Hi Simon

We have confirmed with GTA, and Conclusion 'X' of the report is an error. The assessment in the report itself notes the following, which is correct:

*"During the AM peak hour, Wheat Road (north of the site) is expected to carry an additional 70 vehicles and Harbour Street (south of Wheat Road) is expected to carry an additional 113 additional vehicles (60 associated with the hotel and serviced apartments, and 53 with the function centre) during the PM peak hour."*

This represents the maximum impact, with anticipated volumes on Harbour Street during the AM peak and Wheat Road during the PM peak being lower than the above figures.

Let me know if you need anything further.

Regards

**Robert Stark** Principal Planner
