Sydney NSW 2000

Attention: Alison Tham

Subject: Mudgee Hospital SEPP 33 Assessment

Dear Alison,

Based on the following information supplied to Pinnacle Risk Management, a Preliminary Hazard Analysis (PHA) is not required for the Mudgee Hospital redevelopment project as:

1. The Dangerous Goods transported to and stored on site are within the threshold quantities listed in SEPP 33; and

2. There are no other known hazardous materials at the hospital that would deem the hospital to be a potentially hazardous facility, e.g. combustible dust.

Yours sincerely,
