Project: Pedestrian Wind Environment Assessments for 2 Figtree Drive, Sydney Olympic Park

Dear Ms So,

CPP have previously conducted pedestrian wind environment assessments on the 2 Figtree Dr project in Sydney Olympic Park based on architectural drawings from BVN dated October 2016. Recently, Mirvac Design Pty Ltd have provided updated architectural plans dated May 2018 for Section 4.55 submission.

With inspection of the updated plans, from a wind perspective there are no significant changes to the general massing and geometry of the proposed buildings, thus the pedestrian wind environment assessments (reports W-790 and W-793) are still applicable and no further reassessment is required for the updated plans.

We trust that this letter will assist. Please do not hesitate to contact us if you have any questions regarding any aspect of this letter.

Yours sincerely,

Andrew Nguyen
Project Engineer

cc: Joe Paetzold, Engineering Manager
