Hi Chi,

As discussed, we do not foresee any changes in the current design against the SSD document.

One thing worth mentioning is that we have further developed the impacts of the authority sewer on our proposed building and confirmed a deviation is required which we are currently working through with the WSC.

Trust this suits.

Regards

Hi JHA, WGE & NE Teams,

Please confirm your response to Ethos Urban's query below RE: s4.55 documents. If proposed services strategies has not changed from SSD documents then we just need a simple statement/ letter outlining that we are not proposing any significant changes to elec/ hyd/ mech/ ESD etc.

- Building services report – are there any significant changes to the servicing strategy that need addressing? **(JHA, WGE, NE Mech)**

As requested in our previous email, we intend to issue all S4.55 documents to Ethos Urban today or early tomorrow.
