

EPA Reference: DOC19/532306

Dear Mr Roppolo

Thank you for consulting the EPA in relation to the Notice of Modification Application Barangaroo South (SSD 6960 MOD 2) (the proposal).

The EPA understand that the proposal seeks to adjust the relative levels (RLs) of the basement slab to align with concurrent modifications to the Stage 1B Public Domain SSD 7944. The modified design will remain substantially the same as the originally approved development. The anticipated environmental impacts are consistent with those of the approved development.

Barangaroo South forms part of the premises regulated by the EPA under Environment Protection Licence 13336 (the Licence). The EPA utilises the Licence to regulate activities at Barangaroo associated with contaminated groundwater treatment and contaminated land remediation. Based on the information provided, the proposal will not impact on remediation or groundwater treatment works, and the proposal will not require any amendments to the Licence.

In view of these factors, the EPA has no further interest in the proposal and no further consultation is required.

Please call Tenille Lawrence-Haskew on 9995 6207 if you have any questions.

Regards

Tenille Lawrence
