Attention: Mr Adam Howard

Dear Sirs

**Response for Further Information from NSW Department of Planning & Environment  
NSWRL Centre of Excellence  
Dawn Fraser Avenue, Sydney Olympic Park**

This letter has been prepared in response to the request for further information on Contamination as outlined in Schedule 1 of the letter from NSW Department of Planning & Environment dated 2 December 2016 (Ref. MP10\_0016 MOD 2).

The following procedure will be followed in the event that unexpected concentrations of contaminants that exceed the relevant criteria are found during construction works:

- The NSWRL/Head Contractor will notify the project's Environmental Consultant in relation to the unexpected find in accordance with an Unexpected Finds Protocol (UFP) that is to be incorporated into the Construction Environmental Management Plan (CEMP) for the project.
- The Environmental Consultant will assess the type(s) and concentration(s) of the contaminants and either: (a) undertake a Risk Assessment in accordance with the *National Environment Protection (Assessment of Site Contamination) Measure 1999* (NEPM), as updated in 2013, to determine whether remediation works are required to render the site suitable, or (b) prepare a Remediation Action Plan (RAP) which will outline the course of action required to make the site suitable.
- In the case of a RAP, site validation works will be undertaken to confirm that the intentions of the RAP have been achieved. The outcomes of the validation process will be detailed in a Site Validation Report.
- All elements of these works will be undertaken in accordance with the requirements of NEPM, as well as the NSW EPA.

We trust the above information meets your present requirements.

Yours faithfully,

**Douglas Partners Pty Ltd**

**Peter Oitmaa**
