Subject: SSD 7256 MOD 1 - 35-37 Frank Street Wetherill Park - Resource Recovery Facility - Comment to DP&E - 23.03.2018

Dear Sheelagh,

Council's Building Control and Environmental Management branches have reviewed the proposed modification to allow the construction of a structure around the baler and wrapper.

Council raises no objection given:

1. The structure will eliminate the potential generation of leachate from baling and wrapping operations and better control the potential for litter and debris propagation.
2. The original application has conditions relating to construction and no additional conditions are recommended.

Thank you for the opportunity to comment.

Regards

Edward Saulig
