**Subject: Re: Early Works SSD 8924-Condition B 18 Construction Noise and Vibration Management Plan - for approval.**

---

Hi Jennifer/ Ash

In anticipation of an Instruction to proceed with certain pile extraction works and the Seawall rectification works, Multiplex has altered Hansen and Yuncken Construction Noise and Vibration Management Plan as requested by Insw to be applicable for Multiplex to undertake stage 1 works.

Multiplex is proceeding on the basis that Infrastructure Nsw being the sole retainer of Hansen Yuncken intellectual property and has full authority to transfer those rights to multiplex free of cost and without liability.

By way of amendment to the Construction Noise and Vibration Management Plan for stage 1 works please find below revisions to clauses with in the plan.

The following clauses are amended under this cover sheet:-

1. Clause 1.1 Review and Approval Delete and replace with

Position	Name	Date and Sign
Project Manager	Paul Couani	
Site Manager	Ben De Bono	

Project Engineer	Justin Canceri	
------------------	----------------	--

Position	Name	Approved
Site Manager	Ben De Bono	
Project Manager	Paul Couani	

1. General note delete references to Hansen and Yuncken and Liberty International replace with Multiplex Constructions.
2. Clause 3 Scope of Works. Delete existing scope of works and replace with pile extraction and seawall demolition and embankment stabilisation.
3. Clause 6.1 Communication. Delete references to Elton Contracting and replace with Multiplex Community communications strategy.
4. Executive summary (Liberty) delete references to hazardous materials removal.
5. Clause 1. 1 Delete scope of works and replace with Pile extraction and sea wall demolition and stabilisation
6. Clause 3.1 delete references to concrete pumps , screw piles
7. Clause 4.10 delete references to Elton Contracting

Could I ask that you forward this advice to the Certifier for his assessment.

Regards Eric Rolls
