Hi Susan,

We feel relatively satisfied that there are unlikely to be any significant issues that would prevent the proposal from proceeding. If it does eventuate that there are adverse environmental impacts, and these are a result of the modified proposal then the EPA will look to manage this through the EPL.

Best regards,

Joshua Madden

Hi Josh,

I looked at the plans and couldn't work out what the likely problems would be as Transgrid didn't identify their specs.

I do agree that I don't think there will be a significant increase in environmental impacts due to this change so please respond to Susan and CC me in.

Thanks

Trevor
