

## Offer to provide Standard Connection Services for Contestable ASP/1 Premises Connections no greater than 11kV

**Premises address:** LORETO KIRIRIBILLI, 85 CARABELLA STREET , KIRIRIBILLI

**Project Number:** AN-20168

**MC Reference:** 1900094409

The offer attached is made on **17/12/2019**

By Ausgrid of 24 Campbell St, Haymarket NSW 2000.

To the *connection customer (Retail Customer or Real Estate Developer)* named in the *connection application* received on 2/08/2019 in respect of the *premises* referred to above.

Ausgrid has certified the electrical design plan(s) AN-20168amendment 0 submitted by your Level 3 Accredited Service Provider (ASP/3). The certification number for this design is **2727853/20191216**. Please contact the ASP/3 to obtain the certified design plan(s) and supporting documentation, which can then be used to obtain quotations from Level 1 Accredited Service Providers (ASP/1) to carry out the works depicted in the design.

Ausgrid is pleased to make you an offer to provide standard connection services in respect of the premises referred in your *connection application*.

Our connection offer is attached. It will remain open for acceptance for 45 business days from the date of this letter.

Ausgrid will provide the standard connection services for this connection in accordance with its standard form connection contract known as **Contract for Connection Services for Contestable ASP/1 Connections**.

The contract terms of that contract and the *schedule to the certified design* are enclosed with and form part of the connection offer. If you accept Ausgrid's offer, then on the date Ausgrid receives your Acceptance of Offer form and verifies that it is accurate, the Contract for Connection Services for Contestable ASP/1 Connections will commence. If you have applied for the connection on behalf of the retail customer or real estate developer who requires the connection, you will be accepting the offer as that person's agent. The contract will be between Ausgrid and the retail customer or real estate developer.

The Contract for Connection Services for Contestable ASP/1 Connections relates to the services Ausgrid performs in relation to the construction and installation of assets by an accredited service provider Level 1 (ASP/1). Details of the contractual relations between Ausgrid, the person who requires the connection and the ASP/1 are set out in our contract terms.

Ausgrid has appointed a Project Officer to co-ordinate the services Ausgrid will provide under the contract if you accept the connection offer. If you have any queries about the connection contract or the project to connect the premises to our network, please contact our Project Officer:

Name	Sita Suresh
Phone number	02-9663 9340
Email address	ssuresh@ausgrid.com.au
Postal Address	51-59 Bridge Road Hornsby Depot NSW 2077 Australia

Your ASP2 should contact Ausgrid's Operational Support Team ( [operationalsupport@ausgrid.com.au](mailto:operationalsupport@ausgrid.com.au) ) if a connection is to be made to a low voltage distribution pillar which is identified in Ausgrid Network Standard, NS119. In these cases it may be necessary for Ausgrid to undertake remedial works prior to your connection being made and your connection will not be available immediately.

### Property Rights

Property rights in favour of Ausgrid are required for all new and altered and, in some instances, existing Ausgrid assets located on private property. To meet this obligation you have two options:

1. At least six (6) weeks prior to electrification of any electrical network construction works a Deed of Agreement (DoA) for Easement or Lease must be executed by all parties. Once executed, Ausgrid will place a caveat over the property. The caveat will be released upon easements being registered. Easement documents must be lodged with LPI without delay following electrification, in accordance with the DoA and Connection Contract. It is recommended that you **allow at least 4 weeks** for Ausgrid to execute standard Deeds of Agreements.
2. Alternatively, you may opt to lodge easements with LPI prior to electrification. In this case, two (2) weeks prior to electrification of any electrical network construction works you must provide evidence of lodgement of the

property rights with LPI. If property rights are not lodged in time, the electrification will need to be rescheduled. It is recommended that you **allow at least 10 weeks** for Ausgrid to execute standard leases and easements. To avoid possible delays in electrification, we recommend you proceed with Option 1 and provide a signed DoA as soon as possible.

The DoA and easement/lease documents, and directions for signing are available on our website at the following link: [www.ausgrid.com.au/CDRS](http://www.ausgrid.com.au/CDRS)

## WHAT TO DO NEXT

- To move ahead, please accept the offer attached below on the Ausgrid Portal and then pay the invoice that will be forwarded to you
- Engage an **ASP Level 1** to construct the works and on the Ausgrid Portal, nominate your selected ASP/1 for this project
- In conjunction with your ASP/1, prepare and forward the table of critical dates to Ausgrid for acceptance
- Have your ASP/1 contact Ausgrid in writing, advising whether it is willing to undertake Ausgrid funded works for the specified price (Contract Clause 8).
- Commence preparation of any required Deed of Agreement, instrument of lease/easement and other property rights required in accordance with the contract.

## Connection Offer

**Ausgrid Project Number:** AN-20168  
**Ausgrid Certified Design Number:** 2727853/20191216

This connection offer is made in response to the connection application you have submitted for a new connection to the electricity distribution system operated by Ausgrid or a connection alteration to an existing connection. The connection services we offer are standard connection services.

Ausgrid offers to connect the premises in accordance with the provisions of the enclosed schedule to the certified design, contract terms and the certified design, which is the design certified by Ausgrid and given the certified design number above. The schedule to the certified design contains key information relating to the connection including a reference to the estimate of Ausgrid's connection charges which are likely to arise in relation to the construction of the distribution system assets required in order for you to connect.

Ausgrid determines the maximum capacity of the connection and may revise the approved capacity downwards after 2 years if the maximum has not been achieved in order to relieve a network constraint. If you disagree with this approach, you can choose not to accept the connection offer and elect to negotiate a negotiated connection contract with Ausgrid.

In accordance with clause 20, Ausgrid will bill you, for connection charges incurred under the contract. Other than the charges billed to your retailer, you are responsible for ensuring those connection charges are paid. Consistent with its connection policy, Ausgrid requires upfront payment of a portion of its alternative control services by you prior to Ausgrid undertaking any further connection services. We will invoice you for these fees as soon as possible and we require payment in accordance with the payment terms of the invoice. Ausgrid's payment terms are twelve (12) business days from date of invoice.

The respective rights and obligations of Ausgrid and persons who require a connection are regulated by the National Energy Retail Law and Chapter 5A of the National Electricity Rules, both as adopted in New South Wales. This offer is made in accordance with these laws.

**If you intend to proceed with the project to which the certified design relates, you must formally accept this connection offer via the Ausgrid Partner Portal unless you elect to negotiate a different connection offer.**

This connection contract will expire if not completed after twelve months and a new connection application will need to be submitted, see clause 21.1(a).

### CONNECTION OFFER EXPIRY DATE:

#### Enclosures:

Contract terms – via website at:  
<https://www.ausgrid.com.au/-/media/Documents/Connections/Offers/Standard-Connection-Services-for-Contestable-ASP1-Premises-Connections-no-greater-than-11kV.pdf>

Schedule to the certified design
