

# The Ground Plane

## Ground Plane Analysis

### Enhancing the Public Realm

One of the ambitions for the development is to be fully integrated within the vision for the overall APDG block, including Circular Quay Tower, the Public Square, 200 George Street, and the different laneways that connect these. The proposal will enhance the arrival experience into the city particularly from Circular Quay and into the heart of the APDG block and George Street. It will prioritise the public realm and everyday experience for inhabitants and visitors. It will be of its place, a design that promotes Sydney's diversity, climate and lifestyle and becomes part of Sydney's heritage in the future.
