

Teven Rd is already very busy and dangerous I don't think it can cater for more trucks. Last year the local school bus was almost hit TWICE by quarry trucks, there have been several accidents and a lot of gravel left on road falling from trucks. The dust levels at my house have never been studied nor the cracking from the truck movements vibrating as they thunder past it. It is very stressful living here and we always have dust allergies and conjunctivitis. The extended hours would really affect our quality of life .The actual quarry itself runs fairly well it is just the amount of trucks I am against.
