Subject: TransGrid notification: 2017-169 - Modification Application SSD 6917 MOD 4

Hi Nikki,

Thank you for notifying TransGrid of this application.

I just left you a message because I'd like to clarify whether the proposal includes any amendments to the approved works within TransGrid's easement, e.g. is the proposed fire track around building 3C located partially within the easement? Although it's not listed as an amendment it appears that the road within TransGrid's easement may be located closer to the tower.

If there are proposed modifications within TransGrid's easement then a technical assessment will be required to be undertaken prior to providing final comments regarding this application. TransGrid is required to assess the vertical and horizontal clearances to TransGrid's lines and structures to ensure the safety of the community and assess impacts on our assets. The applicant would need to submit an amended 3D DXF file with corresponding plans in PDF format which clearly show the location and details of the works including distances from TransGrid's structures.

I will be leaving my role at TransGrid on Thursday so after that date please send any correspondence or application notifications to Lauren Vine, Enquiry Services Coordinator:

Easements&development@transgrid.com.au

CC Lauren.Vine@transgrid.com.au

02 9620 0297

Thank you for consulting with TransGrid and we look forward to receiving further details regarding the proposal.

Kind regards,

Kylie O'Brien Pratt
