temporary crossings are to be constructed to access the property, the affected kerb stones should be salvaged and reused wherever possible.

All new driveway laybacks and kerbs are to be constructed with stone kerbs to match existing stones or as specified by City officers. All unused stone kerbs are to be salvaged and returned to the City’s store.

Council approval is required before kerbs are removed and prior to the cutting of existing stone kerbs from stormwater kerb outlets.

Vehicle Cleansing
D29. Prior to the commencement of work, suitable measures are to be implemented to ensure that sediment and other materials are not tracked onto the roadway by vehicles leaving the Site. It is an offence to allow, permit or cause materials to pollute or be placed in a position from which they may pollute waters.

Loading and Unloading During Construction
D30. The following requirements apply:
   a) all loading and unloading associated with construction activity must be accommodated on site;
   b) if, during excavation, it is not feasible for loading and unloading to take place on site, a Works Zone on the street may be considered by Council;
   c) a Works Zone may be required if loading and unloading is not possible on site. If a Works Zone is warranted an application must be made to Council at least 8 weeks prior to commencement of work on site. An approval for a Works Zone may be given for a specific period and certain hours of the days to meet the particular need for the site for such facilities at various stages of construction. The approval will be reviewed periodically for any adjustment necessitated by the progress of the construction activities;
   d) in addition to any approved construction zone, provision must be made for loading and unloading to be accommodated on site once the development has reached ground level; and
   e) the structural design of the building must allow the basement and/or the ground floor to be used as a loading and unloading area for the construction of the remainder of the development.
No Obstruction of Public Way

D31. The public way must not be obstructed by any materials, vehicles, refuse skips or the like, under any circumstances. Non-compliance with this requirement will result in the issue of a notice by Council to stop all work on site.

Use of Mobile Cranes

D32. The following requirements apply:
   a) mobile cranes operating from the road must not be used as a method of demolishing or constructing a building.
   b) for special operations including the delivery of materials, hoisting of plant and equipment and erection and dismantling of on-site tower cranes which warrant the on-street use of mobile cranes, permits must be obtained from Council for the use of a mobile crane. The permits must be obtained 48 hours beforehand for partial road closures which, in the opinion of Council, will create minimal traffic disruptions and 4 weeks beforehand in the case of full road closures and partial road closures which, in the opinion of Council, will create significant traffic disruptions.
   c) special operations and the use of mobile cranes must comply with the approved hours of construction. Mobile cranes must not be delivered to the site prior to 7:30am without the prior approval of Council.

Heritage and Conservation

D33. All fabric and elements identified as being of significance in the Conservation Management Plan are to be adequately protected throughout all stages of the works. To this end a protection methodology is to be submitted to Council’s Heritage Specialist for approval prior to the issue of the Construction Certificate.

The methodology should also make recommendations on the following:
   a) vibration monitoring of external walls, structural elements and significant fabric and elements of the Brewery buildings should be undertaken during the construction process; and
   b) site induction of all construction personnel as to the significance of the Irving Street Brewery buildings, and the elements and fabric to be conserved.
PART E PRIOR TO ISSUE OF SUBDIVISION CERTIFICATE

Restriction on Use of Car Parking Spaces

E1. The following conditions apply to car parking:
   a) the on-site car parking spaces, exclusive of car share, service and visitor car spaces, are not to be used other than by an occupant, tenant or resident of the subject building;
   b) if car parking spaces are not allocated to individual uses within the site, those spaces may only be leased or allocated to occupants/residents of the subject building;
   c) prior to the relevant Occupation Certificate being issued, a documentary restrictive covenant, is to be registered on the Title of the development site pursuant to Section 88E of the Conveyancing Act 1919, to the effect of (a) above. The covenant is to be created appurtenant to Council, at no cost to and to the satisfaction of Council.

E2. Car parking spaces for the exclusive use of the car share scheme vehicle are to be provided as shown in plan SSDA-11-212 dated 03/07/2015 and SSDA-11-213 dated 12/10/2015. The spaces shall be:
   a) retained as common property of the Owners Corporation of the site, and not sold or leased to an individual owner/occupier at any time;
   b) made available to car share operators without fee or charge;
   c) sign posted for use only by car share vehicles and well lit;
   d) publicly accessible at all times; and
   e) made available at the same time that the car park commences operation.

E3. Car wash bays must not at any time be allocated, sold or leased to individual owner/occupier and must be strictly retained as common property by the Owners Corporation for use by all tenants.

E4. Accessible car parking spaces for people with mobility impairment are only to be allocated as visitor parking or to adaptable units. Where allocated to adaptable units, the car spaces must be assigned to the unit in any strata subdivision of the building.

E5. No part of the common property, apart from the visitor vehicle spaces which are to be used only by visitors to the building, and service vehicle spaces which are to be used only by service vehicles, is to be used for the parking or storage of vehicles or boats. The strata subdivision of the building is to include an appropriate documentary restriction pursuant to Section 88B of the Conveyancing Act 1918, so burdening common property, with Council being the authority to release, vary or modify the restriction.

Access

E6. Documentary easements for access must be created over the appropriate lots in the subdivision to provide for public access and access to lifts, lobbies, fire stairs, service areas, loading areas and car parking areas, pursuant to Section 88B of the Conveyancing Act 1919.

Services

E7. Documentary easements for services, support, drainage, shelter, use of plant and equipment, loading areas and service rooms, repairs, maintenance or any other encumbrances and indemnities required for joint or reciprocal use of part or all of the proposed lots as a consequence of the subdivision, must be created over the appropriate lots in the subdivision pursuant to Section 88B of the Conveyancing Act 1919 or registered as a shared facility in the strata management statement.
Land Subdivision – Subdivision Certificate

E8. A separate application must be made to Council to obtain the approval of the plan of subdivision and issue of a Subdivision Certificate under Section 109J of the Environmental Planning and Assessment Act 1979.

Strata Subdivision – Approval of Strata Plan Required

E9. A separate application must be made to Council or an accredited certifier to obtain approval of the Strata Plan and issue of a Strata Certificate under the Strata Schemes (Freehold Development) Act 1973.

Water and Sewer Supply - Certificate of Compliance- Subdivision

E10. Prior to the issue of a Subdivision or Strata Certificate, a Compliance Certificate under the Sydney Water Act 1994 or Water Industry Competition Act 2006 must be obtained from the relevant water authority.

Application can be made through an authorised Water Servicing Coordinator. Please refer to the Building Developing and Plumbing section on the web site www.sydneywater.com.au then refer to "Water Servicing Coordinator" under "Developing Your Land" or telephone 13 20 92 for assistance.

Following application a "Notice of Requirements" will advise of water and sewer Infrastructure to be built and charges to be paid. Please make early contact with the Coordinator, since building of water/sewer infrastructure can be time consuming and may impact on other services and building, driveway or landscape design.

The Certificate of Compliance must be submitted to Council or the Principal Certifying Authority prior to a Subdivision or Strata Certificate being issued.

Dedication of Road Widening

E11 The owner must dedicate, for road purposes, free of cost to Council:
   a) a widening, limited partly in stratum, along the site frontage to O’Connor Street and Carlton Street;
   b) a widening, limited in stratum, along the site frontage to Wellington Street.

The widenings are to be detailed in a draft plan of subdivision of the land. The width of road widenings and their upper and lower stratum limits are to be submitted and agreed by the City of Sydney prior to the issue of a Construction Certificate for above ground works for Development Application SSD 6378, or any other future works which would impact the agreed height or depth of the stratum subdivision. The plan is to be registered at the NSW Office of Land and Property Information prior to an Occupation Certificate being issued.

Encroachments – Public Way

E12 No portion of the proposed structure, including gates and doors during opening and closing operations, shall encroach upon Council’s footpath area or upon the areas proposed to be dedicated as road.

Survey

E13 All footings and walls adjacent to a boundary must be set out by a registered surveyor. On commencement of brickwork or wall construction a survey and report must be submitted to the Principal Certifying Authority indicating the position of external walls in relation to the boundaries of the allotment.
PART F – PRIOR TO OCCUPATION OR COMMENCEMENT OF USE

Occupation Certificate
F1. An Occupation Certificate must be obtained from the PCA prior to commencement of occupation or use of the whole or any part of a new building, an altered portion of, or an extension to an existing building.

Public Domain Works
F2. The works to the public domain are to be completed in accordance with the approved Public Domain Plan and Alignment Levels plan (conditions B8 and B9) prior to the issue the relevant Occupation Certificate or before the use commences, whichever is sooner.

Public Domain Lighting
F3. The external lighting works are to be completed in accordance with the approved Public Domain Lighting Plan (condition B45) prior to the issue of the relevant Occupation Certificate or before the use commences, whichever is sooner.

CPTED
F4. The CPTED works listed in the CPTED Report prepared by Elton Consulting, dated 28 October 2013 (and as amended by condition B5) for the development must be fulfilled prior to the issue of the relevant Occupation Certificate.

Loading Dock Management
F5. Prior to the issue of the relevant Occupation Certificate, a Loading Dock Management Plan shall be submitted to the PCA to promote safe and efficient operation of the proposed loading area and to minimise conflicts with pedestrian movements. The Loading Dock Management Plan shall include the following:
   a) allocation of loading spaces;
   b) restrictions on delivery and operating times to ensure deliveries do not occur during times of peak pedestrian movements;
   c) controls on duration of stays;
   d) measures to ensure there is no queuing of delivery vehicles including details of alternate parking locations to redirect vehicles when queuing occurs;
   e) controls on the placement of skips, pallets, etc.;
   f) procedures for tradesman access and parking;
   g) allocation of delivery times for residential removalists; and
   h) truck access routes.

Mechanical Ventilation
F6. Following completion, installation and testing of all the mechanical ventilation systems, the Applicant shall provide evidence to the satisfaction of the PCA, prior to the issue of the relevant Occupation Certificate, that:
   a) the hybrid cross ventilation system(s) has been completed in accordance with condition B4; and
   b) the installation and performance of the all mechanical systems complies with:
      i. the BCA;
      ii. Australian Standard AS1668 and other relevant codes;
      iii. the development consent and any relevant modifications; and
      iv. any dispensation granted by the New South Wales Fire Brigade.
Road Damage

F7. The cost of repairing any damage caused to Council or other Public Authority’s assets in the vicinity of the Site as a result of construction works associated with the approved development, is to be met in full by the Applicant/developer prior to the issue of the final Occupation Certificate for the hotel, residential or office component, whichever is the later.

Note: Should the cost of damage repair work not exceed the road maintenance bond, Council will automatically call up the bond to recover the costs. Should the repair costs exceed the bond amount, a separate invoice will be issued.

Environmental Performance and BASIX

F8. Prior to the issue of the final Occupation Certificate, the Applicant is to provide to the PCA, documentation certifying the development has achieved a design rating of 5 stars using the Multi-Unit Residential v1 tool rating as established by the Green Building Council of Australia.

F9. All commitments listed in the BASIX Certificate (as referred to in condition B44) for the development must be fulfilled prior to the issue of any Occupation Certificate.

Green Travel Plan

F10. To encourage travel modes other than private vehicle the Applicant shall prepare and implement a green travel plan and transport access guide for future residents, employees and visitors. Details are to be submitted to the PCA prior to the issue of the final Occupation Certificate.

Post-Construction Dilapidation Report

F11. Prior to the issue of an Occupation Certificate:
   a) the Applicant shall engage a suitably qualified person to prepare a post-construction dilapidation report at the completion of the construction works. This report to ascertain whether the construction works created any structural damage to adjoining buildings, infrastructure and roads;
   b) the report is to be submitted to the PCA. In ascertaining whether adverse structural damage has occurred to adjoining buildings, infrastructure and roads, the PCA must:
      i) compare the post-construction dilapidation report with the pre-construction dilapidation report required by these conditions; and
      ii) have written confirmation from the relevant authority that there is no adverse structural damage to their infrastructure and roads.
   c) a copy of this report is to be forwarded to the Council and each of the affected property owners.

Fire Safety Certification

F12. Prior to the issue the relevant Occupation Certificate, a Fire Safety Certificate shall be obtained for all the relevant Essential Fire or Other Safety Measures forming part of this consent. A copy of the Fire Safety Certificate must be submitted to the relevant authority and Council and be prominently displayed in the building.

Structural Inspection Certificate

F13. A Structural Inspection Certificate or a Compliance Certificate must be submitted to the satisfaction of the PCA prior to the issue of the relevant Occupation Certificate and/or use of the premises. A copy of the Certificate with an electronic set of final drawings (contact approval authority for specific electronic format) shall be submitted to the approval authority and the Council after:
   a) the site has been periodically inspected and the Certifier is satisfied that the structural works is deemed to comply with the final design drawings; and
b) the drawings listed on the Inspection Certificate have been checked with those listed on the final Design Certificate/s.

**Electromagnetic Radiation**

F14. All recommendations contained within the Electromagnetic Field Radiation report prepared by Magshield Products Australia Pty Ltd, dated 7 July 2014 shall be implanted as part of the detailed design assessment and implanted into the design drawings prior to the commencement of the use of the premises.

Prior to the issue of an Occupation Certificate, a suitably qualified consultant is to provide a written verification to the satisfaction of the PCA that the development complies with the requirements set in the report.

**Stormwater and Drainage**

F15. Prior to the issue of any Occupation Certificate, a Positive Covenant must be registered on the title for all drainage systems involving On-Site Detention (OSD) to ensure maintenance of the approved OSD system regardless of the method of connection.

F16. Prior to the issue of any Occupation Certificate, maintenance schedules of the proposed water sensitive urban design and drainage measures must be submitted to and approved by the PCA and a copy provided to Council.

**Waste Disposal**

F17. All waste generated on site must be classified and disposed of in accordance with the Waste Classification Guidelines (DECC 2008).

F18. Prior to an Occupation Certificate being issued and/or commencement of the use, whichever is earlier, the building owner must ensure that there is a contract with a licensed contractor for the removal of all waste. No garbage is to be placed on the public way, e.g. footpaths, roadways, plazas, reserves, at any time.

F19. Prior to the issue the relevant Occupation Certificate details shall be submitted to the satisfaction of the PCA that waste handling works have been completed in accordance with condition B26

**Plan of Management for Landscape Maintenance**

F20. A plan of management for the ongoing maintenance of landscaped areas within common communal areas and the public domain is to be prepared and adopted by the Owners Corporation. The maintenance plan is to be complied with during the occupation of the property.

**Installation of Water Efficient Taps**

F21. All commercial taps and shower heads installed must be water efficient with at least a 3 star rating under the Water Efficiency and Labelling Scheme (WELS), where available. Certification is to be submitted for the consent of the PCA, prior to a relevant Occupation Certificate being issued.

**Acoustic Compliance**

F22. Prior to the issue of a relevant Occupation Certificate, evidence shall be submitted to the PCA demonstrating compliance with all recommendations of the Noise Impact Assessment Revision 1, prepared by Acoustic Logic dated 6 November 2014 and the development achieves compliance with the requirements of State Environmental Planning Policy (Infrastructure) 2007 and other guidelines applicable to the development.

NSW Government
Department of Planning and Environment
Registration of Easements

F23. Prior to the issue of any Occupation Certificate, the Applicant shall provide to the PCA evidence that all matters required to be registered on title including easements required by this consent, approvals, and other consents have been lodged for registration or registered at the NSW Land and Property Information.

Heritage and Conservation

F24. Prior to issue of the relevant Occupation Certificate being issued the Heritage Interpretation Plan (as referred to in condition B53) must be implemented to the satisfaction of Council’s Heritage Specialist.

Electronic CAD Models

F25. Prior to the issue of the final Occupation Certificate, an accurate 1:1 electronic CAD model of the completed development shall be submitted to Council for the Council’s electronic Visualisation City Model. Council’s Modelling staff should be consulted prior to the creation of the model.
PART G – POST OCCUPATION

Loading and Unloading
G1. All loading and unloading of service vehicles in connection with the use of the premises shall be carried out wholly within the Site at all times.

Unobstructed Driveways and Parking Areas
G2. All driveways and parking areas shall be unobstructed at all times. Driveways and car spaces shall not be used for the manufacture, storage or display of goods, materials or any other equipment and shall be used solely for vehicular access and for the parking of vehicles associated with the use of the premises.

Parking on Common Property Areas
G3. No part of the common property, apart from the visitor vehicle spaces which are to be used only by visitors to the building, and service vehicle spaces which are to be used only by service vehicles, is to be used for the parking or storage of vehicles or boats.

Noise Control – General
G4. The emission of noise associated with the use, the operation of any mechanical plant and equipment shall comply with the following criteria:
   a) the LAeq, 15minute noise level emitted from the use must not exceed the background noise level LA90, 15minute by more than 5dB when assessed at the boundary of any affected residence;
   b) the LAeq,15minute noise level shall be adjusted for modifying factors in accordance with Appendix 2 of the Noise Guide For Local Government published by DECCW;
   c) the background noise level shall be measured in the absence of noise emitted from the use in accordance with Australian Standard AS 1055.1-1997- Description and measurement of environmental noise; and
   d) the use of the premises shall be controlled so that any emitted noise is at a level so as not to create an 'offensive noise' as defined in the Protection of the Environment Operations Act 1997 to any affected residence.

G5. An LAeq,15minute noise level emitted from the use must not exceed the LA90, 15minute noise level by more than 3dB in any Octave Band Centre Frequency (31.5 Hz to 8 kHz inclusive) when assessed inside any habitable room of any affected residence provided that:
   a) where the LA90, 15minute noise level is below the threshold of hearing Tf at any Octave Band Centre Frequency as defined in Table 1 of International Standard ISO 226 - Normal Equal-Loudness-Level Contours then the value of Tf corresponding to that Octave Band Centre Frequency shall be used instead;
   b) the LAeq,15minute noise level and the LA90,15minute noise level shall both be measured with all external doors and windows of the affected residence closed; and
   c) the LA90,15minute noise level shall be measured in the absence of noise emitted from the use but with the (excluding air-conditioning equipment) normally servicing the affected residence operating.

G6. An LAeq,15minute noise level emitted from the use must not exceed the LA90, 15minute noise level by more than 3dB in any Octave Band Centre Frequency (31.5 Hz to 8 kHz inclusive) when assessed inside any commercial premises provided that:
a) the LAeq,15minute noise level and the LA90,15minute noise level shall both be measured with all external doors and windows of the commercial premises closed;
b) the LA90,15minute noise level shall be measured in the absence of noise emitted from the use but with the ventilation equipment (including air-conditioning equipment) normally servicing the commercial premises operating;
c) the use of the premises shall be controlled so that any emitted noise is at a level so as not to create an 'offensive noise' as defined in the Protection of the Environment Operations Act 1997 to any affected residence;
d) in this clause, the term 'noise level emitted from the use' means the contributing noise level from the use in isolation to any other ambient noise and account must therefore be taken of the LAeq,15minute when the use is not in operation; and
e) in circumstances where this development application refers to a modification or addition to an existing use, the background noise level referred to in this clause pertains to the LA90, 15minute noise level measured in the absence of all noise from the site.

**Noise Control – Mechanical Plant And Equipment**

G7. Noise associated with the use of mechanical plant and equipment must not give rise to any one or more of the following:

a) transmission of ‘offensive noise’ as defined in the Protection of the Environment Operations Act 1997 to any affected receiver; and

b) a sound pressure level at the boundary of any affected receiver that exceeds the background (LA90, 15minutes) noise level by more than 5dB. The background noise level must be measured in the absence of noise emitted from the use in accordance with Australian Standard AS1055.

Note: The method of measurement of vibration being carried out in accordance with ‘assessing Vibration; Technical Guidelines’ – DEC (EPA) AS1055 for sound level measurements

**No Speakers or Music Outside**

G8. Speakers must not be installed and amplified music, PA systems or the like, must not be played or used in any of the outdoor areas associated with the premises including the public domain.

**Storage of Hazardous or Toxic Material**

G9. Any hazardous or toxic materials must be stored in accordance with Workcover Authority requirements and all tanks, drums and containers of toxic and hazardous materials shall be stored in a bunded area. The bund walls and floors shall be constructed of impervious materials and shall be of sufficient size to contain 110% of the volume of the largest tank plus the volume displaced by any additional tanks within the bunded area.

**Anti-Graffiti**

G10. Where possible all ground level surfaces are to be treated with anti-graffiti coating to minimise the potential of defacement. In addition, any graffiti evident on the exterior facades and visible from a public places is to be removed within 48 hours.

**Public Way to be Unobstructed**

G11. The public way must not be obstructed by any materials, vehicles, refuse, skips or the like under any circumstances.
Public Domain Defects and Liability Period

G12. All works to the Council’s public domain, including rectification of identified defects, are subject to a 12 month defects liability period from the date of final completion. The date of final completion will be nominated on the Certificate of Completion for public domain works.

Annual Fire Safety Certification

G13. The owner of the building shall certify to Council every year that the essential services installed in the building for the purposes of fire safety have been inspected and at the time of inspection are capable of operating to the required minimum standard. This purpose of this condition is to ensure that there is adequate safety of persons in the building in the event of fire and for the prevention of fire, the suppression of fire and the prevention of spread of fire.

Communal Roof Terrace

G14. All residents of the building are to have access to the level nine communal roof terrace.

Restriction on Residential Development

G15. The restriction applies to the components of the buildings approved for residential use:
   a) the accommodation portions of the building must be used as permanent residential accommodation only and not for the purpose of a hotel, motel, serviced apartments, private hotel, boarding house, tourist accommodation or the like, other than in accordance with the Sydney Local Environmental Plan 2012;
   b) the dual key apartments must not be subdivided into separate lots;
   c) no more than two adult people shall occupy any bedroom and no bedroom shall contain more than two beds. This excludes children and children’s beds, cots or bassinets;
   d) the total number of adults residing in one apartment shall not exceed twice the number of approved bedrooms;
   e) if an apartment contains tenants, it must be subject to a residential tenancy agreement for a term of at least three months;
   f) an owner, tenant or Owners Corporation shall not permit a Building Manager or agent to advertise or organise for short term accommodation or share accommodation in the building; and
   g) car parking spaces may only be used for storage related to residence in the apartment with which the space is associated. No storage should take place for commercial businesses in car parking spaces.

Business and Building Identification Signage

G16. Business and building identification signage shall comply with the following:-
   a) The signage shall be utilised as building and business identification signage only and shall not be adapted or altered to be third party advertising signage without the further consent;
   b) The signage shall not:-
      i) flash, move, be animated, scintillate or be decorated with rotating flashing lights;
      ii) include any apparatus to provide any sound;
      iii) carry a message(s) which is offensive;
      iv) give instructions to traffic by the use of the words ‘Halt’, ‘Stop’, or any other direction, nor imitate traffic signs in respect to shape, layout or colour;
      v) contain interchangeable or movable parts;
      vi) impair or distract the vision of a driver through the intensity of the illumination of the sign; and
      vii) must not impede the ability of the occupants to exit the building under emergency conditions.
c) The approved signage shall be appropriately maintained at all times; and

d) The wording to the signage shall be primarily displayed in English but may include a translation in another language.
ADVISORY NOTES

Appeals

AN1 The Applicant has the right to appeal to the Land and Environment Court in the manner set out in the Environmental Planning and Assessment Act, 1979 and the Environmental Planning and Assessment Regulation, 2000 (as amended).

Other Approvals and Permits

AN2 The Applicant shall apply to the council for all necessary permits including crane permits, road opening permits, hoarding or scaffolding permits, footpath occupation permits, barricade permits and/or any other approvals under Section 68 (Approvals) of the Local Government Act, 1993 or Section 138 of the Roads Act, 1993.

Responsibility for Other Consents / Agreements

AN3 The Applicant is solely responsible for ensuring that all additional consents and agreements are obtained from other authorities, as relevant.

Street Numbering

AN4 Street numbers and the building name(s), if any, will need to be clearly displayed at either end of the ground level frontages in accordance with the council's policy, prior to the occupation of the building(s) or commencement of the use. If street numbers or changes to street numbers are required, a separate application shall be made to the Council.

Temporary Structures

AN5 An approval under State Environmental Planning Policy (Temporary Structures) 2007 must be obtained from the council for the erection of the temporary structures. The application must be supported by a report detailing compliance with the provisions of the Building Code of Australia.

AN6 Structural certification from an appropriately qualified practicing structural engineer must be submitted to the council with the application under State Environmental Planning Policy (Temporary Structures) 2007 to certify the structural adequacy of the design of the temporary structures.

Asbestos Removal

AN7 All excavation works involving the removal and disposal of asbestos must only be undertaken by contractors who hold a current WorkCover Asbestos or ‘Demolition Licence’ and a current WorkCover Class 2 (Restricted) Asbestos Licence and removal must be carried out in accordance with NOHSC: ‘Code of Practice for the Safe Removal of Asbestos’.

Site Contamination Issues During Construction

AN8 Should any new information come to light during demolition or construction works which has the potential to alter previous conclusions about site contamination then the Applicant must be immediately notified and works must cease. Works must not recommence on site until the consultation is made with the Department.
Below Ground (Sub-Surface) Works – Non-Aboriginal Relics

AN9 If any archaeological relics are uncovered during the course of the work, then all works shall cease immediately in that area and the OEH Heritage Branch contacted. Depending on the possible significance of the relics, an archaeological assessment and an excavation permit under the NSW Heritage Act 1977 may be required before further works can continue in that area.

Discovery of Aboriginal Heritage

AN10 In the event that surface disturbance identifies a new Aboriginal object, all works must halt in the immediate area to prevent any further impacts to the object(s). A suitably qualified archaeologist and the registered Aboriginal representatives must be contacted to determine the significance of the objects. The site is to be registered in the Aboriginal Heritage Information Management System (AHIMS) which is managed by OEH and the management outcome for the site included in the information provided to AHIMS. The proponent must consult with the Aboriginal community representatives, the archaeologist and OEH to develop and implement management strategies for all objects/sites.

Resident Parking Permits

All owners, tenants and occupiers of this building are advised that it is the Policy of Council that they are not eligible to participate in any existing or proposed Council on-street resident parking schemes. The owner of the dwelling should advise all intending owners, tenants and occupiers of the dwelling of this prohibition in writing at the time of entering into a purchase / lease / occupancy agreement.

Environment Protection Licence

AN12 The applicant will need to apply to the EPA for an Environmental Protection Licence (EPL) should the proposal include any of the following activities. Any licence application will need to be supported by an appropriate level of environmental assessment:

a) **Crushing, grinding or separating** of more than 150 tonnes of materials per day or 30,000 tonnes of materials per year, meaning the processing of materials (including sand, gravel, rock or minerals, but not including waste of any description) by crushing, grinding or separating them into different sizes.

b) **Land-based extractive activity** involves the extraction, processing or storage of more than 30,000 tonnes per year of extracted materials, meaning the extraction, processing or storage of extractive materials, either for sale or re-use, by means of excavation, blasting, tunnelling, quarrying or other such land-based methods.
