PO Box 19  
Terrey Hills NSW 2084

Dear Mr Davis,

**Re: Letter of Support – Kariong Sand and Soil Supplies – Sand, Soil and Building Products  
Recycling Facility**

I understand that your company is planning to establish a best practice sand, soil and building materials recycling facility at 90 Gindurra Rd, Somersby. The facility aims to produce a number of building and landscape supply products from recycled materials, providing them for re-use mainly in the Central Coast region.

I note that your development application is in the final stages of assessment by the Department of Planning, Industry and Environment, and is likely to be determined by the end of 2019. The facility, when approved, will provide recycling services for up to 200,000 tonnes per annum of sand, soil and building materials.

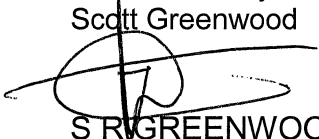

Our business generates approximately 100,000 tonnes per year of civil construction and building waste materials, consisting of concrete, asphalt, bricks, timber, soils, metals, stumps, root balls and mixed building waste materials. When your facility is approved and operational, we intend to bring up to 30,000 tonnes of waste materials per annum to your facility for recycling.

It is understood that your company is currently applying for funding from the NSW Environmental Trust's Major Resource Recovery Infrastructure Grant Programs to help your business build the Kariong Sand and Soil Supplies recycling facility.

My business strongly supports your proposal, and would like to emphasise the importance of this project to help boost the recovery of building materials and reduce landfill.

Should you need any further information, please contact me on 0408 444 456 or email [scott@greenwoodcontracting.com.au](mailto:scott@greenwoodcontracting.com.au)

Yours sincerely,  
Scott Greenwood

Dear Mr Davis,

***Re: Letter of support – Kariong Sand and Soil Supplies – Sand, Soil and Building Products Recycling Facility***

I understand that your company is planning to establish a best practice sand, soil and building materials recycling facility at 90 Gindurra Rd, Somersby. The facility aims to produce a number of building and landscape supply products from recycled materials, providing them for re-use mainly in the Central Coast region.

It is noted that your development application is in the final stages of assessment by the Department of Planning, Industry and Environment, and is likely to be determined by the end of 2019. The facility, when approved, will provide recycling services for up to 200,000 tonnes per annum of sand, soil and building materials. The facility will help meet a critical recycling infrastructure gap in the Central Coast and Hunter region of NSW.

Our company generates approximately 38,000 tonnes per year of civil construction and building waste materials, consisting of concrete, asphalt, bricks, timber, soils, metals, stumps, root balls and mixed building waste materials. When your facility is approved and operational, we intend to bring up to 25,000 tonnes of waste materials per annum to your facility for recycling.

It is understood that your company is currently applying for funding from the NSW Environmental Trust's Major Resource Recovery Infrastructure Grant Programs to help your business build the Kariong Sand and Soil Supplies recycling facility.

Our company, having worked with Davis Earthmoving & Quarrying for the past 30 years strongly supports your proposal, and would like to emphasise the importance of this project to help boost the recovery of building materials away from landfill.

Should you need any further information, please contact me on 0414 524 206 or brad@aebiggs.com.au.

Your sincerely,

**RE: Letter of support – Kariong Sand and Soil Supplies – Sand, Soil and Building Products Recycling Facility.**

Central Waste Station Services (CWS) is a Resource Recovery facility based in the Hunter Industrial Ecology Park.

CWS currently holds contracts various contracts with Hunter councils and Tier 1 Builders to receive and process construction and demolition waste and commercial and industrial waste.

CWS understands that the NSW Environmental Trust have released funding under the Major Resource Recovery Infrastructure Grant to support additional resource recovery in NSW and increase recycled content in the manufacturing of products. The intention of this letter is to formally commit our intention of providing the below product to Kariong Sand and Soil Supplies;

*Clean Wood: Approximately 20,000t*

By email to: [davisem@davisem.com.au](mailto:davisem@davisem.com.au)

Dear Mr Davis

**Re: Kariong Sand and Soil Supplies – Sand, Soil and Building Products Recycling Facility**

It is understood that your company is planning to establish a sand, soil and building materials recycling facility at 90 Gindurra Rd, Somersby which aims to produce a number of building and landscape supply products from recycled materials, providing them for re-use mainly in the Central Coast region.

It is noted that your Development Application is in the final stages of assessment by the Department of Planning, Industry and Environment and is likely to be determined by the end of 2019. The facility, when approved, will provide recycling services for up to 200,000 tonnes per annum of sand, soil and building materials. The facility will help meet a critical recycling infrastructure gap in the Central Coast and Hunter regions of NSW.

Central Coast Council generates approximately 80,000 tonnes per year of civil construction and building waste materials consisting of gravels, concrete, asphalt, bricks, timber, metals, stumps, root balls and mixed building waste materials with a further 80,000 tonnes (approximately) of clean soil material.

Provided the proposed facility meets all operational and legislative requirements and the pricing for both incoming and outgoing materials makes it competitive for Council's operations, we anticipate significant utilisation of this facility. Whilst the actual or intended volume of material taken into or out of the facility cannot be guaranteed, at this early stage we could see Council taking approximately 60% of its civil and building material into and approximately 40% out of this facility.

It is understood that your company is currently applying for funding from the NSW Environmental Trust's Major Resource Recovery Infrastructure Grant Programs to help your business build the Kariong Sand and Soil Supplies Recycling Facility. Council is proactively seeking environmentally sustainable initiatives in its construction practices and therefore fully supports facilities such as this, particularly as it seeks to utilise materials sourced from the Central Coast region.

Dear Mr Davis

Re: Letter of Support – Kariong Sand and Soil Supplies - Sand, Soil and Building Products Recycling Facility.

I understand that your company is planning to establish a best practice sand, soil and building materials recycling facility at 90 Gindurra Rd Somersby. The facility aims to produce a number of building and importantly landscape supply products from recycled materials, providing them for re-use mainly in the Central Coast region and beyond to us.

I note that your development application is in the final stages of assessment by the Department of Planning, Industry and Environment, and is likely to be determined by the end of 2019. The facility when approved, will provide recycling services for up to 200,000 tonnes per annum of sand, soil and building materials.

Our business currently purchases civil supplies and construction materials for our landscaping projects from a number of suppliers, including yours. When your facility is approved, we would be interested in potentially purchasing from your facility up to 12,000 tonnes per annum of mulches, drainage aggregates, sand and soil. This is additional to the current 8,000 tonnes we currently get. Kariong is substantially better economically and environmentally for our business. Landscape Architects, designers and customers are increasingly demanding the use of more recycled products in their projects. This will not decrease in the future, only expand.

I understand you are currently applying for funding from the Environmental Trust's Major Resource Recovery Infrastructure Grant Programs to help your business build the Kariong Sand and Soils Recycling Facility

Our business strongly supports your proposal, and would like to emphasise the importance of this project to help improve the sustainability of building projects and landscaping on the Central Coast.

Should you need any further information . please contact me on 0419230184 or email [bowtell1@bigpond.com](mailto:bowtell1@bigpond.com)

**Re: Letter of support –**

I understand that your company is planning to establish a best practice sand, soil and building materials recycling facility at 90 Gindurra Rd, Somersby. The facility aims to produce a number of building and landscape supply products from recycled materials, providing them for re-use mainly in the Central Coast region.

I note that your development application is in the final stages of assessment by the Department of Planning, Industry and Environment, and is likely to be determined by the end of 2019. The facility, when approved, will provide recycling services for up to 200,000 tonnes per annum of sand, soil and building materials.

Our company currently purchases civil supplies and construction materials for our building and landscaping projects from a number of suppliers, including yourselves. When your facility is approved, we would be interested in potentially purchasing from your new facility up to 15,000 tonnes per annum of mulches, aggregates, road base, asphalt and soils for use in our various projects.

I understand you are currently applying for funding from the NSW Environmental Trust's Major Resource Recovery Infrastructure Grant Programs to help your business build the Kariong Sand and Soil Supplies recycling facility. Our company strongly supports your proposal, and would like to emphasise the importance of this project to help improve the sustainability of building projects on the Central Coast.

Should you need any further information, please contact me on 0409 457 879 or [steve@roylamb.com.au](mailto:steve@roylamb.com.au).

Yours sincerely,

Stephen Lamb

Dear Mr Davis

**Re: Kariong Sand and Soil Supplies – Sand, Soil and Building Products Recycling Facility**

It is understood that your company is planning to establish a sand, soil and building materials recycling facility at 90 Gindurra Rd, Somersby which aims to produce a number of building and landscape supply products from recycled materials, providing them for re-use mainly in the Central Coast region.

It is noted that your Development Application is in the final stages of assessment by the Department of Planning, Industry and Environment and is likely to be determined by the end of 2019. The facility, when approved, will provide recycling services for up to 200,000 tonnes per annum of sand, soil and building materials. The facility will help meet a critical recycling infrastructure gap in the Central Coast and Hunter regions of NSW.

Central Coast Council currently purchases civil supplies and construction materials for our building and landscaping projects from a number of suppliers, including you. Provided the proposed facility meets all operational and legislative requirements and the pricing for both incoming and outgoing materials makes it competitive for Council's operations, we anticipate significant utilisation of this facility.

Council currently sources up to approximately 60,000 tonnes of materials such as mulches, aggregates, road base, asphalt and soils to conduct its roads and drainage operations. Council would be looking to source a significant proportion of this sustainably and, where preferable, from a local supplier if the operation meets Council's requirements as noted above.

It is understood that your company is currently applying for funding from the NSW Environmental Trust's Major Resource Recovery Infrastructure Grant Programs to help your business build the Kariong Sand and Soil Supplies Recycling Facility. Council is proactively seeking environmentally sustainable initiatives in its construction practices and, therefore, fully supports facilities such as this, particularly as it seeks to utilise materials sourced from the Central Coast region.

Dear Mr Davis,

**Re: Letter of Support  
Kariong Sand and Soil Supplies – Sand, Soil and Building Products Recycling Facility**

I understand that your company is planning to establish a best practice sand, soil and building materials recycling facility at 90 Gindurra Rd, Somersby. The facility aims to produce a number of building and landscape supply products from recycled materials, providing them for re-use mainly on the Central Coast region. I note that your development application is in the final stages of assessment by the Department of Planning, Industry and Environment, and is likely to be determined by the end of 2019. The facility when approved, will provide recycling services for up to 200,000 tonnes per annum of sand, soil and building materials.

Our business currently purchases civil supplies and construction materials for our building and landscaping projects from a number of suppliers, including yourselves. When your new facility is approved we would be interested in potentially purchasing from this facility up to 3000 tonnes per annum of mulches, aggregates, road base, asphalt and soils for use in our various projects, subject to competitive pricing.

Additionally, I understand you are currently applying for funding from the NSW Environmental Trust's Major Resource Recovery Infrastructure Grant Programs to help your business build the Kariong Sand and Soil Supplies recycling facility. As a local business, we strongly support your proposal and would like to emphasise the importance of this project to help improve the sustainability of building projects on the Central Coast.
