Attn: Executive Director, Resource Assessments and Business Systems

Planning Services

Department of Planning and Environment

GPO Box 39

Sydney NSW 2001

I object to the proposed new Hume Coal mine in the Southern Highlands because:

• Toxic mine waste water is a pollution risk to the local river system which is part of the Sydney drinking water catchment.

• Risks to groundwater are too great: the project will seriously affect at least 93 bores owned by 71 landowners, with some drawn down by up to 80 metres.

• An April 2017 Galaxy Research poll found support for the coal mine among Wingecarribee Shire residents is just 18%.

• Dangerous coal dust and diesel emissions from coal trains pose a threat to human health.

• Hume Coal's trains will add an extra 24 minutes of closures at rail level crossings every day. This creates unacceptable delays on emergency service response times.

• The parent company, POSCO, has an appalling international track record for corruption, environmental destruction and human rights abuse documented in India, Uzbekistan, South Korea, Vietnam and West Papua.

• Rich heritage areas and farmland will be destroyed.

• The uncertainty caused by the prospect of a coal mine in the district has caused anxiety, depression and ill-health in the community.

• A new report by The Australia Institute found that Hume Coal's mine could damage the economy of the Southern Highlands.

I urge the Government to reject this project and protect the Southern Highlands, by supporting a vision for a sustainable and coal-free future for this region.

Yours sincerely,

Asitha Samarawickrama

• An April 2017 Galaxy Research poll found support for the coal mine among Wingecarribee Shire residents is just 18%.

• Dangerous coal dust and diesel emissions from coal trains pose a threat to human health.

• Hume Coal's trains will add an extra 24 minutes of closures at rail level crossings every day. This creates unacceptable delays on emergency service response times.

• The parent company, POSCO, has an appalling international track record for corruption, environmental destruction and human rights abuse documented in India, Uzbekistan, South Korea, Vietnam and West Papua.

• Rich heritage areas and farmland will be destroyed.

• The uncertainty caused by the prospect of a coal mine in the district has caused anxiety, depression and ill-health in the community.

• A new report by The Australia Institute found that Hume Coal's mine could damage the economy of the Southern Highlands.

I urge the Government to reject this project and protect the Southern Highlands, by supporting a vision for a sustainable and coal-free future for this region.

Yours sincerely,

Diana Amberson

I object to the proposed new Hume Coal mine in the Southern Highlands because:

• Toxic mine waste water is a pollution risk to the local river system which is part of the Sydney drinking water catchment.

• Risks to groundwater are too great: the project will seriously affect at least 93 bores owned by 71 landowners, with some drawn down by up to 80 metres.

• An April 2017 Galaxy Research poll found support for the coal mine among Wingecarribee Shire residents is just 18%.

• Dangerous coal dust and diesel emissions from coal trains pose a threat to human health.

• Hume Coal's trains will add an extra 24 minutes of closures at rail level crossings every day. This creates unacceptable delays on emergency service response times.

• The uncertainty caused by the prospect of a coal mine in the district has caused anxiety, depression and ill-health in the community.

• A new report by The Australia Institute found that Hume Coal's mine could damage the economy of the Southern Highlands.

I urge the Government to reject this project and protect the Southern Highlands, by supporting a vision for a sustainable and coal-free future for this region.

Yours sincerely,

GPO Box 39

Sydney NSW 2001

I object to the proposed new Hume Coal mine in the Southern Highlands because:

• Toxic mine waste water is a pollution risk to the local river system which is part of the Sydney drinking water catchment.

• Risks to groundwater are too great: the project will seriously affect at least 93 bores owned by 71 landowners, with some drawn down by up to 80 metres.

• An April 2017 Galaxy Research poll found support for the coal mine among Wingecarribee Shire residents is just 18%.

• Dangerous coal dust and diesel emissions from coal trains pose a threat to human health.

• Hume Coal's trains will add an extra 24 minutes of closures at rail level crossings every day. This creates unacceptable delays on emergency service response times.

• The parent company, POSCO, has an appalling international track record for corruption, environmental destruction and human rights abuse documented in India, Uzbekistan, South Korea, Vietnam and West Papua.

• Rich heritage areas and farmland will be destroyed.

• The uncertainty caused by the prospect of a coal mine in the district has caused anxiety, depression and ill-health in the community.

• A new report by The Australia Institute found that Hume Coal's mine could damage the economy of the Southern Highlands.

I urge the Government to reject this project and protect the Southern Highlands, by supporting a vision for a sustainable and coal-free future for this region.

Submission Hume Coal Project EIS SSD 15_7172

Attn: Executive Director, Resource Assessments and Business Systems

Planning Services

Department of Planning and Environment

GPO Box 39

Sydney NSW 2001

I object to the proposed new Hume Coal mine in the Southern Highlands because:

• Toxic mine waste water is a pollution risk to the local river system which is part of the Sydney drinking water catchment.

• Risks to groundwater are too great: the project will seriously affect at least 93 bores owned by 71 landowners, with some drawn down by up to 80 metres.

• An April 2017 Galaxy Research poll found support for the coal mine among Wingecarribee Shire residents is just 18%.

• Dangerous coal dust and diesel emissions from coal trains pose a threat to human health.

• Hume Coal's trains will add an extra 24 minutes of closures at rail level crossings every day. This creates unacceptable delays on emergency service response times.

• The parent company, POSCO, has an appalling international track record for corruption, environmental destruction and human rights abuse documented in India, Uzbekistan, South Korea, Vietnam and West Papua.

• Rich heritage areas and farmland will be destroyed.

• The uncertainty caused by the prospect of a coal mine in the district has caused anxiety, depression and ill-health in the community.

• A new report by The Australia Institute found that Hume Coal's mine could damage the economy of the Southern Highlands.

I urge the Government to reject this project and protect the Southern Highlands, by supporting a vision for a sustainable and coal-free future for this region.

Yours sincerely,

kevork Tomasian

I object to the proposed new Hume Coal mine in the Southern Highlands because:

• Toxic mine waste water is a pollution risk to the local river system which is part of the Sydney drinking water catchment. Why do you risk Sydneysider's fresh water?

• Risks to groundwater are too great: the project will seriously affect at least 93 bores owned by 71 landowners, with some drawn down by up to 80 metres.

• An April 2017 Galaxy Research poll found support for the coal mine among Wingecarribee Shire residents is just 18%. Why pursue and issue which is not popular with the local communit?

• Dangerous coal dust and diesel emissions from coal trains pose a threat to human health and agricultural animals.

• Hume Coal's trains will add an extra 24 minutes of closures at rail level crossings every day. This creates unacceptable delays on emergency service response times. No delay is acceptable for first responders and emergency teams who save lives.

• The parent company, POSCO, has an appalling international track record for corruption, environmental destruction and human rights abuse documented in India, Uzbekistan, South Korea, Vietnam and West Papua.

• Rich heritage areas and farmland will be destroyed so a mining company will make profit. Why?

• The uncertainty caused by the prospect of a coal mine in the district has caused anxiety, depression and ill-health in the community.

• A new report by The Australia Institute found that Hume Coal's mine could damage the economy of the Southern Highlands.

I urge the Government to reject this project and protect the Southern Highlands, by supporting a vision for a sustainable and coal-free future for this region; a solution this region prefers.

• Toxic mine waste water is a pollution risk to the local river system which is part of the Sydney drinking water catchment.

• Risks to groundwater are too great: the project will seriously affect at least 93 bores owned by 71 landowners, with some drawn down by up to 80 metres.

• An April 2017 Galaxy Research poll found support for the coal mine among Wingecarribee Shire residents is just 18%.

• Dangerous coal dust and diesel emissions from coal trains pose a threat to human health.

• Hume Coal's trains will add an extra 24 minutes of closures at rail level crossings every day. This creates unacceptable delays on emergency service response times.

• The parent company, POSCO, has an appalling international track record for corruption, environmental destruction and human rights abuse documented in India, Uzbekistan, South Korea, Vietnam and West Papua.

• Rich heritage areas and farmland will be destroyed.

• The uncertainty caused by the prospect of a coal mine in the district has caused anxiety, depression and ill-health in the community.

• A new report by The Australia Institute found that Hume Coal's mine could damage the economy of the Southern Highlands.

I urge the Government to reject this project and protect the Southern Highlands, by supporting a vision for a sustainable and coal-free future for this region.

Yours sincerely,

Kate Bryant

• The parent company, POSCO, has an appalling international track record for corruption, environmental destruction and human rights abuse documented in India, Uzbekistan, South Korea, Vietnam and West Papua.

• Rich heritage areas and farmland will be destroyed.

• The uncertainty caused by the prospect of a coal mine in the district has caused anxiety, depression and ill-health in the community.

• A new report by The Australia Institute found that Hume Coal's mine could damage the economy of the Southern Highlands.

I urge the Government to reject this project and protect the Southern Highlands, by supporting a vision for a sustainable and coal-free future for this region.

Yours sincerely,

pamela cochrane

GPO Box 39

Sydney NSW 2001

I object to the proposed new Hume Coal mine in the Southern Highlands because:

• Toxic mine waste water is a pollution risk to the local river system which is part of the Sydney drinking water catchment.

• Risks to groundwater are too great: the project will seriously affect at least 93 bores owned by 71 landowners, with some drawn down by up to 80 metres.

• An April 2017 Galaxy Research poll found support for the coal mine among Wingecarribee Shire residents is just 18%.

• Dangerous coal dust and diesel emissions from coal trains pose a threat to human health.

• Hume Coal's trains will add an extra 24 minutes of closures at rail level crossings every day. This creates unacceptable delays on emergency service response times.

• The parent company, POSCO, has an appalling international track record for corruption, environmental destruction and human rights abuse documented in India, Uzbekistan, South Korea, Vietnam and West Papua.

• Rich heritage areas and farmland will be destroyed.

• The uncertainty caused by the prospect of a coal mine in the district has caused anxiety, depression and ill-health in the community.

Attn: Executive Director, Resource Assessments and Business Systems

Planning Services

Department of Planning and Environment

GPO Box 39

Sydney NSW 2001

I object to the proposed new Hume Coal mine in the Southern Highlands because:

• Toxic mine waste water is a pollution risk to the local river system which is part of the Sydney drinking water catchment.

• Risks to groundwater are too great: the project will seriously affect at least 93 bores owned by 71 landowners, with some drawn down by up to 80 metres.

• An April 2017 Galaxy Research poll found support for the coal mine among Wingecarribee Shire residents is just 18%.

• Dangerous coal dust and diesel emissions from coal trains pose a threat to human health.

• Hume Coal's trains will add an extra 24 minutes of closures at rail level crossings every day. This creates unacceptable delays on emergency service response times.

• The parent company, POSCO, has an appalling international track record for corruption, environmental destruction and human rights abuse documented in India, Uzbekistan, South Korea, Vietnam and West Papua.

• Rich heritage areas and farmland will be destroyed.

• The uncertainty caused by the prospect of a coal mine in the district has caused anxiety, depression and ill-health in the community.

• A new report by The Australia Institute found that Hume Coal's mine could damage the economy of the Southern Highlands.

I urge the Government to reject this project and protect the Southern Highlands, by supporting a vision for a sustainable and coal-free future for this region.

Yours sincerely,

Susan Hawick

• An April 2017 Galaxy Research poll found support for the coal mine among Wingecarribee Shire residents is just 18%.

• Dangerous coal dust and diesel emissions from coal trains pose a threat to human health.

• Hume Coal's trains will add an extra 24 minutes of closures at rail level crossings every day. This creates unacceptable delays on emergency service response times.

• The parent company, POSCO, has an appalling international track record for corruption, environmental destruction and human rights abuse documented in India, Uzbekistan, South Korea, Vietnam and West Papua.

• Rich heritage areas and farmland will be destroyed.

• The uncertainty caused by the prospect of a coal mine in the district has caused anxiety, depression and ill-health in the community.

• A new report by The Australia Institute found that Hume Coal's mine could damage the economy of the Southern Highlands.

I urge the Government to reject this project and protect the Southern Highlands, by supporting a vision for a sustainable and coal-free future for this region.

Yours sincerely,

Michael Brown

I object to the proposed new Hume Coal mine in the Southern Highlands because:

• Toxic mine waste water is a pollution risk to the local river system which is part of the Sydney drinking water catchment.

• Risks to groundwater are too great: the project will seriously affect at least 93 bores owned by 71 landowners, with some drawn down by up to 80 metres.

• An April 2017 Galaxy Research poll found support for the coal mine among Wingecarribee Shire residents is just 18%.

• Dangerous coal dust and diesel emissions from coal trains pose a threat to human health.

• Hume Coal's trains will add an extra 24 minutes of closures at rail level crossings every day. This creates unacceptable delays on emergency service response times.

• The parent company, POSCO, has an appalling international track record for corruption, environmental destruction and human rights abuse documented in India, Uzbekistan, South Korea, Vietnam and West Papua.

• Rich heritage areas and farmland will be destroyed.

I am not a resident of the Southern Highlands but visit the area regularly and strongly believe the character and heritage of the area must be protected. Please accept my submission below in which I wish to raise a strong objection to the proposed new Hume Coal mine in the Southern Highlands. My reasons for objecting are as follows:

• Toxic mine waste water is a pollution risk to the local river system which is part of the Sydney drinking water catchment.

• Risks to groundwater are too great: the project will seriously affect at least 93 bores owned by 71 landowners, with some drawn down by up to 80 metres.

• An April 2017 Galaxy Research poll found support for the coal mine among Wingecarribee Shire residents is just 18%.

• Dangerous coal dust and diesel emissions from coal trains pose a threat to human health.

• Hume Coal's trains will add an extra 24 minutes of closures at rail level crossings every day. This creates unacceptable delays on emergency service response times.

• The parent company, POSCO, has an appalling international track record for corruption, environmental destruction and human rights abuse documented in India, Uzbekistan, South Korea, Vietnam and West Papua.

• Rich heritage areas and farmland will be destroyed.

• The uncertainty caused by the prospect of a coal mine in the district has caused anxiety, depression and ill-health in the community.

• A new report by The Australia Institute found that Hume Coal's mine could damage the economy of the Southern Highlands.

I urge the Government to reject this project and protect the Southern Highlands, by supporting a vision for a sustainable and coal-free future for this region.

Yours sincerely,

Jan O'Leary

• Dangerous coal dust and diesel emissions from coal trains pose a threat to human health.

• Hume Coal's trains will add an extra 24 minutes of closures at rail level crossings every day. This creates unacceptable delays on emergency service response times.

• The parent company, POSCO, has an appalling international track record for corruption, environmental destruction and human rights abuse documented in India, Uzbekistan, South Korea, Vietnam and West Papua.

• Rich heritage areas and farmland will be destroyed.

• The uncertainty caused by the prospect of a coal mine in the district has caused anxiety, depression and ill-health in the community.

• A new report by The Australia Institute found that Hume Coal's mine could damage the economy of the Southern Highlands.

I urge the Government to completely reject this project and protect the Southern Highlands, by supporting a vision for a sustainable and coal-free future for this region.

Yours sincerely,

Jo-Ann Back

I object to the proposed new Hume Coal mine in the Southern Highlands because:

• Toxic mine waste water is a pollution risk to the local river system which is part of the Sydney drinking water catchment.

• Risks to groundwater are too great: the project will seriously affect at least 93 bores owned by 71 landowners, with some drawn down by up to 80 metres.

• An April 2017 Galaxy Research poll found support for the coal mine among Wingecarribee Shire residents is just 18%.

• Dangerous coal dust and diesel emissions from coal trains pose a threat to human health.

• Hume Coal's trains will add an extra 24 minutes of closures at rail level crossings every day. This creates unacceptable delays on emergency service response times.

• The parent company, POSCO, has an appalling international track record for corruption, environmental destruction and human rights abuse documented in India, Uzbekistan, South Korea, Vietnam and West Papua.

I object to the proposed new Hume Coal mine in the Southern Highlands because:

THE RISKS TO GROUNDWATER ARE TOO GREAT

According to Hume Coal's EIS on water management, there will be groundwater inflows to the mine and associated temporary drawdown in groundwater levels, which will require management and mitigation to address potential impacts to groundwater users.

As access to water is recognized as a precondition of the fulfillment of universal human rights and indispensable for leading a life with dignity (de Albuquerque, 2009a,b; WEF, 2009; CESCR, 2002a) the fact that there are 93 bores, owned by 71 landowners within Hume Coal's area of mining must present, to these 71 owners, a huge "loss of leading a life of dignity". And the only surety to this vital commodity is Hume Coal's present assurances that they will "make good provisions" apply in certain circumstances, such as if a cumulative decline in the water level within a water supply work (such as a supply bore or well) of more than two meters is predicted. (NSW Office of Water 2012).

In these cases, Hume Coal say they would offer any affected third parties appropriate compensatory arrangements such as access to an equivalent water supply through enhanced infrastructure or other means such as deepening an existing bore.

If there is no water, then Hume Coal cannot make good their compensatory arrangements.

I urge the Government to reject this project and protect the Southern Highlands, by supporting a vision for a sustainable and coal-free future for this region.

I object to the proposed new Hume Coal mine in the Southern Highlands because:

• The upper Hunter has been absolutely ruined by mining. It's a disgrace. Fly over it and take a look; it's enough to make you cry. The beautiful Southern Highlands must be protected from the same rapacious treatment.

And beyond protecting the nature and natural beauty of the place, there are a bunch of very practical reasons why this proposed mining permit should be denied:

• Toxic mine waste water is a pollution risk to the local river system which is part of the Sydney drinking water catchment.

• Risks to groundwater are too great: the project will seriously affect at least 93 bores owned by 71 landowners, with some drawn down by up to 80 metres.

• Toxic mine waste water is a pollution risk to the local river system which is part of the Sydney drinking water catchment.

• Risks to groundwater are too great: the project will seriously affect at least 93 bores owned by 71 landowners, with some drawn down by up to 80 metres.

• An April 2017 Galaxy Research poll found support for the coal mine among Wingecarribee Shire residents is just 18%.

• Dangerous coal dust and diesel emissions from coal trains pose a threat to human health.

• Hume Coal's trains will add an extra 24 minutes of closures at rail level crossings every day. This creates unacceptable delays on emergency service response times.

• The parent company, POSCO, has an appalling international track record for corruption, environmental destruction and human rights abuse documented in India, Uzbekistan, South Korea, Vietnam and West Papua.

• Rich heritage areas and farmland will be destroyed.

• The uncertainty caused by the prospect of a coal mine in the district has caused anxiety, depression and ill-health in the community.

• A new report by The Australia Institute found that Hume Coal's mine could damage the economy of the Southern Highlands.

I urge the Government to reject this project and protect the Southern Highlands, by supporting a vision for a sustainable and coal-free future for this region.

Yours sincerely,

Elizabeth Mackey

To Whom it May Concern,

I object to the proposed new Hume Coal mine in the Southern Highlands because of the following:

• Toxic mine waste water is a huge pollution risk to the local river system which is part of the Sydney drinking water catchment.

• Risks to groundwater are too great: the project will seriously affect at least 93 bores owned by 71 landowners, with some drawn down by up to 80 metres.

• An April 2017 Galaxy Research poll found support for the coal mine among Wingecarribee Shire residents is just 18%.

• Dangerous coal dust and diesel emissions from coal trains pose a threat to human health.

• Hume Coal's trains will add an extra 24 minutes of closures at rail level crossings every day. This creates unacceptable delays on emergency service response times.

• The parent company, POSCO, has an appalling international track record for corruption, environmental destruction and human rights abuse documented in India, Uzbekistan, South Korea, Vietnam and West Papua.

• Rich heritage areas and farmland will be destroyed.

• The uncertainty caused by the prospect of a coal mine in the district has caused anxiety, depression and ill-health in the community.

• A new report by The Australia Institute found that Hume Coal's mine could damage the economy of the Southern Highlands.

I urge the Government to reject this project and protect the Southern Highlands, by supporting a vision for a sustainable and coal-free future for this region.

• An April 2017 Galaxy Research poll found support for the coal mine among Wingecarribee Shire residents is just 18%.

• Dangerous coal dust and diesel emissions from coal trains pose a threat to human health.

• Hume Coal's trains will add an extra 24 minutes of closures at rail level crossings every day. This creates unacceptable delays on emergency service response times.

• The parent company, POSCO, has an appalling international track record for corruption, environmental destruction and human rights abuse documented in India, Uzbekistan, South Korea, Vietnam and West Papua.

• Rich heritage areas and farmland will be destroyed.

• The uncertainty caused by the prospect of a coal mine in the district has caused anxiety, depression and ill-health in the community.

• A new report by The Australia Institute found that Hume Coal's mine could damage the economy of the Southern Highlands.

I urge the Government to reject this project and protect the Southern Highlands, by supporting a vision for a sustainable and coal-free future for this region.

Yours sincerely,

Nicola Hollinshead

I object to the proposed new Hume Coal mine in the Southern Highlands because:

• Toxic mine waste water is a pollution risk to the local river system which is part of the Sydney drinking water catchment.

• Risks to groundwater are too great: the project will seriously affect at least 93 bores owned by 71 landowners, with some drawn down by up to 80 metres.

• An April 2017 Galaxy Research poll found support for the coal mine among Wingecarribee Shire residents is just 18%.

• Dangerous coal dust and diesel emissions from coal trains pose a threat to human health.

• Hume Coal's trains will add an extra 24 minutes of closures at rail level crossings every day. This creates unacceptable delays on emergency service response times.

• The parent company, POSCO, has an appalling international track record for corruption, environmental destruction and human rights abuse documented in India, Uzbekistan, South Korea, Vietnam and West Papua.

Dear Sirs,

I object to the proposed new Hume Coal mine in the Southern Highlands in many ways as follows:

• Toxic mine waste water is a pollution risk to the local river system which is part of the Sydney drinking water catchment. The catchment is so sensitive, you cannot walk your dog in the catchment areas.

• We cannot afford the risks to groundwater, they are too great: the project will seriously affect at least 93 bores owned by 71 landowners, with some drawn down by up to 80 metres.

• An April 2017 Galaxy Research poll found support for the coal mine among Wingecarribee Shire residents is just 18%.

• Dangerous coal dust and diesel emissions from coal trains pose a threat to human health.

• Hume Coal's trains will add an extra 24 minutes of closures at rail level crossings every day. This creates unacceptable delays on emergency service response times.

• The parent company, POSCO, has an appalling international track record for corruption, environmental destruction and human rights abuse documented in India, Uzbekistan, South Korea, Vietnam and West Papua.

• Rich heritage areas and farmland will be destroyed and we need them more than dirty coal.

• The uncertainty caused by the prospect of a coal mine in the district has caused anxiety, depression and ill-health in the community.

• A new report by The Australia Institute found that Hume Coal's mine could damage the economy of the Southern Highlands.

I urge the Government to reject this project and protect the Southern Highlands, by supporting a vision for a sustainable and coal-free future for this region.

Yours sincerely,

Dennis Nickell

• Dangerous coal dust and diesel emissions from coal trains pose a threat to human health.

• Hume Coal's trains will add an extra 24 minutes of closures at rail level crossings every day. This creates unacceptable delays on emergency service response times.

• The parent company, POSCO, has an appalling international track record for corruption, environmental destruction and human rights abuse documented in India, Uzbekistan, South Korea, Vietnam and West Papua.

• Rich heritage areas and farmland will be destroyed.

• The uncertainty caused by the prospect of a coal mine in the district has caused anxiety, depression and ill-health in the community.

• A new report by The Australia Institute found that Hume Coal's mine could damage the economy of the Southern Highlands.

I urge the Government to reject this project and protect the Southern Highlands, by supporting a vision for a sustainable and coal-free future for this region.

Yours sincerely,

Robyn Hills

I object to the proposed new Hume Coal mine in the Southern Highlands because:

• Toxic mine waste water is a pollution risk to the local river system which is part of the Sydney drinking water catchment.

• Risks to groundwater are too great: the project will seriously affect at least 93 bores owned by 71 landowners, with some drawn down by up to 80 metres.

• Dangerous coal dust and diesel emissions from coal trains pose a threat to human health.

• Hume Coal's trains will add an extra 24 minutes of closures at rail level crossings every day. This creates unacceptable delays on emergency service response times.

• Rich heritage areas and farmland will be destroyed.

• The uncertainty caused by the prospect of a coal mine in the district has caused anxiety, depression and ill-health in the community.

Dear Sir/Madam, I wouid like to record an objection to the proposed new Hume Coal mine in the Southern Highlands because of the following:

• Toxic mine waste water is a pollution risk to the local river system which is part of the Sydney drinking water catchment.

• Risks to groundwater are too great: the project will seriously affect at least 93 bores owned by 71 landowners, with some drawn down by up to 80 metres.

• An April 2017 Galaxy Research poll found support for the coal mine among Wingecarribee Shire residents is just 18%.

• Dangerous coal dust and diesel emissions from coal trains pose a threat to human health.

• Hume Coal's trains will add an extra 24 minutes of closures at rail level crossings every day. This creates unacceptable delays on emergency service response times.

• The parent company, POSCO, has an appalling international track record for corruption, environmental destruction and human rights abuse documented in India, Uzbekistan, South Korea, Vietnam and West Papua.

• Rich heritage areas and pristine, beautiful farmland will be destroyed.

• The uncertainty caused by the prospect of a coal mine in the district has caused anxiety, depression and ill-health in the community.

• A new report by The Australia Institute found that Hume Coal's mine could damage the economy of the Southern Highlands.

I urge the Government to reject this project and protect the Southern Highlands, by supporting a vision for a sustainable and coal-free future for this region.

Yours sincerely,

Lynette Trindall

• The uncertainty caused by the prospect of a coal mine in the district has caused anxiety, depression and ill-health in the community.

• A new report by The Australia Institute found that Hume Coal's mine could damage the economy of the Southern Highlands.

I urge the Government to reject this project and protect the Southern Highlands, by supporting a vision for a sustainable and coal-free future for this region.

Yours sincerely,

Maxine McKinley

Sydney NSW 2001

I object to the proposed new Hume Coal mine in the Southern Highlands because:

• Toxic mine waste water is a pollution risk to the local river system which is part of the Sydney drinking water catchment.

• Risks to groundwater are too great: the project will seriously affect at least 93 bores owned by 71 landowners, with some drawn down by up to 80 metres.

• An April 2017 Galaxy Research poll found support for the coal mine among Wingecarribee Shire residents is just 18%.

• Dangerous coal dust and diesel emissions from coal trains pose a threat to human health.

• Hume Coal's trains will add an extra 24 minutes of closures at rail level crossings every day. This creates unacceptable delays on emergency service response times.

• The parent company, POSCO, has an appalling international track record for corruption, environmental destruction and human rights abuse documented in India, Uzbekistan, South Korea, Vietnam and West Papua.

• Rich heritage areas and farmland will be destroyed.

• The uncertainty caused by the prospect of a coal mine in the district has caused anxiety, depression and ill-health in the community.

• A new report by The Australia Institute found that Hume Coal's mine could damage the economy of the Southern Highlands.

I urge the Government to reject this project and protect the Southern Highlands, by supporting a vision for a sustainable and coal-free future for this region.

Submission Hume Coal Project EIS SSD 15_7172

Attn: Executive Director, Resource Assessments and Business Systems

Planning Services

Department of Planning and Environment

GPO Box 39

Sydney NSW 2001

I object to the proposed new Hume Coal mine in the Southern Highlands because:

• Toxic mine waste water is a pollution risk to the local river system which is part of the Sydney drinking water catchment.

• Risks to groundwater are too great: the project will seriously affect at least 93 bores owned by 71 landowners, with some drawn down by up to 80 metres.

• An April 2017 Galaxy Research poll found support for the coal mine among Wingecarribee Shire residents is just 18%.

• Dangerous coal dust and diesel emissions from coal trains pose a threat to human health.

• Hume Coal's trains will add an extra 24 minutes of closures at rail level crossings every day. This creates unacceptable delays on emergency service response times.

• The parent company, POSCO, has an appalling international track record for corruption, environmental destruction and human rights abuse documented in India, Uzbekistan, South Korea, Vietnam and West Papua.

• Rich heritage areas and farmland will be destroyed.

• The uncertainty caused by the prospect of a coal mine in the district has caused anxiety, depression and ill-health in the community.

• A new report by The Australia Institute found that Hume Coal's mine could damage the economy of the Southern Highlands.

I urge the Government to reject this project and protect the Southern Highlands, by supporting a vision for a sustainable and coal-free future for this region.

Yours sincerely,

Susan Hayman

• Risks to groundwater are too great: the project will seriously affect at least 93 bores owned by 71 landowners, with some drawn down by up to 80 metres.

• An April 2017 Galaxy Research poll found support for the coal mine among Wingecarribee Shire residents is just 18%.

• Dangerous coal dust and diesel emissions from coal trains pose a threat to human health.

• Hume Coal's trains will add an extra 24 minutes of closures at rail level crossings every day. This creates unacceptable delays on emergency service response times.

• The parent company, POSCO, has an appalling international track record for corruption, environmental destruction and human rights abuse documented in India, Uzbekistan, South Korea, Vietnam and West Papua.

• Rich heritage areas and farmland will be destroyed.

• The uncertainty caused by the prospect of a coal mine in the district has caused anxiety, depression and ill-health in the community.

• A new report by The Australia Institute found that Hume Coal's mine could damage the economy of the Southern Highlands.

I urge the Government to reject this project and protect the Southern Highlands, by supporting a vision for a sustainable and coal-free future for this region.

Yours sincerely,

Simon Cook

I object to the proposed new Hume Coal mine in the Southern Highlands because:

• Toxic mine waste water is a pollution risk to the local river system which is part of the Sydney drinking water catchment.

• Risks to groundwater are too great: the project will seriously affect at least 93 bores owned by 71 landowners, with some drawn down by up to 80 metres.

• An April 2017 Galaxy Research poll found support for the coal mine among Wingecarribee Shire residents is just 18%.

• Dangerous coal dust and diesel emissions from coal trains pose a threat to human health.

• Hume Coal's trains will add an extra 24 minutes of closures at rail level crossings every day. This creates unacceptable delays on emergency service response times.

• The parent company, POSCO, has an appalling international track record for corruption, environmental destruction and human rights abuse documented in India, Uzbekistan, South Korea, Vietnam and West Papua.

• Risks to groundwater are too great: the project will seriously affect at least 93 bores owned by 71 landowners, with some drawn down by up to 80 metres.

• An April 2017 Galaxy Research poll found support for the coal mine among Wingecarribee Shire residents is just 18%.

• Dangerous coal dust and diesel emissions from coal trains pose a threat to human health.

• Hume Coal's trains will add an extra 24 minutes of closures at rail level crossings every day. This creates unacceptable delays on emergency service response times.

• The parent company, POSCO, has an appalling international track record for corruption, environmental destruction and human rights abuse documented in India, Uzbekistan, South Korea, Vietnam and West Papua.

• Rich heritage areas and farmland will be destroyed.

• The uncertainty caused by the prospect of a coal mine in the district has caused anxiety, depression and ill-health in the community.

• A new report by The Australia Institute found that Hume Coal's mine could damage the economy of the Southern Highlands.

I urge the Government to reject this project and protect the Southern Highlands, by supporting a vision for a sustainable and coal-free future for this region.

Yours sincerely,

Kate Hore-lacy

I object to the proposed new Hume Coal mine in the Southern Highlands because:

• Toxic mine waste water is a pollution risk to the local river system which is part of the Sydney drinking water catchment.

• Risks to groundwater are too great: the project will seriously affect at least 93 bores owned by 71 landowners, with some drawn down by up to 80 metres.

• An April 2017 Galaxy Research poll found support for the coal mine among Wingecarribee Shire residents is just 18%.

• Dangerous coal dust and diesel emissions from coal trains pose a threat to human health.

• Hume Coal's trains will add an extra 24 minutes of closures at rail level crossings every day. This creates unacceptable delays on emergency service response times.

• Rich heritage areas and farmland will be destroyed.

• The uncertainty caused by the prospect of a coal mine in the district has caused anxiety, depression and ill-health in the community.

• A new report by The Australia Institute found that Hume Coal's mine could damage the economy of the Southern Highlands.

I urge the Government to reject this project and protect the Southern Highlands, by supporting a vision for a sustainable and coal-free future for this region.

Yours sincerely,

Andrew Atherton

Sydney NSW 2001

I object to the proposed new Hume Coal mine in the Southern Highlands because:

• Toxic mine waste water is a pollution risk to the local river system which is part of the Sydney drinking water catchment.

• Risks to groundwater are too great: the project will seriously affect at least 93 bores owned by 71 landowners, with some drawn down by up to 80 metres.

• An April 2017 Galaxy Research poll found support for the coal mine among Wingecarribee Shire residents is just 18%.

• Dangerous coal dust and diesel emissions from coal trains pose a threat to human health.

• Hume Coal's trains will add an extra 24 minutes of closures at rail level crossings every day. This creates unacceptable delays on emergency service response times.

• The parent company, POSCO, has an appalling international track record for corruption, environmental destruction and human rights abuse documented in India, Uzbekistan, South Korea, Vietnam and West Papua.

• Rich heritage areas and farmland will be destroyed.

• The uncertainty caused by the prospect of a coal mine in the district has caused anxiety, depression and ill-health in the community.

• A new report by The Australia Institute found that Hume Coal's mine could damage the economy of the Southern Highlands.

I urge the Government to reject this project and protect the Southern Highlands, by supporting a vision for a sustainable and coal-free future for this region.

Yours sincerely,

Chris Edmond

Sydney NSW 2001

I object to the proposed new Hume Coal mine in the Southern Highlands because:

• Toxic mine waste water is a pollution risk to the local river system which is part of the Sydney drinking water catchment.

• Risks to groundwater are too great: the project will seriously affect at least 93 bores owned by 71 landowners, with some drawn down by up to 80 metres.

• An April 2017 Galaxy Research poll found support for the coal mine among Wingecarribee Shire residents is just 18%.

• Dangerous coal dust and diesel emissions from coal trains pose a threat to human health.

• Hume Coal's trains will add an extra 24 minutes of closures at rail level crossings every day. This creates unacceptable delays on emergency service response times.

• The parent company, POSCO, has an appalling international track record for corruption, environmental destruction and human rights abuse documented in India, Uzbekistan, South Korea, Vietnam and West Papua.

• Rich heritage areas and farmland will be destroyed.

• The uncertainty caused by the prospect of a coal mine in the district has caused anxiety, depression and ill-health in the community.

• A new report by The Australia Institute found that Hume Coal's mine could damage the economy of the Southern Highlands.

I urge the Government to reject this project and protect the Southern Highlands, by supporting a vision for a sustainable and coal-free future for this region.

Yours sincerely,

Alexandra Dion

• Toxic mine waste water is a pollution risk to the local river system which is part of the Sydney drinking water catchment.

• Risks to groundwater are too great: the project will seriously affect at least 93 bores owned by 71 landowners, with some drawn down by up to 80 metres.

• An April 2017 Galaxy Research poll found support for the coal mine among Wingecarribee Shire residents is just 18%.

• Dangerous coal dust and diesel emissions from coal trains pose a threat to human health.

• Hume Coal's trains will add an extra 24 minutes of closures at rail level crossings every day. This creates unacceptable delays on emergency service response times.

• The parent company, POSCO, has an appalling international track record for corruption, environmental destruction and human rights abuse documented in India, Uzbekistan, South Korea, Vietnam and West Papua.

• Rich heritage areas and farmland will be destroyed.

• The uncertainty caused by the prospect of a coal mine in the district has caused anxiety, depression and ill-health in the community.

• A new report by The Australia Institute found that Hume Coal's mine could damage the economy of the Southern Highlands.

I urge the Government to reject this project and protect the Southern Highlands, by supporting a vision for a sustainable and coal-free future for this region.

The planet has to arrest global warming, which conservative analysis puts atalready been 0.8 degrees over the last 100 years.more coal as fuel must be phased out.

Yours sincerely,

Anthony Tucker

Sydney NSW 2001

I object to the proposed new Hume Coal mine in the Southern Highlands because:

• Toxic mine waste water is a pollution risk to the local river system which is part of the Sydney drinking water catchment.

• Risks to groundwater are too great: the project will seriously affect at least 93 bores owned by 71 landowners, with some drawn down by up to 80 metres.

• An April 2017 Galaxy Research poll found support for the coal mine among Wingecarribee Shire residents is just 18%.

• Dangerous coal dust and diesel emissions from coal trains pose a threat to human health.

• Hume Coal's trains will add an extra 24 minutes of closures at rail level crossings every day. This creates unacceptable delays on emergency service response times.

• The parent company, POSCO, has an appalling international track record for corruption, environmental destruction and human rights abuse documented in India, Uzbekistan, South Korea, Vietnam and West Papua.

• Rich heritage areas and farmland will be destroyed.

• The uncertainty caused by the prospect of a coal mine in the district has caused anxiety, depression and ill-health in the community.

• A new report by The Australia Institute found that Hume Coal's mine could damage the economy of the Southern Highlands.

I urge the Government to reject this project and protect the Southern Highlands, by supporting a vision for a sustainable and coal-free future for this region.

Yours sincerely,

Mark Ure

• Risks to groundwater are too great: the project will seriously affect at least 93 bores owned by 71 landowners, with some drawn down by up to 80 metres.

• An April 2017 Galaxy Research poll found support for the coal mine among Wingecarribee Shire residents is just 18%.

• Dangerous coal dust and diesel emissions from coal trains pose a threat to human health.

• Hume Coal's trains will add an extra 24 minutes of closures at rail level crossings every day. This creates unacceptable delays on emergency service response times.

• The parent company, POSCO, has an appalling international track record for corruption, environmental destruction and human rights abuse documented in India, Uzbekistan, South Korea, Vietnam and West Papua.

• Rich heritage areas and farmland will be destroyed.

• The uncertainty caused by the prospect of a coal mine in the district has caused anxiety, depression and ill-health in the community.

• A new report by The Australia Institute found that Hume Coal's mine could damage the economy of the Southern Highlands.

I urge the Government to reject this project and protect the Southern Highlands, by supporting a vision for a sustainable and coal-free future for this region.

Yours sincerely,

Robin Humphrey

I object to the proposed new Hume Coal mine in the Southern Highlands because:

• Toxic mine waste water is a pollution risk to the local river system which is part of the Sydney drinking water catchment.

• Risks to groundwater are too great: the project will seriously affect at least 93 bores owned by 71 landowners, with some drawn down by up to 80 metres.

• An April 2017 Galaxy Research poll found support for the coal mine among Wingecarribee Shire residents is just 18%.

• Dangerous coal dust and diesel emissions from coal trains pose a threat to human health.

• Dangerous coal dust and diesel emissions from coal trains pose a threat to human health.

• Hume Coal's trains will add an extra 24 minutes of closures at rail level crossings every day. This creates unacceptable delays on emergency service response times.

• The parent company, POSCO, has an appalling international track record for corruption, environmental destruction and human rights abuse documented in India, Uzbekistan, South Korea, Vietnam and West Papua.

• Rich heritage areas and farmland will be destroyed.

• The uncertainty caused by the prospect of a coal mine in the district has caused anxiety, depression and ill-health in the community.

• A new report by The Australia Institute found that Hume Coal's mine could damage the economy of the Southern Highlands.

I urge the Government to reject this project and protect the Southern Highlands, by supporting a vision for a sustainable and coal-free future for this region.

Yours sincerely,

Jennifer Fielding

I object to the proposed new Hume Coal mine in the Southern Highlands because:

• Toxic mine waste water is a pollution risk to the local river system which is part of the Sydney drinking water catchment.

• Risks to groundwater are too great: the project will seriously affect at least 93 bores owned by 71 landowners, with some drawn down by up to 80 metres.

• An April 2017 Galaxy Research poll found support for the coal mine among Wingecarribee Shire residents is just 18%.

• Dangerous coal dust and diesel emissions from coal trains pose a threat to human health.

• Hume Coal's trains will add an extra 24 minutes of closures at rail level crossings every day. This creates unacceptable delays on emergency service response times.

• The parent company, POSCO, has an appalling international track record for corruption, environmental destruction and human rights abuse documented in India, Uzbekistan, South Korea, Vietnam and West Papua.

• Rich heritage areas and farmland will be destroyed.

Attn: Executive Director, Resource Assessments and Business Systems

Planning Services

Department of Planning and Environment

GPO Box 39

Sydney NSW 2001

I object to the proposed new Hume Coal mine in the Southern Highlands because:

• Toxic mine waste water is a pollution risk to the local river system which is part of the Sydney drinking water catchment.

• Risks to groundwater are too great: the project will seriously affect at least 93 bores owned by 71 landowners, with some drawn down by up to 80 metres.

• An April 2017 Galaxy Research poll found support for the coal mine among Wingecarribee Shire residents is just 18%.

• Dangerous coal dust and diesel emissions from coal trains pose a threat to human health.

• Hume Coal's trains will add an extra 24 minutes of closures at rail level crossings every day. This creates unacceptable delays on emergency service response times.

• The parent company, POSCO, has an appalling international track record for corruption, environmental destruction and human rights abuse documented in India, Uzbekistan, South Korea, Vietnam and West Papua.

• Rich heritage areas and farmland will be destroyed.

• The uncertainty caused by the prospect of a coal mine in the district has caused anxiety, depression and ill-health in the community.

• A new report by The Australia Institute found that Hume Coal's mine could damage the economy of the Southern Highlands.

I urge the Government to reject this project and protect the Southern Highlands, by supporting a vision for a sustainable and coal-free future for this region.

Yours sincerely,

Ann Gould

Sydney NSW 2001

I object to the proposed new Hume Coal mine in the Southern Highlands because:

• Toxic mine waste water is a pollution risk to the local river system which is part of the Sydney drinking water catchment.

• Risks to groundwater are too great: the project will seriously affect at least 93 bores owned by 71 landowners, with some drawn down by up to 80 metres.

• An April 2017 Galaxy Research poll found support for the coal mine among Wingecarribee Shire residents is just 18%.

• Dangerous coal dust and diesel emissions from coal trains pose a threat to human health.

• Hume Coal's trains will add an extra 24 minutes of closures at rail level crossings every day. This creates unacceptable delays on emergency service response times.

• The parent company, POSCO, has an appalling international track record for corruption, environmental destruction and human rights abuse documented in India, Uzbekistan, South Korea, Vietnam and West Papua.

• Rich heritage areas and farmland will be destroyed.

• The uncertainty caused by the prospect of a coal mine in the district has caused anxiety, depression and ill-health in the community.

• A new report by The Australia Institute found that Hume Coal's mine could damage the economy of the Southern Highlands.

I urge the Government to reject this project and protect the Southern Highlands, by supporting a vision for a sustainable and coal-free future for this region.

Yours sincerely,

Maryanne Mckay

• Toxic mine waste water is a pollution risk to the local river system which is part of the Sydney drinking water catchment.

• Risks to groundwater are too great: the project will seriously affect at least 93 bores owned by 71 landowners, with some drawn down by up to 80 metres.

• An April 2017 Galaxy Research poll found support for the coal mine among Wingecarribee Shire residents is just 18%.

• Dangerous coal dust and diesel emissions from coal trains pose a threat to human health.

• Hume Coal's trains will add an extra 24 minutes of closures at rail level crossings every day. This creates unacceptable delays on emergency service response times.

• The parent company, POSCO, has an appalling international track record for corruption, environmental destruction and human rights abuse documented in India, Uzbekistan, South Korea, Vietnam and West Papua.

• Rich heritage areas and farmland will be destroyed.

• The uncertainty caused by the prospect of a coal mine in the district has caused anxiety, depression and ill-health in the community.

• A new report by The Australia Institute found that Hume Coal's mine could damage the economy of the Southern Highlands.

I urge the Government to reject this project and protect the Southern Highlands, by supporting a vision for a sustainable and coal-free future for this region.

Yours sincerely,

Aaron Crespi

• An April 2017 Galaxy Research poll found support for the coal mine among Wingecarribee Shire residents is just 18%.

• Dangerous coal dust and diesel emissions from coal trains pose a threat to human health.

• Hume Coal's trains will add an extra 24 minutes of closures at rail level crossings every day. This creates unacceptable delays on emergency service response times.

• The parent company, POSCO, has an appalling international track record for corruption, environmental destruction and human rights abuse documented in India, Uzbekistan, South Korea, Vietnam and West Papua.

• Rich heritage areas and farmland will be destroyed.

• The uncertainty caused by the prospect of a coal mine in the district has caused anxiety, depression and ill-health in the community.

• A new report by The Australia Institute found that Hume Coal's mine could damage the economy of the Southern Highlands.

I urge the Government to reject this project and protect the Southern Highlands, by supporting a vision for a sustainable and coal-free future for this region.

Yours sincerely,

Wayne Richmond

Sydney NSW 2001

I object to the proposed new Hume Coal mine in the Southern Highlands because:

• Toxic mine waste water is a pollution risk to the local river system which is part of the Sydney drinking water catchment.

• Risks to groundwater are too great: the project will seriously affect at least 93 bores owned by 71 landowners, with some drawn down by up to 80 metres.

• An April 2017 Galaxy Research poll found support for the coal mine among Wingecarribee Shire residents is just 18%.

• Dangerous coal dust and diesel emissions from coal trains pose a threat to human health.

• Hume Coal's trains will add an extra 24 minutes of closures at rail level crossings every day. This creates unacceptable delays on emergency service response times.

I object to the proposed new Hume Coal mine in the Southern Highlands because:

I am concerned about the contribution of the burning of fossil fuels on global warming;

I object to the disfigurement of the landscape by mining;

• Toxic mine waste water is a pollution risk to the local river system which is part of the Sydney drinking water catchment.

• Risks to groundwater are too great: the project will seriously affect at least 93 bores owned by 71 landowners, with some drawn down by up to 80 metres.

• An April 2017 Galaxy Research poll found support for the coal mine among Wingecarribee Shire residents is just 18%.

• Dangerous coal dust and diesel emissions from coal trains pose a threat to human health.

• Hume Coal's trains will add an extra 24 minutes of closures at rail level crossings every day. This creates unacceptable delays on emergency service response times.

• The parent company, POSCO, has an appalling international track record for corruption, environmental destruction and human rights abuse documented in India, Uzbekistan, South Korea, Vietnam and West Papua.

• Rich heritage areas and farmland will be destroyed.

• The uncertainty caused by the prospect of a coal mine in the district has caused anxiety, depression and ill-health in the community.

• A new report by The Australia Institute found that Hume Coal's mine could damage the economy of the Southern Highlands.

I urge the Government to reject this project and protect the Southern Highlands, by supporting a vision for a sustainable and coal-free future for this region.

Yours sincerely,

Nigel Tanner

I object to the proposed new Hume Coal mine in the Southern Highlands because:

• Toxic mine waste water is a pollution risk to the local river system which is part of the Sydney drinking water catchment.

• Risks to groundwater are too great: the project will seriously affect at least 93 bores owned by 71 landowners, with some drawn down by up to 80 metres.

• An April 2017 Galaxy Research poll found support for the coal mine among Wingecarribee Shire residents is just 18%.

• Dangerous coal dust and diesel emissions from coal trains pose a threat to human health.

• Hume Coal's trains will add an extra 24 minutes of closures at rail level crossings every day. This creates unacceptable delays on emergency service response times.

• The parent company, POSCO, has an appalling international track record for corruption, environmental destruction and human rights abuse documented in India, Uzbekistan, South Korea, Vietnam and West Papua.

• Rich heritage areas and farmland will be destroyed.

• The uncertainty caused by the prospect of a coal mine in the district has caused anxiety, depression and ill-health in the community.

• A new report by The Australia Institute found that Hume Coal's mine could damage the economy of the Southern Highlands.

I urge the Government to reject this project and protect the Southern Highlands, by supporting a vision for a sustainable and coal-free future for this region.

Yours sincerely,

Anteo Broadfield

Department of Planning and Environment

GPO Box 39

Sydney NSW 2001

I object to the proposed new Hume Coal mine in the Southern Highlands because:

• Toxic mine waste water is a pollution risk to the local river system which is part of the Sydney drinking water catchment.

• Risks to groundwater are too great: the project will seriously affect at least 93 bores owned by 71 landowners, with some drawn down by up to 80 metres.

• An April 2017 Galaxy Research poll found support for the coal mine among Wingecarribee Shire residents is just 18%.

• Dangerous coal dust and diesel emissions from coal trains pose a threat to human health.

• Hume Coal's trains will add an extra 24 minutes of closures at rail level crossings every day. This creates unacceptable delays on emergency service response times.

• The parent company, POSCO, has an appalling international track record for corruption, environmental destruction and human rights abuse documented in India, Uzbekistan, South Korea, Vietnam and West Papua.

• Rich heritage areas and farmland will be destroyed.

• The uncertainty caused by the prospect of a coal mine in the district has caused anxiety, depression and ill-health in the community.

GPO Box 39

Sydney NSW 2001

I object to the proposed new Hume Coal mine in the Southern Highlands because:

• Toxic mine waste water is a pollution risk to the local river system which is part of the Sydney drinking water catchment.

• Risks to groundwater are too great: the project will seriously affect at least 93 bores owned by 71 landowners, with some drawn down by up to 80 metres.

• An April 2017 Galaxy Research poll found support for the coal mine among Wingecarribee Shire residents is just 18%.

• Dangerous coal dust and diesel emissions from coal trains pose a threat to human health.

• Hume Coal's trains will add an extra 24 minutes of closures at rail level crossings every day. This creates unacceptable delays on emergency service response times.

• The parent company, POSCO, has an appalling international track record for corruption, environmental destruction and human rights abuse documented in India, Uzbekistan, South Korea, Vietnam and West Papua.

• Rich heritage areas and farmland will be destroyed.

• The uncertainty caused by the prospect of a coal mine in the district has caused anxiety, depression and ill-health in the community.

• A new report by The Australia Institute found that Hume Coal's mine could damage the economy of the Southern Highlands.

I urge the Government to reject this project and protect the Southern Highlands, by supporting a vision for a sustainable and coal-free future for this region.

Yours sincerely,

Robert Shield

Sydney NSW 2001

I object to the proposed new Hume Coal mine in the Southern Highlands because:

• Toxic mine waste water is a pollution risk to the local river system which is part of the Sydney drinking water catchment.

• Risks to groundwater are too great: the project will seriously affect at least 93 bores owned by 71 landowners, with some drawn down by up to 80 metres.

• An April 2017 Galaxy Research poll found support for the coal mine among Wingecarribee Shire residents is just 18%.

• Dangerous coal dust and diesel emissions from coal trains pose a threat to human health.

• Hume Coal's trains will add an extra 24 minutes of closures at rail level crossings every day. This creates unacceptable delays on emergency service response times.

• The parent company, POSCO, has an appalling international track record for corruption, environmental destruction and human rights abuse documented in India, Uzbekistan, South Korea, Vietnam and West Papua.

• Rich heritage areas and farmland will be destroyed.

• The uncertainty caused by the prospect of a coal mine in the district has caused anxiety, depression and ill-health in the community.

• A new report by The Australia Institute found that Hume Coal's mine could damage the economy of the Southern Highlands.

I urge the Government to reject this project and protect the Southern Highlands, by supporting a vision for a sustainable and coal-free future for this region.

Yours sincerely,

LEONIE LYALL

I object to the proposed new Hume Coal mine in the Southern Highlands because:

• Toxic mine waste water is a pollution risk to the local river system which is part of the Sydney drinking water catchment.

• Risks to groundwater are too great: the project will seriously affect at least 93 bores owned by 71 landowners, with some drawn down by up to 80 metres.

• An April 2017 Galaxy Research poll found support for the coal mine among Wingecarribee Shire residents is just 18%.

• Dangerous coal dust and diesel emissions from coal trains pose a threat to human health.

• Hume Coal's trains will add an extra 24 minutes of closures at rail level crossings every day. This creates unacceptable delays on emergency service response times.

• The parent company, POSCO, has an appalling international track record for corruption, environmental destruction and human rights abuse documented in India, Uzbekistan, South Korea, Vietnam and West Papua.

• Rich heritage areas and farmland will be destroyed.

• The uncertainty caused by the prospect of a coal mine in the district has caused anxiety, depression and ill-health in the community.

• A new report by The Australia Institute found that Hume Coal's mine could damage the economy of the Southern Highlands.

I urge the Government to reject this project and protect the Southern Highlands, by supporting a vision for a sustainable and coal-free future for this region.

Yours sincerely,

Gary Skinner
