5	Victoria Cross – OSD Envelope	
5.1	The OSD team updated the Panel on submissions to the Victoria Cross OSD EIS in response to concerns about the stepped form of the concept envelope along Miller Street.	Note
5.2	<p>The Panel supports the concept of an ‘articulation zone’ along the Miller Street frontage noting that any future building design may utilise some (not all) of the nominated zone subject to demonstrating design excellence. The assessment should be based on the design outcome taking into consideration:</p> <ul style="list-style-type: none"> • Compliance with overshadowing requirements • Respecting the datum of the MLC building adjoining • Maintaining sky view • Acceptable amenity and microclimate in the public domain, particularly wind impacts. 	Note
