Comment

Notes:

The EPA notes the modification relates to design changes to the basement. Based on the documents provided, the modification does not alter the EPA's advice and recommendations for the original proposal regarding noise and vibration, water quality, contamination, waste and air quality and therefore has no comment to make.

However, in reference to the EPA's letter regarding Mod 1 (dated 01.02.21), it was requested to remove the requirement to consult with the EPA from conditions B79, B81, B92 and B96 as part of that Mod. It is noted Mod 1 is still under assessment. If Mod 3 is scheduled to be determined ahead of Mod 1, or Mod 1 is withdrawn, it is requested those requested amendments are included as part of Mod 3.
