Submission Hume Coal Project EIS SSD 15_7172 and the Berrima Rail Project SSD 15_7171

Attn: Executive Director, Resource Assessments and Business Systems

Planning Services

Department of Planning and Environment

GPO Box 39

Sydney NSW 2001

I object to the Hume Coal Project and the Berrima Rail Project (SSD 15_7171) and believe both should be rejected because:

- Toxic mine waste water is a pollution risk to the local river system which is part of the Sydney drinking water catchment.
- Risks to groundwater are too great: the project will seriously affect at least 93 bores owned by 71 landowners, with some drawn down by up to 80 metres.
- An April 2017 Galaxy Research poll found support for the coal mine among Wingecarribee Shire residents is just 18%.
- Dangerous coal dust and diesel emissions from coal trains pose a threat to human health.
- Hume Coal's trains will add an extra 24 minutes of closures at rail level crossings every day. This creates unacceptable delays on emergency service response times.
- The parent company, POSCO, has an appalling international track record for corruption, environmental destruction and human rights abuse documented in India, Uzbekistan, South Korea, Vietnam and West Papua.
- Rich heritage areas and farmland will be destroyed.
- The uncertainty caused by the prospect of a coal mine in the district has caused anxiety, depression and ill-health in the community.
- A new report by The Australia Institute found that Hume Coal's mine could damage the economy of the Southern Highlands.

I urge the Government to reject this project and protect the Southern Highlands, by supporting a vision for a sustainable and coal-free future for this region.

Yours sincerely,

Connor McMullen

I object to the Hume Coal Project and the Berrima Rail Project (SSD 15_7171) and believe both should be rejected because:

- Toxic mine waste water is a pollution risk to the local river system which is part of the Sydney drinking water catchment.
- Risks to groundwater are too great: the project will seriously affect at least 93 bores owned by 71 landowners, with some drawn down by up to 80 metres.
- An April 2017 Galaxy Research poll found support for the coal mine among Wingecarribee Shire residents is just 18%.
- Dangerous coal dust and diesel emissions from coal trains pose a threat to human health.
- Hume Coal's trains will add an extra 24 minutes of closures at rail level crossings every day. This creates unacceptable delays on emergency service response times.
- The parent company, POSCO, has an appalling international track record for corruption, environmental destruction and human rights abuse documented in India, Uzbekistan, South Korea, Vietnam and West Papua.
- Rich heritage areas and farmland will be destroyed.
- The uncertainty caused by the prospect of a coal mine in the district has caused anxiety, depression and ill-health in the community.
- A new report by The Australia Institute found that Hume Coal's mine could damage the economy of the Southern Highlands.

I urge the Government to reject this project and protect the Southern Highlands, by supporting a vision for a sustainable and coal-free future for this region.

Yours sincerely,

Cinzia Lea

Sydney NSW 2001

I object to the Hume Coal Project and the Berrima Rail Project (SSD 15_7171) and believe both should be rejected because:

- Toxic mine waste water is a pollution risk to the local river system which is part of the Sydney drinking water catchment.
- Risks to groundwater are too great: the project will seriously affect at least 93 bores owned by 71 landowners, with some drawn down by up to 80 metres.
- An April 2017 Galaxy Research poll found support for the coal mine among Wingecarribee Shire residents is just 18%.
- Dangerous coal dust and diesel emissions from coal trains pose a threat to human health.
- Hume Coal's trains will add an extra 24 minutes of closures at rail level crossings every day. This creates unacceptable delays on emergency service response times.
- The parent company, POSCO, has an appalling international track record for corruption, environmental destruction and human rights abuse documented in India, Uzbekistan, South Korea, Vietnam and West Papua.
- Rich heritage areas and farmland will be destroyed.
- The uncertainty caused by the prospect of a coal mine in the district has caused anxiety, depression and ill-health in the community.
- A new report by The Australia Institute found that Hume Coal's mine could damage the economy of the Southern Highlands.

I urge the Government to reject this project and protect the Southern Highlands, by supporting a vision for a sustainable and coal-free future for this region.

Of all the environmental threats that Australia faces, our water supply - for the human population and for the land itself - is the most critical.

I object to the Hume Coal Project and the Berrima Rail Project (SSD 15_7171) and believe both should be rejected because:

- Toxic mine waste water is a pollution risk to the local river system which is part of the Sydney drinking water catchment.
- Risks to groundwater are too great: the project will seriously affect at least 93 bores owned by 71 landowners, with some drawn down by up to 80 metres.
- An April 2017 Galaxy Research poll found support for the coal mine among Wingecarribee Shire residents is just 18%.
- Dangerous coal dust and diesel emissions from coal trains pose a threat to human health.
- Hume Coal's trains will add an extra 24 minutes of closures at rail level crossings every day. This creates unacceptable delays on emergency service response times.
- The parent company, POSCO, has an appalling international track record for corruption, environmental destruction and human rights abuse documented in India, Uzbekistan, South Korea, Vietnam and West Papua.
- Rich heritage areas and farmland will be destroyed.
- The uncertainty caused by the prospect of a coal mine in the district has caused anxiety, depression and ill-health in the community.
- A new report by The Australia Institute found that Hume Coal's mine could damage the economy of the Southern Highlands.

Simply put, the risk to the clean water supply alone justifies rejecting this and all other coal projects.

I urge the Government to reject this project and protect the Southern Highlands, by supporting a vision for a sustainable and coal-free future for this region.

Yours sincerely,

Kim Blake

I object to the Hume Coal Project and the Berrima Rail Project (SSD 15_7171) and believe both should be rejected because:

The Southern Highlands, Wollongong, NSW, Australia and our planet earth cannot support any more coal mining without moving to 2 degrees dangerous climate change. All of us here today have a responsibility to our future generations to reduce our emissions now as well as threats to our water, soil and natural places.

- Toxic mine waste water is a pollution risk to the local river system which is part of the Sydney drinking water catchment.
- Risks to groundwater are too great: the project will seriously affect at least 93 bores owned by 71 landowners, with some drawn down by up to 80 metres.

In the coming years our water and farmland will be more precious than coal or gas because of the need to feed a growing world population. We can not do this if we have polluted our water resources and destroyed our farmland by turning Australia into a big black hole.

Last but not least, I prefer my drinking water to be toxin free. There are so many countries where you can not turn on your tap and have clean, fresh safe water to drink. Say no to this coal mine because it has a detrimental impact on the health of our water, our farmlands and the people who live in this beautiful region.

Yours sincerely,

Jennifer Sykes

Sydney NSW 2001

I object to the Hume Coal Project and the Berrima Rail Project (SSD 15_7171) and believe both should be rejected because:

- Toxic mine waste water is a pollution risk to the local river system which is part of the Sydney drinking water catchment.
- Risks to groundwater are too great: the project will seriously affect at least 93 bores owned by 71 landowners, with some drawn down by up to 80 metres.
- An April 2017 Galaxy Research poll found support for the coal mine among Wingecarribee Shire residents is just 18%.
- Dangerous coal dust and diesel emissions from coal trains pose a threat to human health.
- Hume Coal's trains will add an extra 24 minutes of closures at rail level crossings every day. This creates unacceptable delays on emergency service response times.
- The parent company, POSCO, has an appalling international track record for corruption, environmental destruction and human rights abuse documented in India, Uzbekistan, South Korea, Vietnam and West Papua.
- Rich heritage areas and farmland will be destroyed.
- The uncertainty caused by the prospect of a coal mine in the district has caused anxiety, depression and ill-health in the community.
- A new report by The Australia Institute found that Hume Coal's mine could damage the economy of the Southern Highlands.

I urge the Government to reject this project and protect the Southern Highlands, by supporting a vision for a sustainable and coal-free future for this region.

I object to the Hume Coal Project and the Berrima Rail Project (SSD 15_7171) and believe both should be rejected because:

- It is NOT sustainable.
- Toxic mine waste water is a pollution risk to the local river system which is part of the Sydney drinking water catchment, not to mention the fishing and oyster industries.
- Risks to groundwater are too great: the project will seriously affect at least 93 bores owned by 71 landowners, with some drawn down by up to 80 metres.
- An April 2017 Galaxy Research poll found support for the coal mine among Wingecarribee Shire residents is just 18%.
- Dangerous coal dust and diesel emissions from coal trains pose a threat to human health. This is a fact.
- Hume Coal's trains will add an extra 24 minutes of closures at rail level crossings every day. This creates unacceptable delays on emergency service response times.
- The parent company, POSCO, has an appalling international track record for corruption, environmental destruction and human rights abuse documented in India, Uzbekistan, South Korea, Vietnam and West Papua.
- Rich heritage areas and farmland will be destroyed.
- The uncertainty caused by the prospect of a coal mine in the district has caused anxiety, depression and ill-health in the community. This public health issue is already creating a burden on states to fund the mental and physical health requirements.
- A new report by The Australia Institute found that Hume Coal's mine could damage the economy of the Southern Highlands.

I urge the Government to reject this project and protect the Southern Highlands, by supporting a vision for a sustainable and coal-free future for this region.

GPO Box 39

Sydney NSW 2001

I object to the Hume Coal Project and the Berrima Rail Project (SSD 15_7171) and believe both should be rejected because:

- Toxic mine waste water is a pollution risk to the local river system which is part of the Sydney drinking water catchment. You only need to look downstream of many existing mines to see changed ecosystems.
- Risks to groundwater are too great: the project will seriously affect at least 93 bores owned by 71 landowners, with some drawn down by up to 80 metres.
- Dangerous coal dust and diesel emissions from coal trains pose a threat to human health. I live near Scone in the Hunter Valley and am very familiar with the downsides of having a mine nearby and the associated rail traffic going through our town.
- Hume Coal's trains will add an extra 24 minutes of closures at rail level crossings every day. This creates unacceptable delays on emergency service response times and the trains actually cut Scone in half, so "bad luck " if your not on the hospital side!
- The parent company, POSCO, has an appalling international track record for corruption, environmental destruction and human rights abuse documented in India, Uzbekistan, South Korea, Vietnam and West Papua. So why do we need to encourage their expansion in Australia?
- Rich heritage areas and farmland will be destroyed. We as farmers are working towards healthier and more sustainable environments and methods of production. So why go backwards when we should be encouraging clean renewable forms of energy?
- A new report by The Australia Institute found that Hume Coal's mine could damage the economy of the Southern Highlands.

I urge the Government to reject this project and protect the Southern Highlands, by supporting a vision for a sustainable and coal-free future for this region.

Yours sincerely,

Cath Payne

- Risks to groundwater are too great: the project will seriously affect at least 93 bores owned by 71 landowners, with some drawn down by up to 80 metres.
- An April 2017 Galaxy Research poll found support for the coal mine among Wingecarribee Shire residents is just 18%.
- Dangerous coal dust and diesel emissions from coal trains pose a threat to human health.
- Hume Coal's trains will add an extra 24 minutes of closures at rail level crossings every day. This creates unacceptable delays on emergency service response times.
- The parent company, POSCO, has an appalling international track record for corruption, environmental destruction and human rights abuse documented in India, Uzbekistan, South Korea, Vietnam and West Papua.
- Rich heritage areas and farmland will be destroyed.
- The uncertainty caused by the prospect of a coal mine in the district has caused anxiety, depression and ill-health in the community.
- A new report by The Australia Institute found that Hume Coal's mine could damage the economy of the Southern Highlands.

I urge the Government to reject this project and protect the Southern Highlands, by supporting a vision for a sustainable and coal-free future for this region.

Yours sincerely,

Vanessa Blyth

Sydney NSW 2001

I object to the Hume Coal Project and the Berrima Rail Project (SSD 15_7171) and believe both should be rejected because:

- Toxic mine waste water is a pollution risk to the local river system which is part of the Sydney drinking water catchment.
- Risks to groundwater are too great: the project will seriously affect at least 93 bores owned by 71 landowners, with some drawn down by up to 80 metres.
- An April 2017 Galaxy Research poll found support for the coal mine among Wingecarribee Shire residents is just 18%.
- Dangerous coal dust and diesel emissions from coal trains pose a threat to human health.
- Hume Coal's trains will add an extra 24 minutes of closures at rail level crossings every day. This creates unacceptable delays on emergency service response times.

- Toxic mine waste water is a pollution risk to the local river system which is part of the Sydney drinking water catchment.
- Risks to groundwater are too great: the project will seriously affect at least 93 bores owned by 71 landowners, with some drawn down by up to 80 metres.
- An April 2017 Galaxy Research poll found support for the coal mine among Wingecarribee Shire residents is just 18%.
- Dangerous coal dust and diesel emissions from coal trains pose a threat to human health.
- Hume Coal's trains will add an extra 24 minutes of closures at rail level crossings every day. This creates unacceptable delays on emergency service response times.
- The parent company, POSCO, has an appalling international track record for corruption, environmental destruction and human rights abuse documented in India, Uzbekistan, South Korea, Vietnam and West Papua.
- Rich heritage areas and farmland will be destroyed.
- The uncertainty caused by the prospect of a coal mine in the district has caused anxiety, depression and ill-health in the community.
- A new report by The Australia Institute found that Hume Coal's mine could damage the economy of the Southern Highlands.

I urge the Government to reject this project and protect the Southern Highlands, by supporting a vision for a sustainable and coal-free future for this region.

Yours sincerely,

Stephen Rogers

- Toxic mine waste water is a pollution risk to the local river system which is part of the Sydney drinking water catchment.
- Risks to groundwater are too great: the project will seriously affect at least 93 bores owned by 71 landowners, with some drawn down by up to 80 metres.
- An April 2017 Galaxy Research poll found support for the coal mine among Wingecarribee Shire residents is just 18%.
- Dangerous coal dust and diesel emissions from coal trains pose a threat to human health.
- Hume Coal's trains will add an extra 24 minutes of closures at rail level crossings every day. This creates unacceptable delays on emergency service response times.
- The parent company, POSCO, has an appalling international track record for corruption, environmental destruction and human rights abuse documented in India, Uzbekistan, South Korea, Vietnam and West Papua.
- Rich heritage areas and farmland will be destroyed.
- The uncertainty caused by the prospect of a coal mine in the district has caused anxiety, depression and ill-health in the community.
- A new report by The Australia Institute found that Hume Coal's mine could damage the economy of the Southern Highlands.

I urge the Government to reject this project and protect the Southern Highlands, by supporting a vision for a sustainable and coal-free future for this region.

Yours sincerely,

Judith Kohlhausen

Hume Coal Project MUST NOT PROCEED

Attn: Executive Director, Resource Assessments and Business Systems

Planning Services

Department of Planning and Environment

GPO Box 39

Sydney NSW 2001

The Hume Coal Project must not proceed, under any circumstances. I object to this proposal in the strongest possible manner. Reasons include:

- Toxic mine waste water is a pollution risk to the local river system. This drinking water is part of the Sydney drinking water catchment.
- The risks to groundwater are too great. The project will seriously affect at least 93 bores owned by 71 landowners, with some drawn down by up to 80 metres.
- Dangerous coal dust and diesel emissions from coal trains pose a threat to human health. Clean energy should be our focus. This is the 21st C, not the 19th C.
- Hume Coal's trains will add an extra 24 minutes of closures at rail level crossings every day. This is a small community. This creates unacceptable delays on emergency service response times.
- The parent company, POSCO, has an appalling international track record for corruption, environmental destruction and human rights abuse documented in India, Uzbekistan, South Korea, Vietnam and West Papua. No matter what assurances are provided by POSCO, there is no reason why anyone would / could possibly believe any form of rhetoric/assurances from this company.
- Rich heritage areas and farmland will be destroyed. Any form of destruction is unacceptable.
- The uncertainty caused by the prospect of a coal mine in the district has caused anxiety, depression and ill-health in the community.
- A new report by The Australia Institute found that Hume Coal's mine could damage the economy of the Southern Highlands.

I urge the Government, in the STRONGEST possible terms, to reject this project and protect the Southern Highlands. The Government must support a vision for a sustainable and coal-free future for this region.

Yours sincerely,

Elizabeth Dale

- Toxic mine waste water is a pollution risk to the local river system which is part of the Sydney drinking water catchment.
- Risks to groundwater are too great: the project will seriously affect at least 93 bores owned by 71 landowners, with some drawn down by up to 80 metres.
- An April 2017 Galaxy Research poll found support for the coal mine among Wingecarribee Shire residents is just 18%.
- Dangerous coal dust and diesel emissions from coal trains pose a threat to human health.
- Hume Coal's trains will add an extra 24 minutes of closures at rail level crossings every day. This creates unacceptable delays on emergency service response times.
- The parent company, POSCO, has an appalling international track record for corruption, environmental destruction and human rights abuse documented in India, Uzbekistan, South Korea, Vietnam and West Papua.
- Rich heritage areas and farmland will be destroyed.
- The uncertainty caused by the prospect of a coal mine in the district has caused anxiety, depression and ill-health in the community.
- A new report by The Australia Institute found that Hume Coal's mine could damage the economy of the Southern Highlands.

I urge the Government to reject this project and protect the Southern Highlands, by supporting a vision for a sustainable and coal-free future for this region.

Yours sincerely,

Peter GOOD

Once you allow contamination of the water supply, the land will become unsustainable.... good food will always be in demand with a growing world population... it's not rocket science.... water is too precious to our lives, to risk.

Yours sincerely,

Kim Leighton

I object to the Hume Coal Project and the Berrima Rail Project (SSD 15_7171) and believe both should be rejected because:

- Toxic mine waste water is a pollution risk to the local river system which is part of the Sydney drinking water catchment.
- Risks to groundwater are too great: the project will seriously affect at least 93 bores owned by 71 landowners, with some drawn down by up to 80 metres.
- An April 2017 Galaxy Research poll found support for the coal mine among Wingecarribee Shire residents is just 18%.
- Dangerous coal dust and diesel emissions from coal trains pose a threat to human health.
- Hume Coal's trains will add an extra 24 minutes of closures at rail level crossings every day. This creates unacceptable delays on emergency service response times.
- The parent company, POSCO, has an appalling international track record for corruption, environmental destruction and human rights abuse documented in India, Uzbekistan, South Korea, Vietnam and West Papua.
- Rich heritage areas and farmland will be destroyed.
- The uncertainty caused by the prospect of a coal mine in the district has caused anxiety, depression and ill-health in the community.
- A new report by The Australia Institute found that Hume Coal's mine could damage the economy of the Southern Highlands.

I urge the Government to reject this project and protect the Southern Highlands, by supporting a vision for a sustainable and coal-free future for this region.

Yours sincerely,

ann walsh

I object to the Hume Coal Project and the Berrima Rail Project (SSD 15_7171) and believe both should be rejected because:

- Toxic mine waste water is a pollution risk to the local river system which is part of the Sydney drinking water catchment.
- Risks to groundwater are too great: the project will seriously affect at least 93 bores owned by 71 landowners, with some drawn down by up to 80 metres.
- An April 2017 Galaxy Research poll found support for the coal mine among Wingecarribee Shire residents is just 18%.
- Dangerous coal dust and diesel emissions from coal trains pose a threat to human health.
- Hume Coal's trains will add an extra 24 minutes of closures at rail level crossings every day. This creates unacceptable delays on emergency service response times.
- The parent company, POSCO, has an appalling international track record for corruption, environmental destruction and human rights abuse documented in India, Uzbekistan, South Korea, Vietnam and West Papua.
- Rich heritage areas and farmland will be destroyed.
- The uncertainty caused by the prospect of a coal mine in the district has caused anxiety, depression and ill-health in the community.
- A new report by The Australia Institute found that Hume Coal's mine could damage the economy of the Southern Highlands.

I urge the Government to reject this project and protect the Southern Highlands, by supporting a vision for a sustainable and coal-free future for this region.

Yours sincerely,

Carine Visschers

- Hume Coal's trains will add an extra 24 minutes of closures at rail level crossings every day. This creates unacceptable delays on emergency service response times.
- The parent company, POSCO, has an appalling international track record for corruption, environmental destruction and human rights abuse documented in India, Uzbekistan, South Korea, Vietnam and West Papua.
- Rich heritage areas and farmland will be destroyed.
- The uncertainty caused by the prospect of a coal mine in the district has caused anxiety, depression and ill-health in the community.
- A new report by The Australia Institute found that Hume Coal's mine could damage the economy of the Southern Highlands.

I urge the Government to reject this project and protect the Southern Highlands, by supporting a vision for a sustainable and coal-free future for this region.

Yours sincerely,

Allan Medforth

Department of Planning and Environment

GPO Box 39

Sydney NSW 2001

I object to the Hume Coal Project and the Berrima Rail Project (SSD 15_7171) and believe both should be rejected because:

- Toxic mine waste water is a pollution risk to the local river system which is part of the Sydney drinking water catchment.
- Risks to groundwater are too great: the project will seriously affect at least 93 bores owned by 71 landowners, with some drawn down by up to 80 metres.
- An April 2017 Galaxy Research poll found support for the coal mine among Wingecarribee Shire residents is just 18%.
- Dangerous coal dust and diesel emissions from coal trains pose a threat to human health.
- Hume Coal's trains will add an extra 24 minutes of closures at rail level crossings every day. This creates unacceptable delays on emergency service response times.
- The parent company, POSCO, has an appalling international track record for corruption, environmental destruction and human rights abuse documented in India, Uzbekistan, South Korea, Vietnam and West Papua.
- Rich heritage areas and farmland will be destroyed.
- The uncertainty caused by the prospect of a coal mine in the district has caused anxiety, depression and ill-health in the community.

I object to the Hume Coal Project and the Berrima Rail Project (SSD 15_7171) and believe both should be rejected because:

. I have a strong connection to the Southern Highlands as my parents have owned a property in High Range for 40 years, it is where I spent my weekends and school holidays and it is now where my children spend their weekends and holidays.

- Toxic mine waste water is a pollution risk to the local river system which is part of the Sydney drinking water catchment.
- Risks to groundwater are too great: the project will seriously affect at least 93 bores owned by 71 landowners, with some drawn down by up to 80 metres.
- An April 2017 Galaxy Research poll found support for the coal mine among Wingecarribee Shire residents is just 18%.
- Dangerous coal dust and diesel emissions from coal trains pose a threat to human health.
- Hume Coal's trains will add an extra 24 minutes of closures at rail level crossings every day. This creates unacceptable delays on emergency service response times.
- The parent company, POSCO, has an appalling international track record for corruption, environmental destruction and human rights abuse documented in India, Uzbekistan, South Korea, Vietnam and West Papua.
- Rich heritage areas and farmland will be destroyed.
- The uncertainty caused by the prospect of a coal mine in the district has caused anxiety, depression and ill-health in the community.
- A new report by The Australia Institute found that Hume Coal's mine could damage the economy of the Southern Highlands.

I urge the Government to reject this project and protect the Southern Highlands, by supporting a vision for a sustainable and coal-free future for this region.

Yours sincerely,

Jessica Hromas

Submission Hume Coal Project EIS SSD 15_7172 and the Berrima Rail Project SSD 15_7171

Attn: Executive Director, Resource Assessments and Business Systems

Planning Services

Department of Planning and Environment

GPO Box 39

Sydney NSW 2001

My family and I object to the Hume Coal Project and the Berrima Rail Project (SSD 15_7171) and believe both should be rejected for these major and critical reasons:

- Toxic mine waste water is a pollution risk to the local river system which is part of the Sydney drinking water catchment.
- Risks to groundwater are too great: the project will seriously affect at least 93 bores owned by 71 landowners, with some drawn down by up to 80 metres.
- An April 2017 Galaxy Research poll found support for the coal mine among Wingecarribee Shire residents is just 18%.
- Dangerous coal dust and diesel emissions from coal trains pose a threat to human health.
- Hume Coal's trains will add an extra 24 minutes of closures at rail level crossings every day. This creates unacceptable delays on emergency service response times.
- The parent company, POSCO, has an appalling international track record for corruption, environmental destruction and human rights abuse documented in India, Uzbekistan, South Korea, Vietnam and West Papua.
- Rich heritage areas and farmland will be destroyed.
- The uncertainty caused by the prospect of a coal mine in the district has caused anxiety, depression and ill-health in the community.
- A new report by The Australia Institute found that Hume Coal's mine could damage the economy of the Southern Highlands.

I urge the Government to reject this project and protect the Southern Highlands, by supporting a vision for a sustainable and coal-free future for this region.

The Southern Highlands is a beautiful region and needs to remain that way for the common good.

Yours sincerely,

Tania Kanavas

GPO Box 39

Sydney NSW 2001

I support the Hume Coal Project and the Berrima Rail Project (SSD 15_7171) and believe both should be accepted because:

- mine waste water can be managed effectively through rigorous and adequate existing environmental protection legislation, therefore the local river and Sydney catchment can be appropriately protected.
- Risks to groundwater will be addressed through a robust trigger action response plan that will enable the mine to adapt and mitigate any adverse effects.
- An April 2017 poll that I conducted* found support for the coal mine among Wingecarribee Shire residents is a record high of 118%.

*residents contacted were limited to people I already knew.

- Dangerous coal dust and diesel emissions from coal trains pose an insignificant threat to human health.
- Hume Coal's trains will pay a levy to the rail authority who will use the additional income to upgrade critical parts of the rail route. This could include upgrades to rail crossings that will decrease unacceptable delays in emergency service response times.
- The parent company, POSCO, will at a minimum comply with (or otherwise face prosecution) Australian law. Countries which do not have first world enforced legislation similar to Australia are: India, Uzbekistan, South Korea, Vietnam and West Papua.
- Rich heritage areas and farmland will be able to continue unabated with a bord and pillar underground coal mine

The state royalties generated from the mine will help to fund the public health system. The added jobs in the region can prevent social isolation and add a sense of purpose and direction to members of the community. These factors can be linked anxiety, depression and ill-health.

- The Australia Institute is bent on undermining the Australian economy

I urge the Government to accept this project and protect the Southern Highlands, by supporting a vision for a sustainable and diverse future for this region.

Yours sincerely,

Rodney Dunlop
