Dear Mr Macindoe

State Significant Development - Secretary’s Environmental Assessment Requirements
Warehousing and Distribution Estate, Marsden Park, Blacktown (SSD 8606)

Please find attached the Secretary’s Environmental Assessment Requirements (SEARs) for the proposed Warehouse and Distribution Estate at Hollinsworth Road, Marsden Park in the Blacktown local government area.

The SEARs have been prepared in consultation with the relevant government agencies (see Attachment 2), and are based on the information you have provided to date. Unfortunately, Blacktown City Council was unable to respond in time. The Department will provide you with Council’s requirements to address in the EIS, when received. Please note that the Department may alter the SEARs at any time. You must consult further with the Department if you do not lodge a Development Application and Environmental Impact Statement (EIS) for the development within two years of the date of issue of these SEARs.

I wish to emphasise the importance of effective and genuine community consultation and the need for the proposal to proactively respond to the community’s concerns. Accordingly, you must undertake a comprehensive, detailed and genuine community consultation and engagement process during the preparation of the EIS. This process must ensure the community is informed of the development and engaged with issues of concern to them. Sufficient information must be provided to the community to enable a good understanding of the development and any potential impacts.

Your development may require separate approval under the provisions of the Commonwealth Environment Protection and Biodiversity Conservation Act 1999 (EPBC Act). If an EPBC Act approval is required, please advise the Department accordingly, as the Commonwealth assessment process may be integrated into the NSW assessment process, and supplementary SEARs may need to be issued.

Please contact the Department at least two weeks before you intend lodge the EIS and any associated documentation for the development. This will enable the Department to determine the:

- applicable fee (under Division 1AA, Part 15 of the Environmental Planning and Assessment Regulation 2000); and
- consultation and public exhibition arrangements, including copies and format requirements of the EIS.

If you have any enquiries about these SEARs, please contact Thomas Plovesan on 9274 6356 or via email at thomas.plovesan@planning.nsw.gov.au.

Yours sincerely

[Signature]

Chris Ritchie
Director
Industry Assessments
As the delegate of the Secretary
Secretary’s Environmental Assessment Requirements
Section 78A(8A) of the Environmental Planning and Assessment Act 1979
State Significant Development

<tr>
<th>General Requirements</th>
</tr>
</thead>
</table>
| The Environmental Impact Statement (EIS) for the development must meet the form and content requirements in clauses 6 and 7 of Schedule 2 of the Environmental Planning and Assessment Regulation 2000 (the Regulation). In addition, the EIS must include:  
   ● a detailed description of the development, including:  
     – the need for the proposed development;  
     – justification for the proposed development;  
     – a description of feasible options within the development which may include a layout options analysis;  
     – likely staging of the development;  
     – likely interactions between the development and existing, approved and proposed operations in the vicinity of the site; and  
     – plans of any proposed building works.  
   ● consideration of all relevant environmental planning instruments, including identification and justification of any inconsistencies with these instruments;  
   ● a risk assessment of the potential environmental impacts of the development, identifying the key issues for further assessment;  
   ● a detailed assessment of the key issues specified below, and any other significant issues identified in this risk assessment, which includes:  
     – a description of the existing environment, using sufficient baseline data;  
     – an assessment of the potential impacts of all stages of the development, including any cumulative impacts, taking into consideration relevant guidelines, policies, plans and statutes; and  
     – a description of the measures that would be implemented to avoid, minimise, mitigate and if necessary, offset the potential impacts of the development, including proposals for adaptive management and/or contingency plans to manage significant risks to the environment.  
   The EIS must also be accompanied by a report from a qualified quantity surveyor providing:  
   ● a detailed calculation of the capital investment value (CIV) of the development as defined in clause 3 of the Regulation, including details of all components of the CIV;  
   ● an estimate of the jobs that will be created by the development during the construction and operational phases of the development; and |
The EIS must address the following specific matters:

**Strategic and Statutory Context** – including:
- detailed justification for the proposal and the suitability of the site; and
- a demonstration the proposal is generally consistent with all relevant planning strategies, environmental planning instruments, development control plans (DCPs), precinct plans and draft district plans.

**Traffic and Transport** – including:
- a quantitative Traffic Impact Assessment prepared in accordance with the relevant Council, Austroads and Roads and Maritime Services guidelines;
- details of all daily and peak traffic and transport movements likely to be generated by the development (vehicle type, public transport, pedestrian and cycle trips) during construction and operation;
- details of road transport routes and access to the site, including intersection location, design and sight distance;
- a cumulative assessment of the predicted impacts on road safety and the capacity of the road network to accommodate the development including existing and future performance of nearby key intersections;
- consideration of traffic volumes from the proposal together with existing and approved developments in the area using SIDRA or a similar model;
- an assessment of the potential impacts of the proposed Castlereagh Freeway road reserve along the southern boundary of the site;
- details of any road upgrades or new roads required for the development, if necessary;
- details of vehicle circulation of the largest light and heavy vehicle anticipated to access the site, including swept path analysis, loading dock servicing and provisions;
- detailed plans of the internal road network and parking provision on-site in accordance with the relevant Australian Standards;
- details of any likely dangerous goods to be transported on arterial and local roads to/from the site, if any, and the preparation of an incident management strategy, if necessary; and
- details of bicycle parking and end of trip facilities.

**Urban Design and Visual** – including:
- layout of the development including staging, floor space ratio, fencing, lighting, site coverage, building, hardstand, setbacks, proposed open space and landscaped areas for the overall development and for individual warehouse buildings;
- detailed justification and analysis for the proposed high bay component, including a written request under clause 4.6 of the Marsden Park Industrial Precinct Plan within *State Environmental Planning Policy (Sydney Region Growth Centres)* 2006 for the exception to the height of buildings development standard applying to the site;
- details of the design choices of the development layout and finishes, including consideration of alternatives to minimise and/or mitigate visual impacts;
- suitable landscaping incorporating locally native species;
- a detailed assessment (including photomontages and perspectives) of the proposal (buildings and storage areas) including height, colour, scale, bulk, building materials and architectural treatments and finishes, signage, lighting and any retaining walls particularly from nearby public receivers and significant vantage points within the broader public domain including evidence of consultation with Council; and
- the layout and design of the development having regard to the surrounding vehicular, pedestrian and cycling networks, if applicable.

**Noise and Vibration** – including:
- a description of all potential noise and vibration sources during the
construction and operational phases of the development, including on
and off-site traffic noise and external mechanical plant;
- a quantitative noise impact assessment, including a cumulative noise
impact assessment in accordance with relevant Environment Protection
Authority guidelines; and
- details of noise mitigation, management and monitoring measures.

- **Soils and Water** – including:
  - a description of the water demands, servicing arrangements and a
breakdown of water supplies;
  - a description of the measures to minimise water use;
  - a description of the proposed erosion and sediment controls during
construction and operation;
  - a detailed assessment of potential soil (including contamination and
acid sulphate soil), surface water, groundwater and salinity impacts of
the proposed development, including adequate mitigating and
monitoring measures;
  - a description of the surface and stormwater management system,
including on-site detention, and measures to treat or re-use water;
  - an assessment of potential surface and groundwater impacts
associated with the development;
  - details of Water Sensitive Urban Design measures to be implemented;
  - an assessment of the impact of flooding on the proposed development
for the full range of flood events up to the probable maximum flood;
  - an assessment of the impact of the proposed development on flood
behaviour and drainage patterns; and
  - details of impact mitigation, management and monitoring measures.

- **Hazards and Risk** – including:
  - if the storage of dangerous goods is proposed on-site, the EIS must
include a preliminary risk screening completed in accordance with State
Environmental Planning Policy No. 33 – Hazardous and Offensive
Development and Applying SEPP 33 (DoP, 2011), with a clear
indication of class, quantity and location of all dangerous goods and
hazardous materials associated with the development. Should
preliminary screening indicate that the project is “potentially hazardous”
a preliminary hazard analysis (PHA) must be prepared in accordance
with Hazardous Industry Planning Advisory Paper No. 6 – Guidelines
for Hazard Analysis (DoP, 2011) and Multi-Level Risk Assessment
(DoP, 2011).

- **Air Quality** – including:
  - an assessment of the air quality impacts (particularty dust) at private
properties during construction and operation of the development, in
accordance with the relevant Environment Protection Authority
guidelines; and
  - details of any mitigation, management and monitoring measures
required to prevent and/or minimise emissions.

- **Infrastructure Requirements** – including:
  - a detailed description of existing infrastructure on-site;
  - identification of any infrastructure upgrades required to facilitate the
development;
  - a description of any arrangements to ensure the required upgrades will
be implemented in a timely manner and maintained; and
  - details of any works proposed near or within the TransGrid Sydney
West – Sydney North No. 1 330 KV transmission line easement.

- **Bushfire** – including:
  - details of how the proposal addresses the requirements of the Draft
Planning for Bush Fire Protection 2017 (RFS) and the provision of
access (including perimeter roads) and provision of water supply for
firefighting purposes.

- **Waste** – including:
  - details of the quantities and classification of all waste streams to be
generated on-site;
- a description of all wastewater generated on-site;
- details of waste storage, handling and disposal; and
- details of the measures that would be implemented to ensure that the development is consistent with the aims, objectives and guidance in the *NSW Waste Avoidance and Resource Recovery Strategy 2014-2021*.

- **Heritage** – including an Aboriginal heritage assessment in accordance with OEH guidelines.

**Plans and Documents**
The EIS must include all relevant plans, architectural drawings, diagrams and relevant documentation required under Schedule 1 of the Regulation. These documents should be provided as part of the EIS rather than as separate documents.

**Consultation**
During the preparation of the EIS, you must consult with the relevant local, State or Commonwealth Government authorities, service providers, community groups and affected landowners. In particular, you must consult with:
- Blacktown City Council;
- Transport for NSW;
- Roads and Maritime Services;
- TransGrid;
- Department of Primary Industries;
- Rural Fire Service; and
- local residents and stakeholders.

The EIS must describe the consultation process and the issues raised, and identify where the design of the development has been amended in response to these issues. Where amendments have not been made to address an issue, a short explanation should be provided.

**Further consultation after 2 years**
If you do not lodge an EIS for the development within 2 years of the issue date of these SEARs, you must consult with the Secretary in relation to any further requirements for lodgement.

**References**
The assessment of the key issues listed above must take into account relevant guidelines, policies, and plans as identified. While not exhaustive, the following attachment contains a list of some of the guidelines, policies, and plans that may be relevant to the environmental assessment of this development.
ATTACHMENT 1
Technical and Policy Guidelines

The following guidelines may assist in the preparation of the Environmental Impact Statement. This list is not exhaustive and not all of these guidelines may be relevant to your proposal.

Many of these documents can be found on the following websites:
http://www.planning.nsw.gov.au
http://www.bookshop.nsw.gov.au

<td>The EIS must include all relevant plans, architectural drawings, diagrams and relevant documentation required under Schedule 1 of the Environmental Planning and Assessment Regulation 2000. Provide these as part of the EIS rather than as separate documents.</td>
<td></td>
</tr>
</tbody>
</table>

In addition, the EIS must include the following:

1. An existing site survey plan drawn at an appropriate scale illustrating:
   - the location of the land, boundary measurements, area (sqm) and north point;
   - the existing levels of the land in relation to buildings and roads;
   - location and height of existing structures on the site;
   - location and height of adjacent buildings and private open space; and
   - all levels to be to Australian Height Datum (AHD).

2. Locality/context plan drawn at an appropriate scale should be submitted indicating:
   - significant local features such as heritage items;
   - the location and uses of existing buildings, shopping and employment areas; and
   - traffic and road patterns, pedestrian routes and public transport nodes.

3. A3 drawings at an appropriate scale illustrating:
   - detailed plans, sections and elevations of the existing building, which clearly show all proposed internal and external alterations and additions.

</tr>
</thead>
</table>
| Documents to submit include:
   - 1 hard copy and 1 electronic copy of all the documents and plans for review prior to exhibition; and
   - Other copies as determined by the Department once the development application is lodged. |
