

Hi Rodger

I heard back from NSW Maritime Division and they advised that as the proposed re-profiling of the seabed is contained within the proposed building footprint they have no comments to make in terms of navigation.

Thanks again for following up on our comments, I appreciate it.

Kindest regards
Delia

Subject: RE: Notification of Modification Application (SSD 8925 MOD 4) for the new Sydney Fish Market - Stage 2 Main Works.

Hi Rodger

Further to my email below, maritime planning has no specific comments to make with regard to the subject proposed modification. The submitted appendices address the environmental impacts, including contamination, ASS, siltation, aquatic vegetation including seagrass, of the development.

I am yet to hear from Maritime Division with regard to navigation, I will follow up with them and let you know of their comments.

Thanks heaps.

Regards
Delia
