**KEY**

- **Sydney Zoo Scope Boundary**
- **South Plot Boundary (Not In Scope)**

**High Risk**
The High Flood Risk Precinct is the land subject to a high hydraulic hazard (in accordance with the provisional criteria outlined in the N.S.W. Government Floodplain Development Manual 2005) in a 100 year flood event and/or subject to potential evacuation difficulties during a flood.

**Medium (1:100 year)**
The Medium Flood Risk Precinct is the land below the 100 year flood level subject to a low hydraulic hazard (in accordance with the provisional criteria outlined in the N.S.W. Government Floodplain Development Manual 2005).

**Low (Possible Maximum Flood)**
The Low Flood Risk Precinct is all land within the floodplain, i.e., within the extent of the Probable Maximum Flood (PMF) but not identified as either a high flood risk or medium flood risk precinct. Therefore, the Low Flood Risk Precinct is all the land between the 100 year and the PMF flood extents.
