In regards to the Hearne St Mortdale - Resource Recovery Facility (Application Number SSD 15\_7421.)

I live in the surrounding streets and am so confused on how this can actual be contemplated.

Who is responsible for disapproving these applications? I'm not really knowledgeable in these things. Is it council? State Government? Federal? Or a independent company?

Rules, laws and zonings are there for a reason. How can these be changed, especially to the large degree that this proposal is asking for. Does anyone use common sense these days? This area is zoned as a light industrial, surrounded entirely by residential area. Do you honestly think that increasing production 10 times and truck traffic by ten times is in anyone's best interests?

Do you even consider what the local people and other local businesses want or say?

This application is absurd, and as stated before I cannot understand how we are even at this point. Are councils and governments supposed to be representing the people they serve, if so listen.

Is there any need for a 24 hour waste deposit site in a built up residential area? If there is I sure would like to know it.

I have lodged a submission to object and I have also signed a petition against this.

But what now? Where does it go from here?

This email is about both expressing my major concerns and gather information about what we do now and how we find out what the process is.

I truly apologize if this email portrays anything other than distress. I am deeply worried about this.

Thanks for listening
